

BARE FOOT

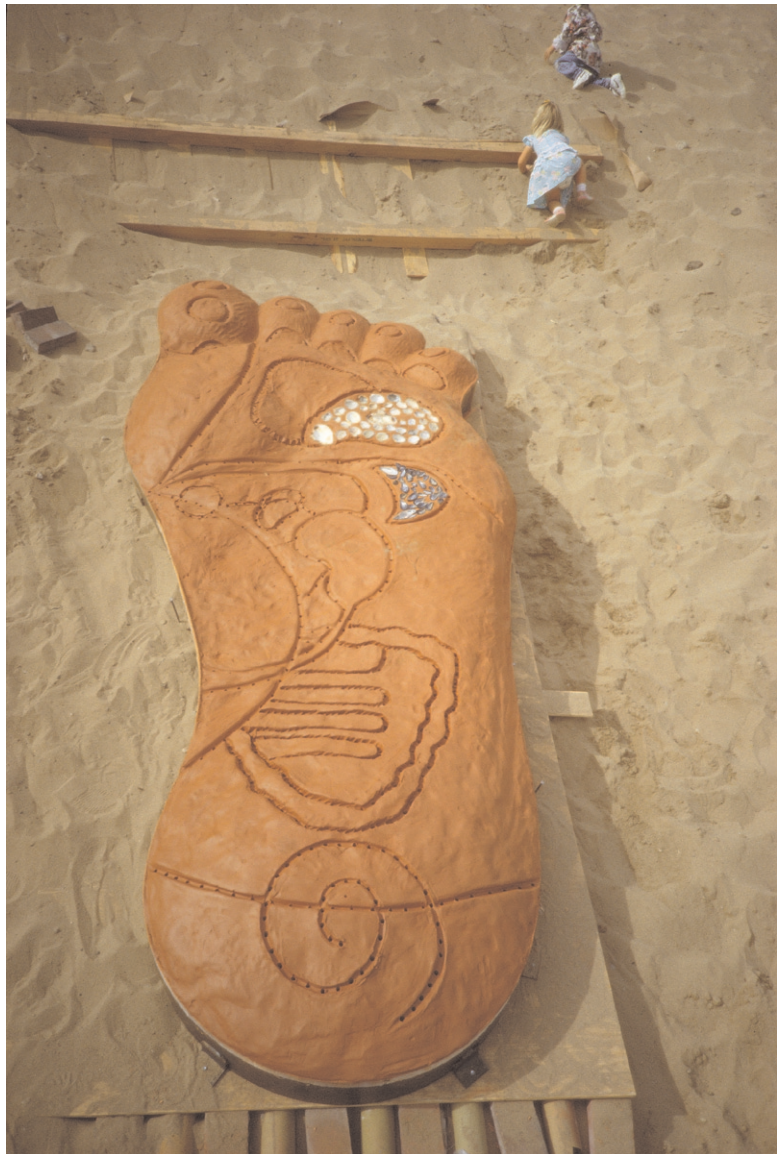

MANHATTAN BEACH ART PROJECT

Sand Dune Park, Manhattan Beach, California 1994

Commissioner: City of Manhattan Beach Public Art Program
Budget: \$ 8,000

terra cotta clay, seashells, concrete

Students, children, and local community members participated in the creation of the *Bare Foot* sculpture. The footprint, modeled after the sole of the artist's foot, maps the healing acupressure points on the human body and actually stimulates the very same for those who walk bare foot over the top of the sculpture, by virtue of its highly textured surface.
