COMPACT  
DISC  
DIGITAL AUDIO

## SPECIFICATIONS

### Compact disc player

Frequency response	2Hz – 20 kHz ± 0.5 dB
Signal to noise ratio	More than 100 dB
Dynamic range	More than 92 dB
Harmonic distortion	Less than 0.008%
Channel separation	More than 95 dB

### Outputs

LINE OUT (phono jacks)	Output level 2 V (at 50 kilohms) Load impedance over 10 kilohms
PHONES (stereo phone jack)	Output level max. 10 mW Load impedance 32 ohms

### General

Power requirements	120 V AC, 60Hz
Power consumption	11W
Dimensions (approx., including projections)	430×100×280 mm (w/h/d) (17×4×11½ inches)
Weight (approx.)	3.5 kg (7 lbs 12 oz)

### Supplied accessories

Audio cord	1 (2 phono plugs – 2 phono plugs)
Remote commander	1
R6 (size AA) batteries	2

### Remote commander

Remote control system	Infrared control
Power requirements	3 V DC with two R6 (size AA) batteries
Dimensions	Approx. 43×20×175 mm (w/h/d) (1¾×¾×7 inches)
Weight	Approx. 105 g (4 oz) Including batteries

Design and specifications subject to change without notice.

### SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK OR DOTTED LINE WITH MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

### ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

**COMPACT DISC PLAYER**  
**SONY®**

## SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

## LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamper). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.

3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

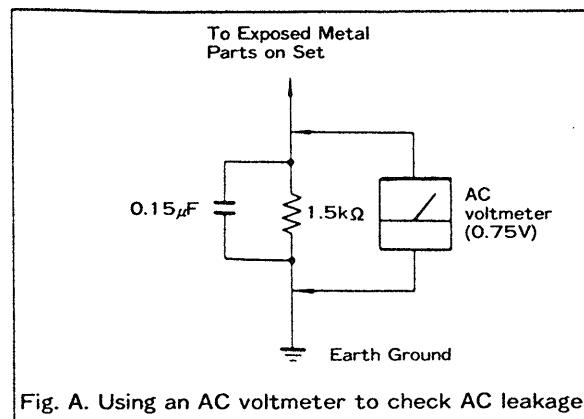

Fig. A. Using an AC voltmeter to check AC leakage.

## SERVICING NOTE

**NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT**

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body.

During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts.

The flexible board is easily damaged and should be handled with care.

**CAUTION**

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

## NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

## PROTECTION OF EYES FROM LASER BEAM DURING SERVICING

This set employs a laser. Therefore, be sure to follow carefully the instructions below when servicing.

### CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

### 1. Laser Diode Properties

- Material: GaAlAs
- Wavelength: 780 nm
- Emission Duration: continuous
- Laser Output: max. 44.6  $\mu$ W\*

\* This output is the value measured at a distance of about 200 mm from the objective lens surface on the Optical Pick-up Block.

2. During service, do not take the Optical Pick-up Block apart, and do not adjust the APC circuit. If there is a breakdown in the APC circuit (including laser diode), replace the entire Optiocal Pick-up Block (including APC borad).

## BESKYTTELSE AF ØJNE MOD LASERSTRÅLING UNDER SERVICE

I dette apparat anvendes laserlys. Derfor skal nedenstående instruktioner nøje følges under service.

Følg iøvrigt instruktionerne i servicemanualen.

### ADVARSEL!!

Under service må øjnene ikke komme nær objektiv-linsen på den optiske pick-up enhed. I tilfælde af at det er nødvendigt at kontrollere udsendelsen af laserlys, skal det ske i en afstand af mere end 25 cm fra den optiske pick-up.

### 1. Laser-didoe data

- Materiale: GaAlAs
- Bølgelængde: 780 nm
- Udstråling: Kontinuerlig
- Laseroutput: Max. 0,4 mW\*

\* Målt i 1,6 mm afstand fra overfladen af objektiv-linsen på den optiske pick-up enhed.

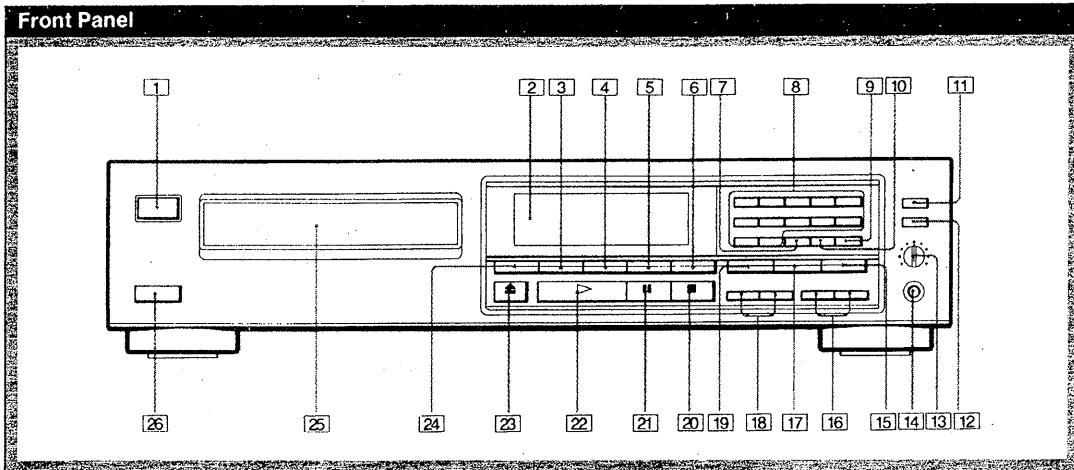

- Klassifikation: Klasse IIIb.

2. Adskil aldrig den optiske pick-up enhed under service, og juster ikke APC kredsløbet (Automatic Power Control). Hvis APC kredsløbet (incl. laserdioden) bryder ned, skal hele den optiske pick-up enhed (incl. APC printkortet) udskiftes.

# SECTION 1

## GENERAL

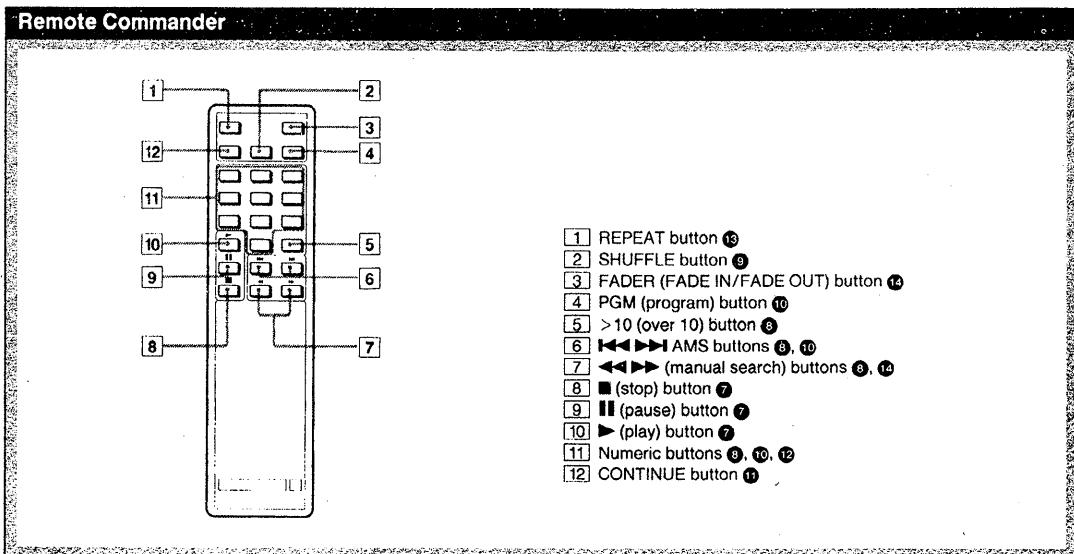

### Location of Controls

Refer to the pages indicated in ● for details.

- [1] POWER switch ●7
- [2] Display window
- [3] TIME button ●8
- [4] AUTO SPACE button ●14
- [5] REPEAT button ●15
- [6] FADER (FADE IN/FADE OUT) button ●14
- [7] CHECK (program check) button ●11
- [8] Numeric buttons ●9, ●10, ●12
- [9] >12 (over 12) button ●8
- [10] CLEAR (program clear) button ●11
- [11] EDIT/TIME FADE button ●10, ●14
- [12] TIME SET button ●12, ●14
- [13] PHONE LEVEL control
- [14] PHONES jack

- [15] PROGRAM button ●10
  - [16] <>>> (manual search) buttons ●6, ●14
  - [17] SHUFFLE button ●9
  - [18] <>>>I (AMS\*/RMS\*\*) buttons ●8, ●10
  - [19] CONTINUE button ●11
  - [20] ■ (stop) button ●7
  - [21] ▨ (pause) button ●7
  - [22] ▷ (play) button ●7
  - [23] ▲ (open/close) button ●7
  - [24] PEAK SEARCH button ●15 (except for AEP model)
  - [25] Disc tray ●7
  - [26] Remote sensor ●5
- \* AMS is the abbreviation of Automatic Music Sensor.  
\*\* RMS is the abbreviation of Random Music Sensor.

## SECTION 2

### IC FUNCTION DESCRIPTION

#### IC101 (CXA1372Q) PIN DESIGNATION

Pin No.	Pin Name	I/O	Pin Description
1	VC		GND when two ( $\pm$ ) dual power supplies are in use, or the center voltage (2.5 V) when a single power supply is in use.
2	FGD	I	Time constants for gain switching in normal mode/down mode and for focus gain are connected between the FGD and FS3 pins.
3	FS3	I	
4	FLB	I	The capacitor for low frequency boost in the focus servo loop is connected.
5	FEO	O	Focus drive output
6	FE -	I	Inverted input to focus amplifier
7	SRCH	I	Time constants to generate the focus search waveform are connected.
8	TGU	I	Time constants for gain switching in normal mode/up mode and for tracking gain are connected between TGU pin and TG2 pin.
9	TG2	I	
10	AVCC		Analog power supply (5 V when $\pm$ dual power supplies are in use, 5 V when a single power supply is in use.)
11	TAO	O	Tracking drive output
12	TA-	I	Inverted input to tracking amplifier
13	SL +	I	Non-inverted input to sled amplifier
14	SLO	O	Sled drive output
15	SL -	I	Non-inverted input to sled amplifier
16	ESET	I	The 610-k $\Omega$ phase compensator resistor is connected to this pin.
17	ISET	I	The current setting resistor is connected to this pin.
18	SSTOP	I	The limit switch is connected to this pin.
19	AVEE		Analog power supply (-5V when $\pm$ dual power supplies are in use, or GND when a single power supply is in use.)
20	DIRC	I	Direct control pin.
21	LOCK	I	Sled run-away prevention circuit operates when this signal is "L".
22	CLK	I	Serial data transfer clock input that is supplied from CPU (or DSP).
23	XLT	I	Latch input from CPU (or DSP).
24	DATA	I	Serial data input from CPU (or DSP).
25	XRST	I	System reset. "L" to reset.
26	C.OUT	O	Output to tracking counter.
27	SENS	O	SENS output
28	DGND		Digital ground (GND). (GND when $\pm$ dual power supplies are in use. GND when a single power supply is in use.)
29	MIRR	O	Mirror output.
30	DFCT	O	Defect output. "H" when defective.
31	ASY	I	Auto-assymmetry control input.
32	EFM	O	EFM comparator output.
33	FOK	O	Focus OK.
34	CC2	I	Defect-bottom-hold input (input by capacitive coupling).
35	CC1	O	Defect-bottom-hold output.
36	DVCC		Digital power supply (+5 V when $\pm$ dual power supplies in use. +5 V when a single power supply is in use.)
37	CB	I	The defect-bottom-hold capacitor is connected to this pin.
38	CP	I	The mirror hold capacitor is connected to this pin.
39	RF1	I	RF signal input (input by capacitive coupling).
40	RF0	I	RF signal input (input by DC coupling).
41	DVEE		Digital power supply (-5 V when $\pm$ dual power supplis are in use. GND when a single power supply is in use.)
42	TZC	I	Tracking zero cross comparator input.
43	TE	I	Tracking error input.
44	TDFCT	I	The defect prevention hold capacitor is connected to this pin.
45	ATSC	I	Anti-shock input.
46	FZC	I	Focus zero-cross comparator input.
47	FE	I	Focus error input.
48	fdfct	I	The defect prevention hold capacitor is connected to this pin.

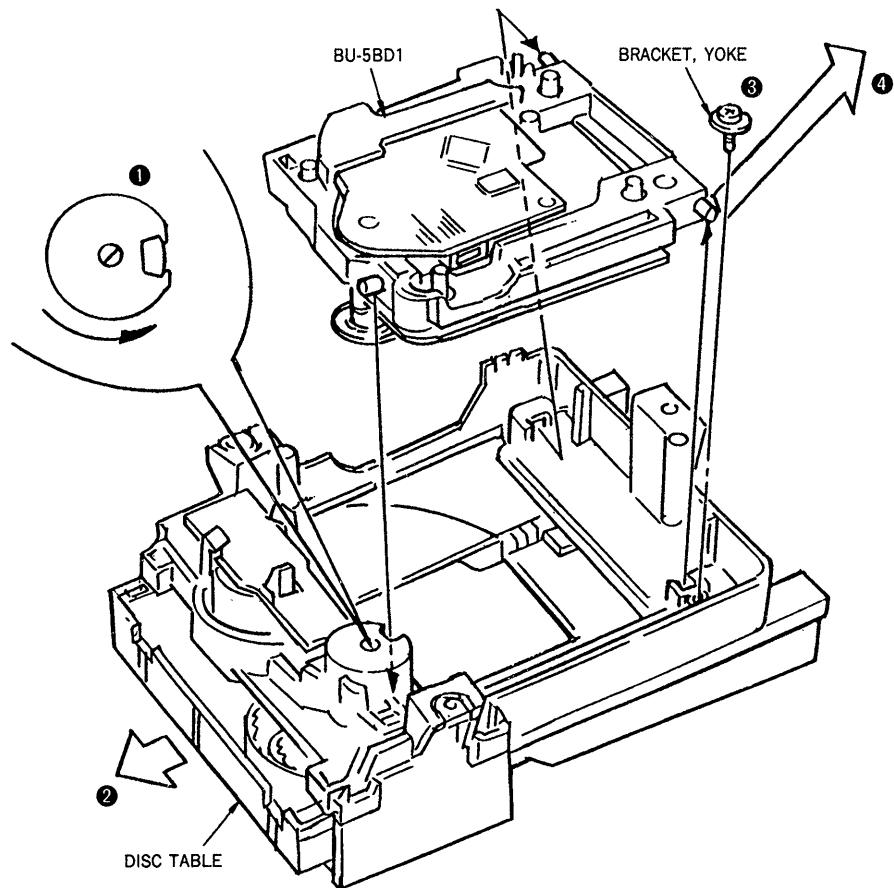

## SECTION 3

### DISSASSEMBLY OF BASE UNIT

**Note:**

Follow the disassembly procedure in the nomerical order given.

- ① Turn the cam to the direction of arrow (Counter clock wise) by minus screw driver.
- ② Take off the disc table.
- ③ Remove the bracket yoke.
- ④ Remove the MD (BU-5BD1) to the direction of arrow.

## SECTION 4 ADJUSTMENTS

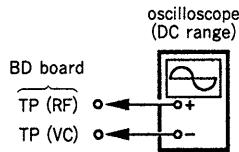

### ELECTRICAL ADJUSTMENTS

1. Perform adjustments in the order given.
2. Use YEDS-18 (Part No. 3-702-101-01) disc unless otherwise indicated.
3. Use the oscilloscope with more than  $10M\Omega$  impedance.

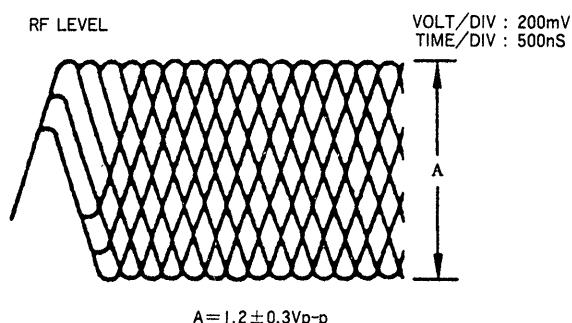

### RF LEVEL check

This adjustment should be made after replacing the Optical Pick-up Block.

Procedure:

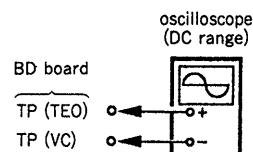

1. Connect oscilloscope to the test points TP (RF) and TP (VC).
2. Turn POWER switch on.
3. Put the disc (YEDS-18) in and press  $\triangleright$  button.
4. Confirm that an optimum waveform eye pattern. Optimum eye pattern means that shape “ $\diamond$ ” can be clearly distinguished at the center of the waveform.

### E-F Balance Check

This adjustment should be made after replacing the Optical Pick-up Block.

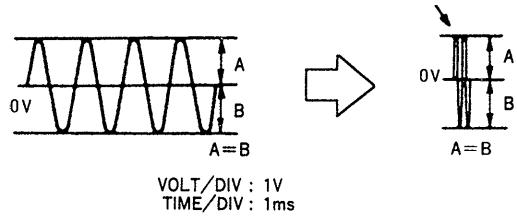

Procedure:

1. Connect the oscilloscope to the test points TP (TEO) and TP (VC).
2. Connect test point TP (ADJ) to ground and TP (TES) to TP (VC) with lead wire.
3. Turn POWER switch on.

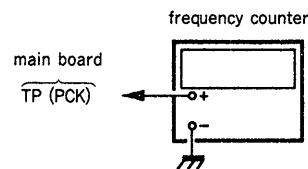

4. Put the disc (YEDS-18) in and press  $\triangleright$  button.
5. Confirm that the traverse waveform is symmetrical above and below.
6. After adjustment, remove the TP(ADJ), in ground.

**NOTE:**Take sweep time as long as possible to obtain best waveform.

### RF PLL Free-run Frequency Check

Procedure:

1. Connect the frequency counter to the test points TP (PCK) and TP (GND).
2. Turn POWER switch on.
3. Put the disc (YEDS-18) in and press  $\triangleright$  button.
4. Confirm that the reading on the frequency counter is locked at 4.3218 MHz.

### Focus/Tracking Gain Adjustment

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, this adjustment is not recommended generally to be performed.

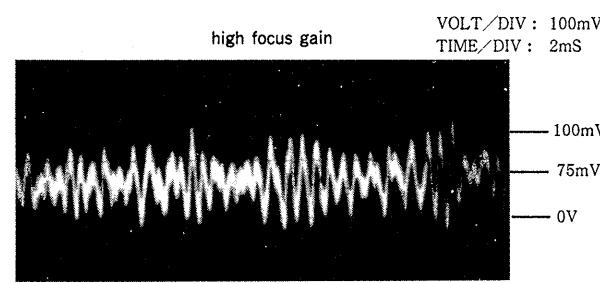

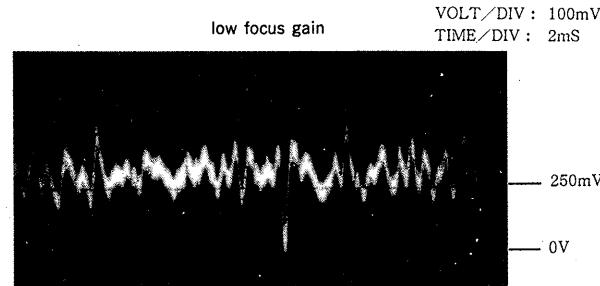

Focus/tracking gains determine the pick-up follow-up (vertical and horizontal) relative to mechanical noise and mechanical shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, it is more susceptible to mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

Symptoms	Gain	Focus	Tracking
• The time until music starts becomes longer for STOP → PLAY or automatic selection (◀▶ buttons) pressed. (Normally takes about 2 seconds.)		low	low or high
• Music does not start and disc continues to rotate for STOP → PLAY or automatic selection (◀▶ buttons pressed.)		—	low
• Sound is interrupted during PLAY. Or time counter display stops progressing.		—	low
• More noise during 2-axis device operation.	high		high

- Incorrect Examples (DC level is quite different from the adjusted waveform) (below)

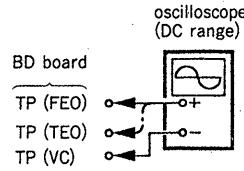

The following is a simple adjustment method.

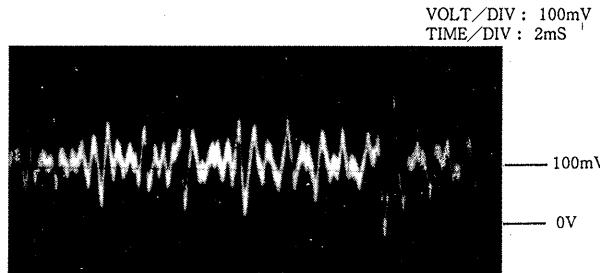

### Simple Adjustment

**Note:** Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the positions after the simple adjustment are only a little different, return the controls to the original position.

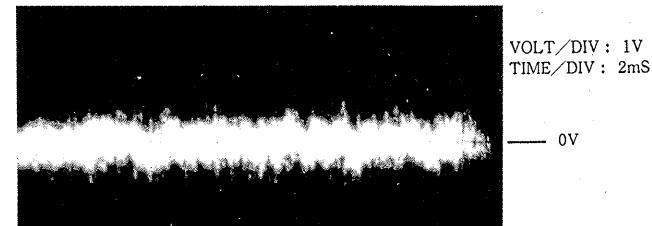

Procedure:

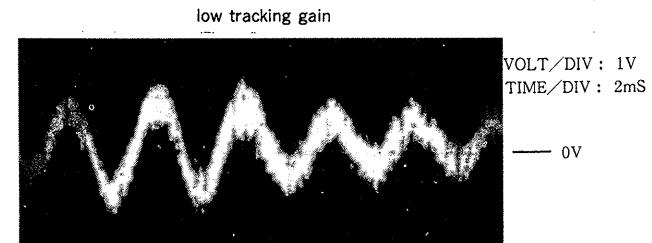

- Keep the set flat.  
If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2 axis device.
- Insert the disc (YEDS-18) and press ▶ PLAY button.
- Connect the oscilloscope to TP (FEO) and TP (VC).
- Adjustment RV102 so that the waveform is as shown in the picture below. (focus gain adjustment)

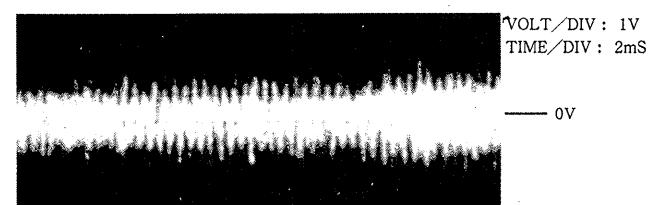

- Connect the oscilloscope to BD BOARD, TP (TEO).
- Adjust RV101 so that the waveform is as shown in the picture below. (tracking gain adjustment)

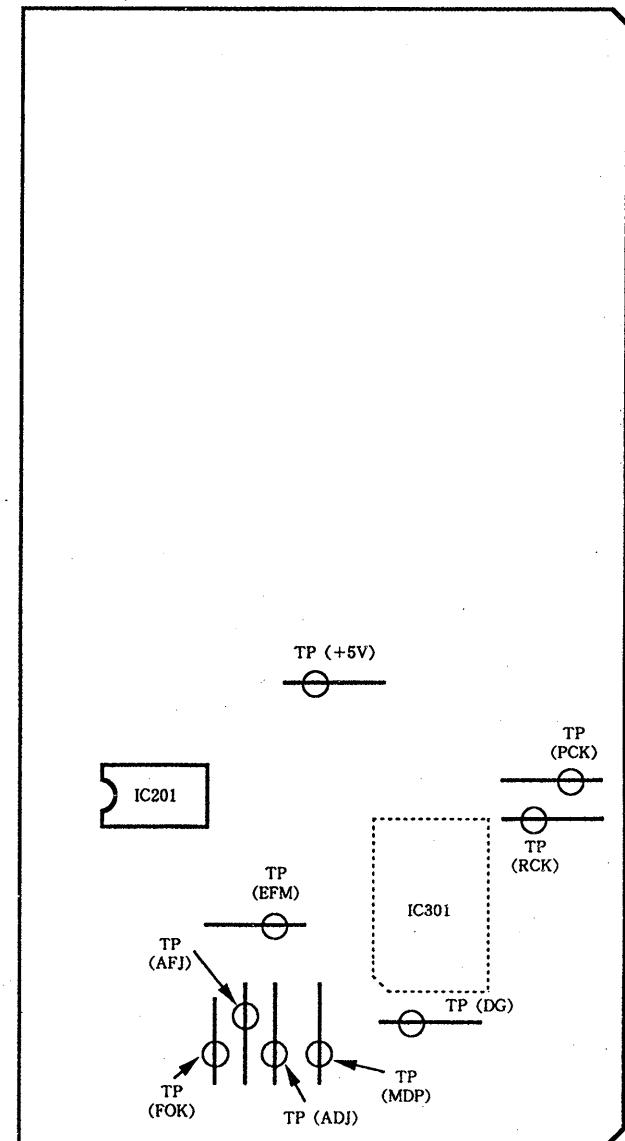

- Incorrect Examples (fundamental wave appears)

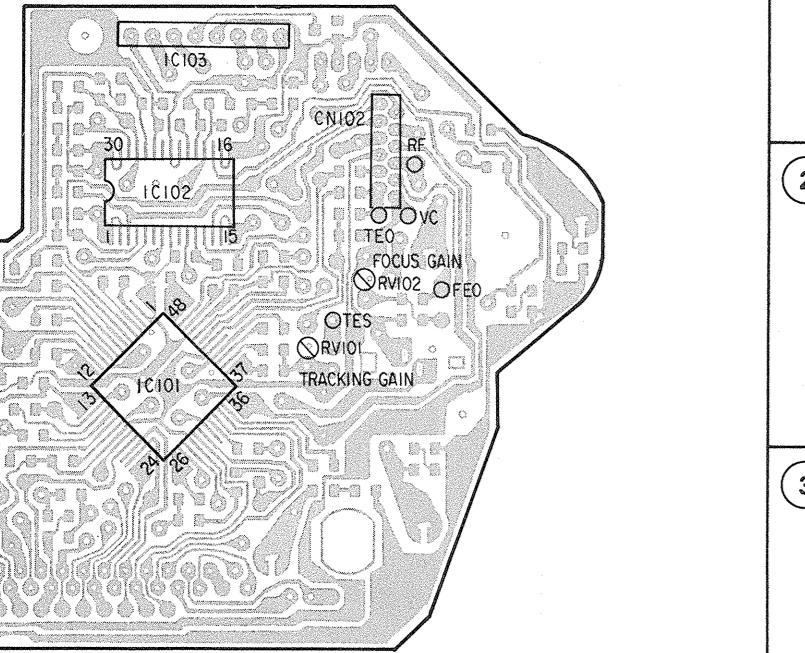

high tracking gain  
(higher frequency of the fundamental wave than above)

### ● Adjustment Location : MAIN BOARD (Component side)

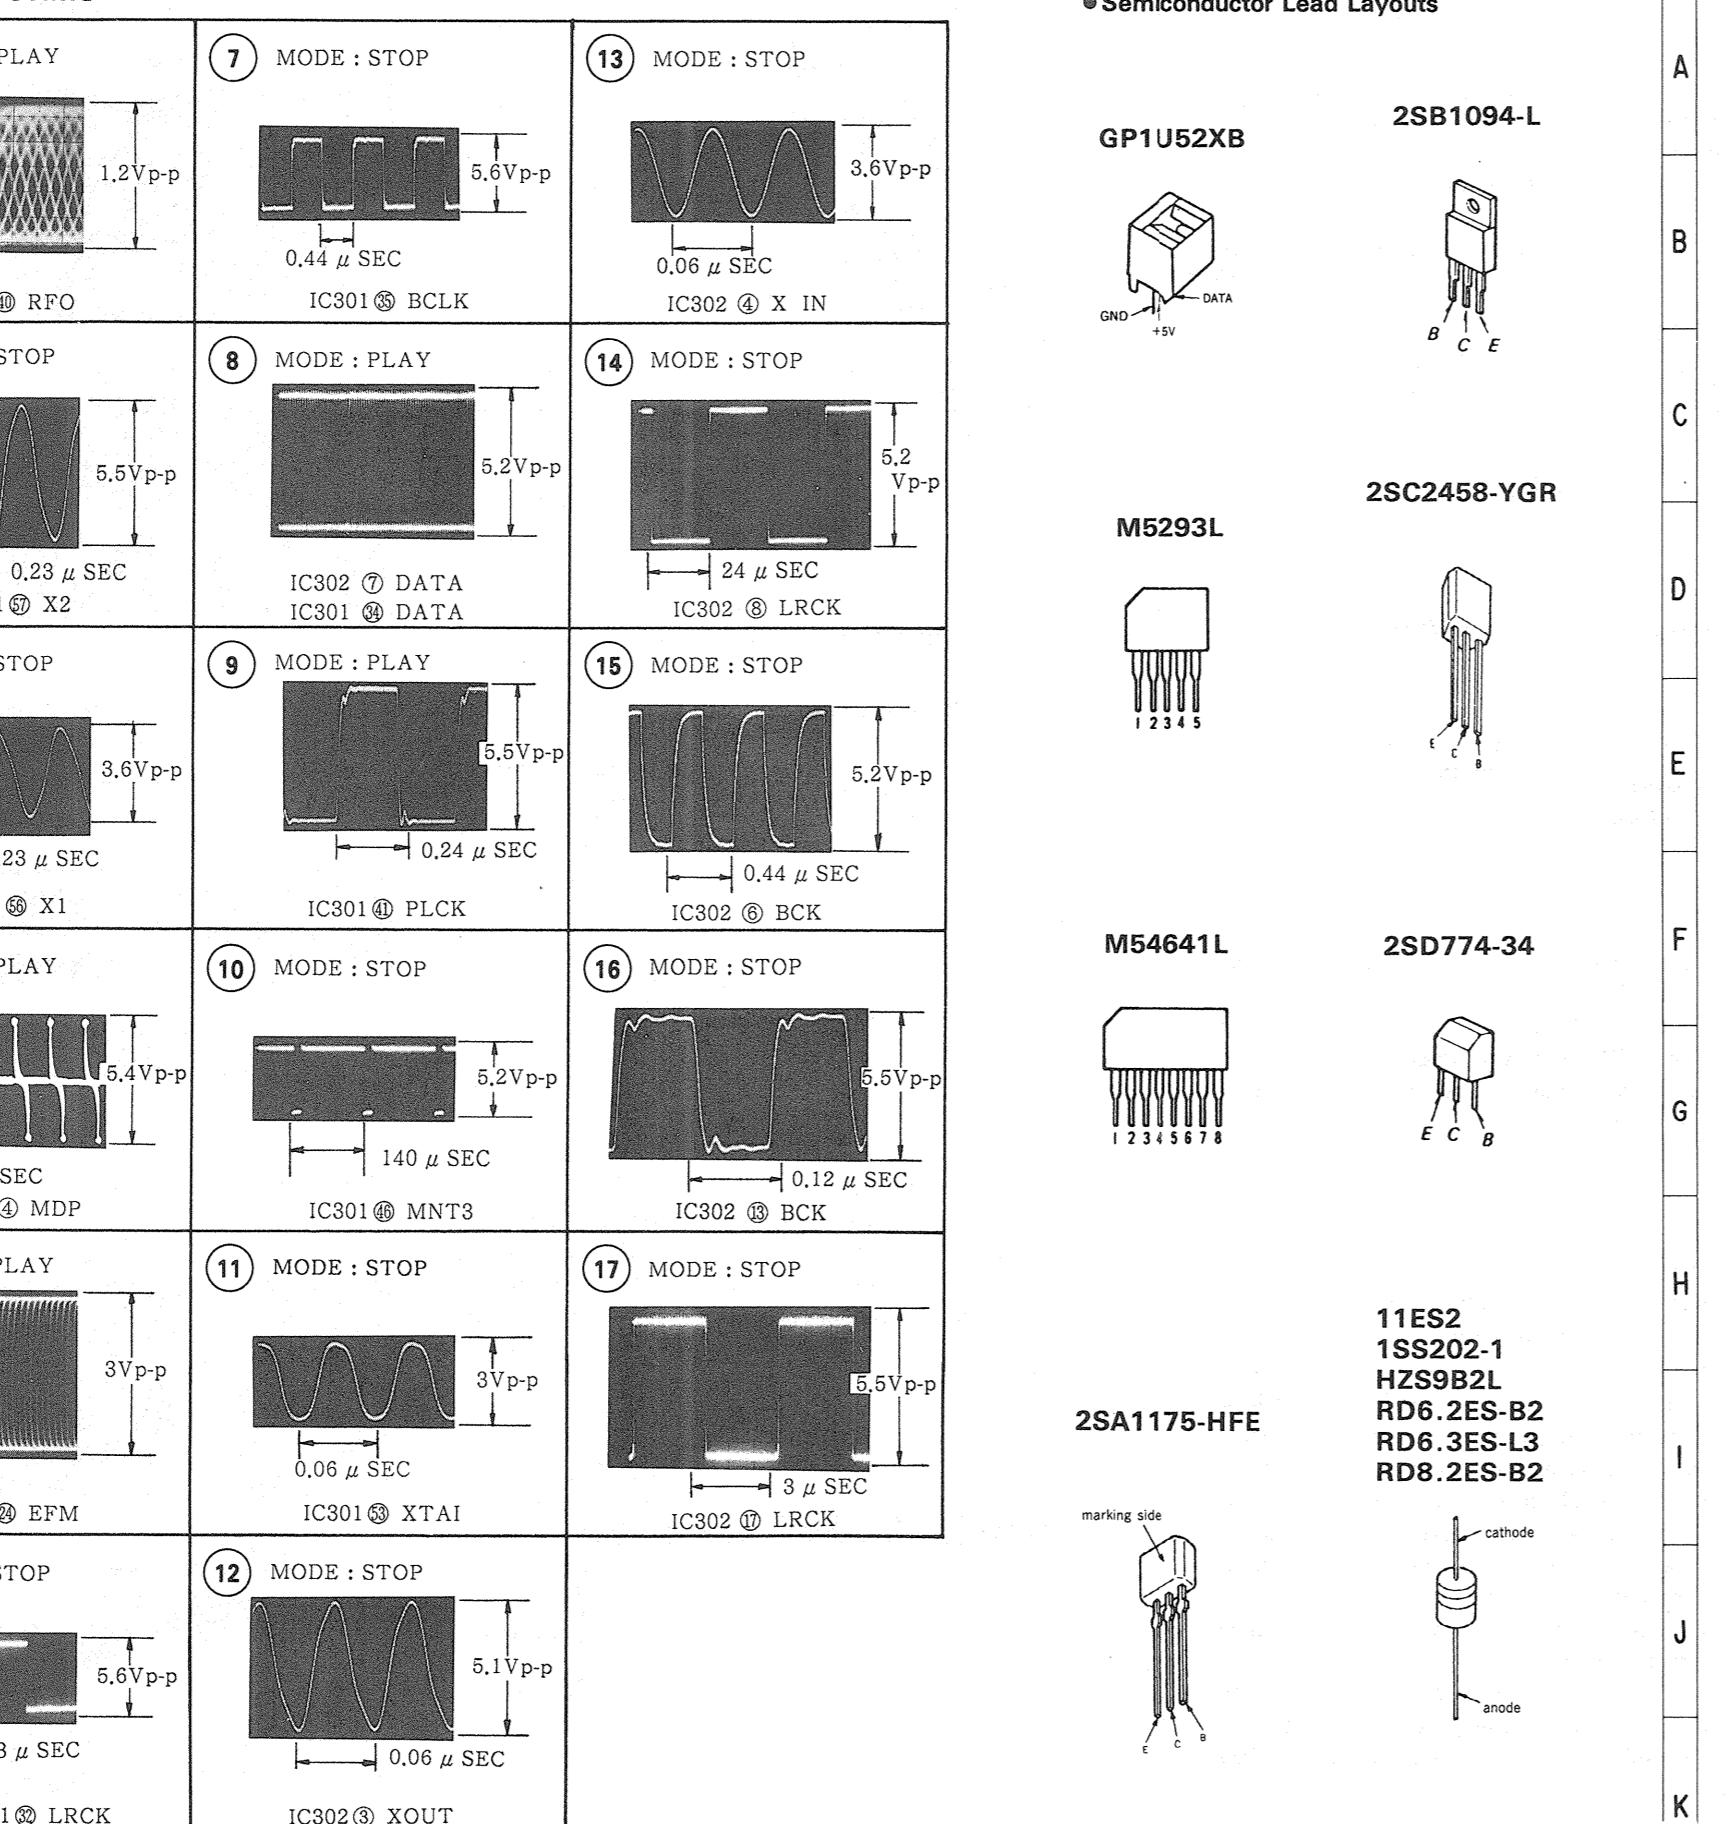

BD BOARD (Component side)

Note:  
 • All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{F}$   
 • 50WV or less are not indicated except for electrolytics and tantalums.  
 • All resistors are in  $\Omega$  and  $1/4\text{W}$  or less unless otherwise specified.  
 • % : indicates tolerance.  
 •  $\Delta$  : internal component.

Note:  
 The components identified by mark  $\Delta$  or dotted line with mark  $\Delta$  are critical for safety. Replace only with part number specified.

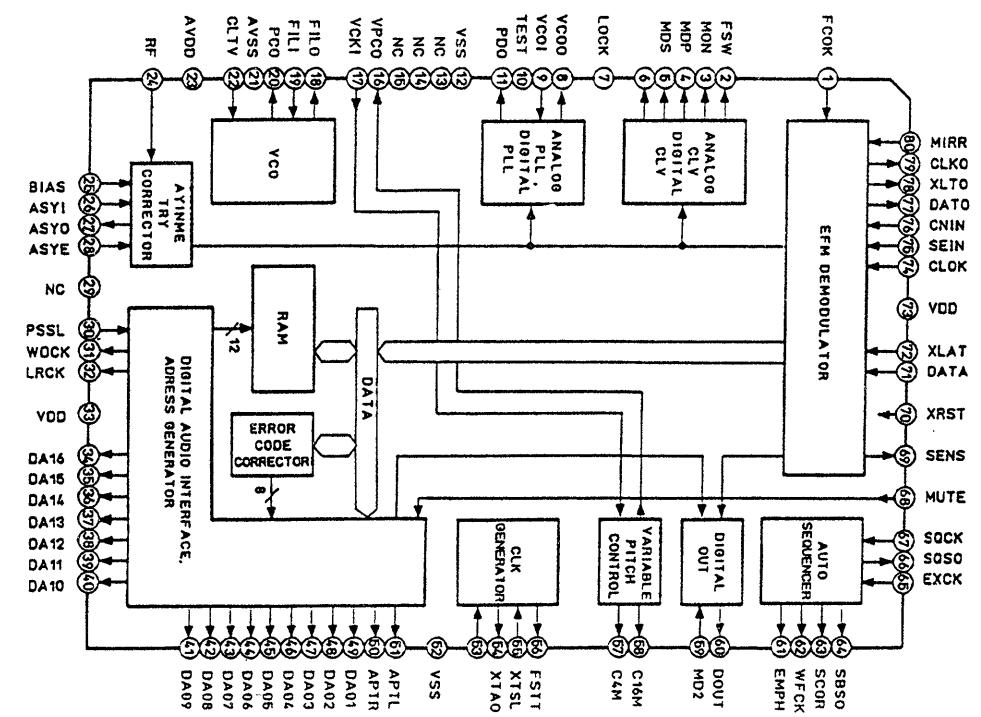

- : B+ Line
- : B- Line
- : adjustment for repair.
- : Voltage and waveforms are dc with respect to ground under no-signal (detuned) conditions.
- no mark : STOP
- : Voltages are taken with a VOM (Input Impedance 10M $\Omega$ ). Voltage variations may be noted due to normal production tolerances.
- : Waveforms are taken with an oscilloscope. Voltage variations may be noted due to normal production tolerances.
- : Circled numbers refer to waveforms.
- : Signal path.
- : CD

## SECTION 6 EXPLODED VIEWS

**NOTE:**

- The mechanical parts with no reference number in the exploded views are not supplied.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

- Due to standardization, parts with part number suffix -XX and -X may be different from the parts specified in the components used on the set.

- Color Indication of Appearance Parts Example:

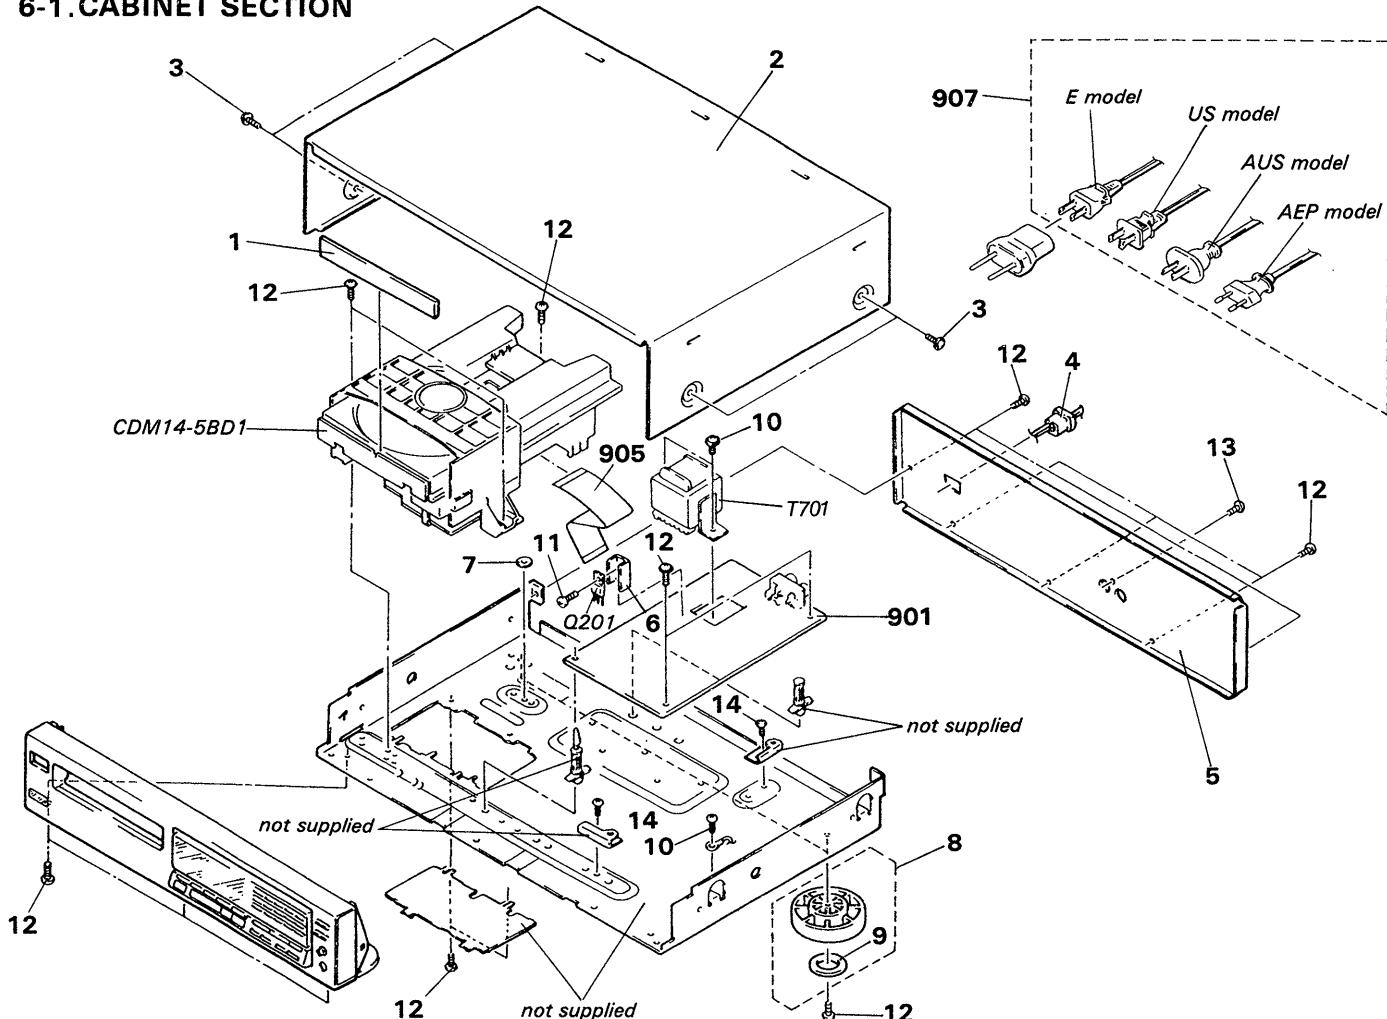

(RED) ... KNOB, BALANCE (WHITE)  
 ↑    ↑  
 Cabinet's Color                                  Parts' Color

The components identified by mark or dotted line with mark are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque sont critiques pour la sécurité.

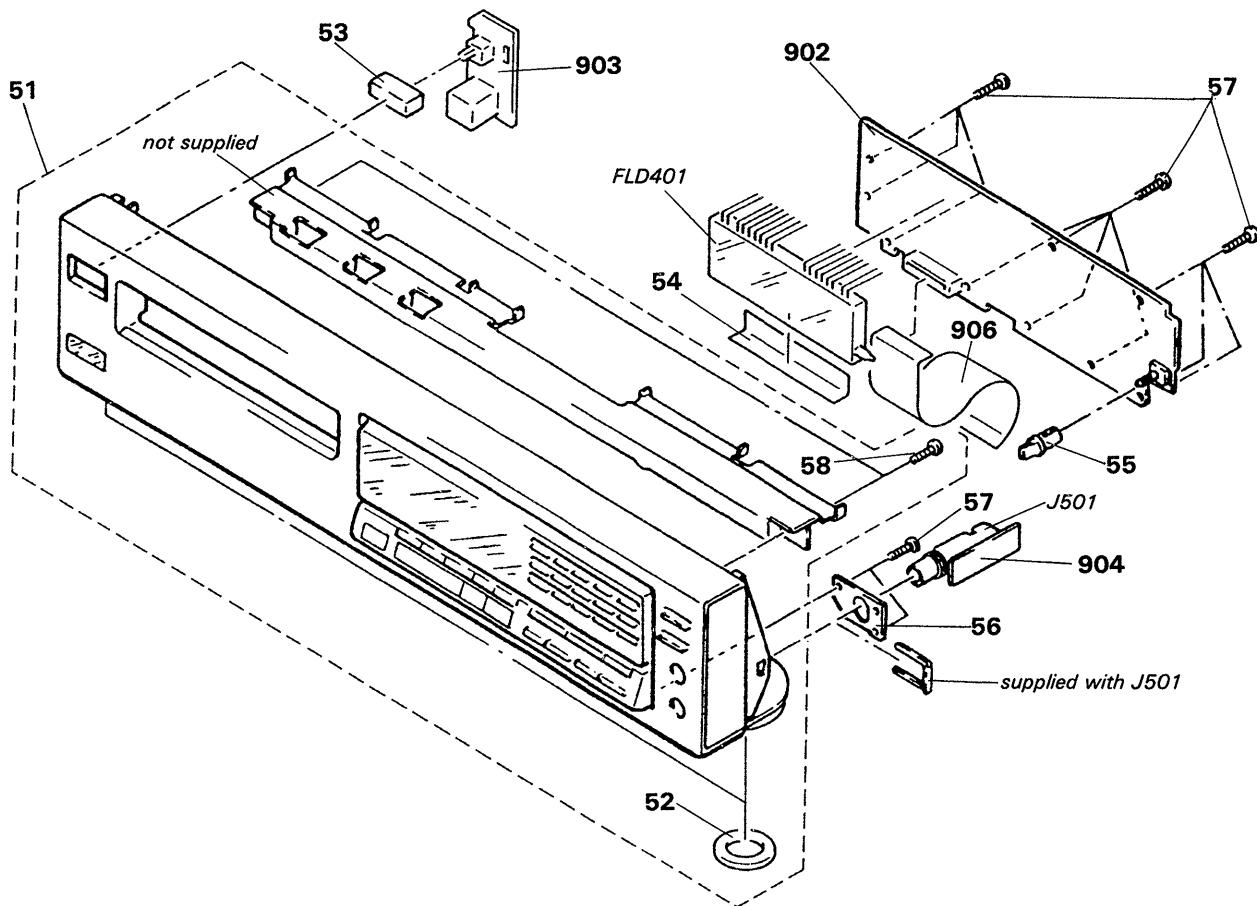

Ne les remplacer que par une pièce portant le numéro spécifié.

## SECTION 7

### ELECTRICAL PARTS LIST

**NOTE:**

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked “★” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

**CAPACITORS:**MF:  $\mu$ F, PF:  $\mu\mu$ F.**RESISTORS**

- All resistors are in ohms.
- F: nonflammable

**COILS**

- MMH: mH, UH:  $\mu$ H

**SEMICONDUCTORS**

In each case, U:  $\mu$ , for example:  
 UA...:  $\mu$ A..., UPA...:  $\mu$ PA...,  
 UPC...:  $\mu$ PC, UPD...:  $\mu$ PD...

The components identified by mark or dotted line with mark are critical for safety.  
 Replace only with part number specified.

Les composants identifiés par une marque sont critiques pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.

**Note:**  
The components identified by mark or dotted line with mark are critical for safety.  
Replace only with part number specified.

**Note:**  
Les composants identifiés par une marque sont critiques pour la sécurité.  
Ne les remplacer que par une pièce portant le numéro spécifié.

# CDP-590

## SONY® SERVICE MANUAL

AEP Model  
UK Model

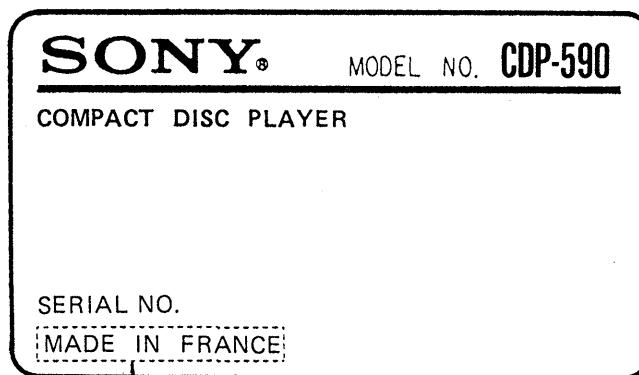

### SUPPLEMENT-1

File this supplement with the service manual.

- Addition of UK Model.
- This SUPPLEMENT-1 is for CDP-590(AEP and UK model) made in France.

Refer to the CDP-590 service manual for related information not contained in this SUPPLEMENT-1.

#### [MODEL IDENTIFICATION]

LABEL MODEL NUMBER

Identify the set with the indication of "MADE IN FRANCE" here.

## MODEL IDENTIFICATIONS

—Specition Label—

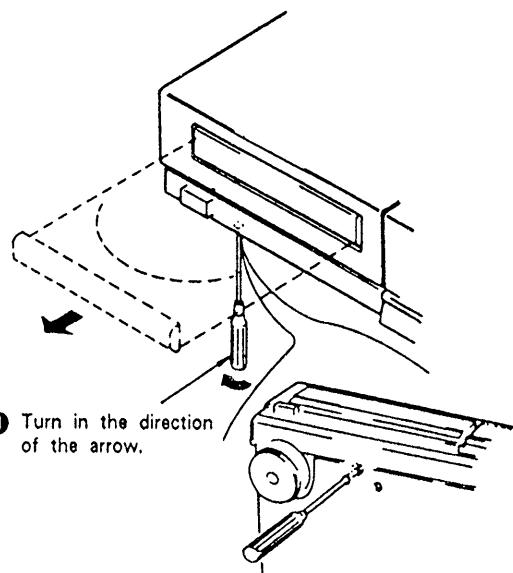

AEP model:

UK model:

## HOW TO OPEN THE DISC TRAY WHEN POWER SWITCH TURNS OFF

Caution : When you work, keep the set horizontal.

## NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body. During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts. The flexible board is easily damaged and should be handled with care.

## NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe more than 25cm away from the objective lens.

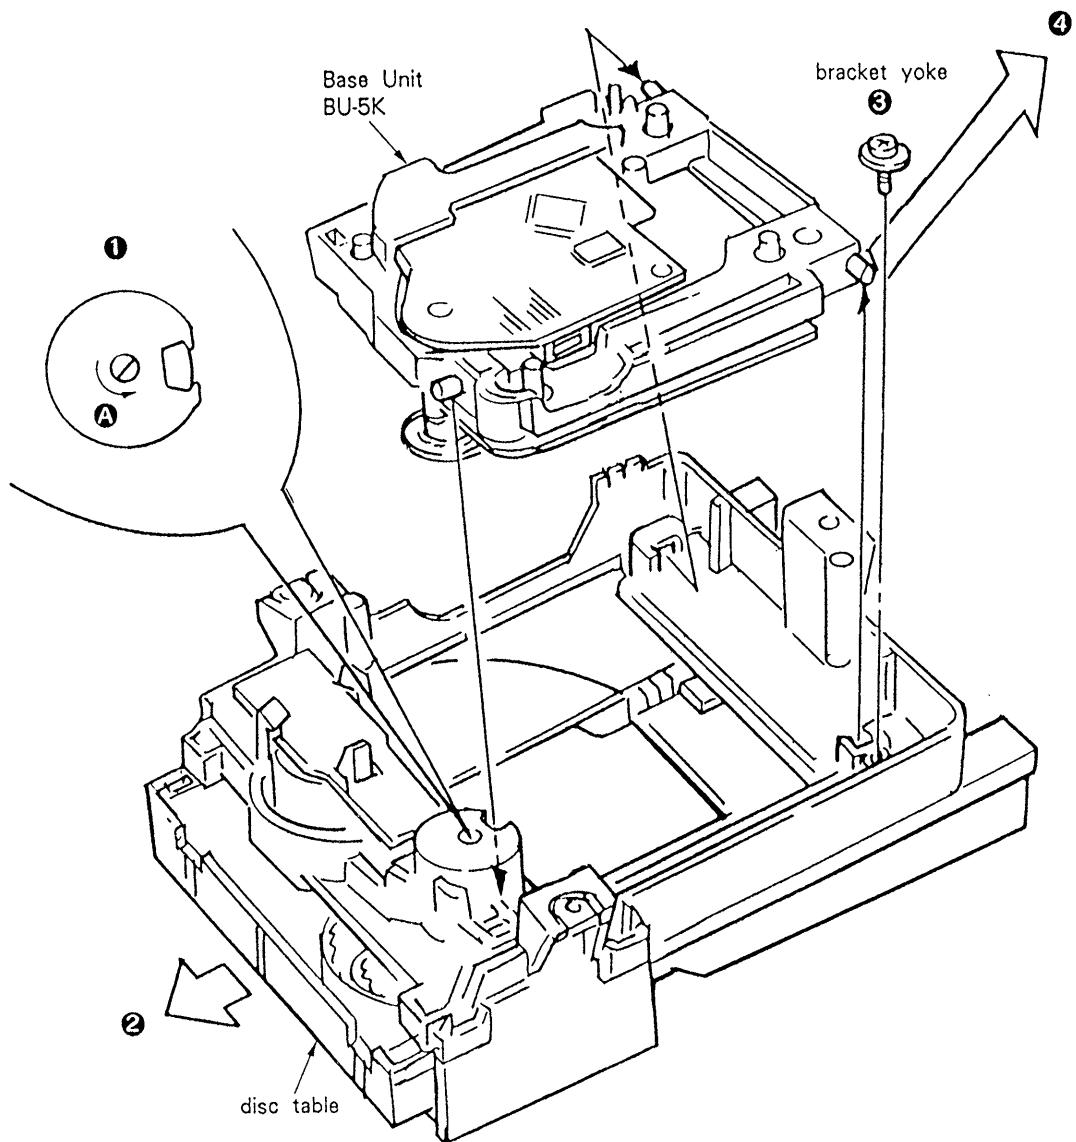

## SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK OR DOTTED LINE WITH MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

## SECTION 1 DISSASSEMBLY OF BASE UNIT

Note: Follow the disassembly procedure in the numerical order given.

1. Remove CD' mechanism from the set and turn over.
2. Turn the cam in the Arrow **A** direction by the **●** driver.
3. Take out disc table.
4. Remove bracket yoke.
5. Remove BU-5K in the Arrow **④** direction.

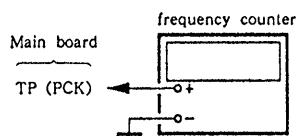

## SECTION 2

### ELECTRICAL ADJUSTMENTS

1. Perform adjustments in the order given.
2. Use YEDS-18 (Part No : 3-702-101-1) disc unless otherwise indicated.
3. Use the oscilloscope with more than  $10 \text{ M}\Omega$  impedance.

#### RF PLL Frequency Adjustment/Lock Frequency Check

**Procedure :**

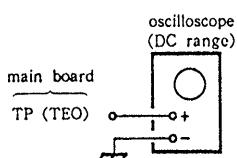

1. Connect test point TP (ASY) to ground with lead wire.
2. Turn POWER switch on.
3. Connect the frequency counter to test point TP (PCK).
4. Adjust RV201 so that the reading on frequency counter is  $4.3218 \text{ MHz} \pm 30 \text{ KHz}$ .
- .....(RF PLL frequency adjustment)
5. Remove lead wire connecting TP (ASY) to ground.
6. Set disc (YEDS-18) and press  $\triangleright$  PLAY button.
7. Confirm that the reading on frequency counter is  $4.3218 \text{ MHz}$ .
- .....(Lock frequency check)
8. Turn POWER switch off.

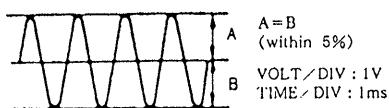

#### E-F Balance Adjustment

This adjustment should be made when replacing TOP (T-type Optical Pick-up).

**Procedure :**

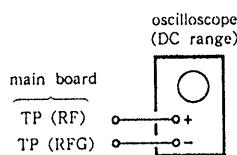

1. Connect test point TP (ADJ) to ground and TP (TES) to TP (VC) with lead wire.
2. Connect oscilloscope to test point TP (TEO).
3. Set disc (YEDS-18) and turn POWER switch on.
4. Adjust RV101 so that the traverse waveform is symmetrical above and below.
5. Turn POWER switch off.
6. After adjustment, remove the lead wire connected in step 1.

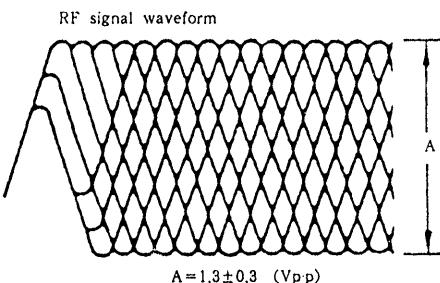

#### Focus Bias Adjustment

This adjustment should be made when replacing TOP (T-type Optical Pick-up).

**Procedure :**

1. Connect oscilloscope to test point TP (RF) and test point TP (RFG).
2. Set disc (YEDS-18) and turn POWER switch on.
3. Adjust RV102 for an optimum waveform eye pattern or so that the peak is maximum. Optimum eye pattern means that shape "◇" can be clearly distinguished at the center of the waveform.
4. Turn POWER switch off.

#### REFERENCE

##### Focus/Tracking Gain Adjustments

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow up (vertical and horizontal) relative to mechanical noise and shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

Gain Symptoms	Focus	Tracking
• The time until music starts becomes longer for ■STOP $\rightarrow$ $\triangleright$ PLAY or automatic selection. (■ $\blacktriangleleft$ , ■ $\blacktriangleright$ buttons pressed.) (Normally takes about 1 seconds.)	low	low or high
• Music does not start and disc continues to rotate for ■STOP $\rightarrow$ $\triangleright$ PLAY or automatic selection. (■ $\blacktriangleleft$ , ■ $\blacktriangleright$ buttons pressed.)	-	low
• Sound is interrupted during PLAY or time counter display stops progressing.	-	low
• More noise during 2-axis device operation.	high	high

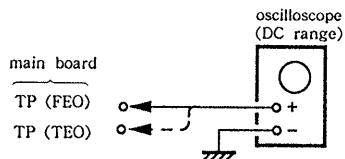

The following is a simple adjustment method.

#### -Primary Adjustment-

**Note :** Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment.

If the position after the primary adjustment are only a little different, return the controls to the original position.

#### Procedure :

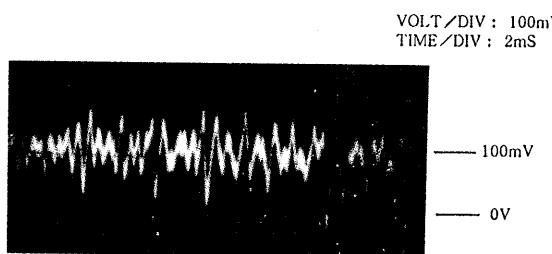

1. Keep the set horizontal.

If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2-axis device.

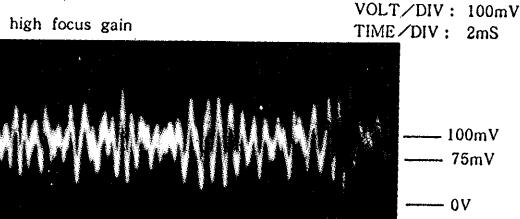

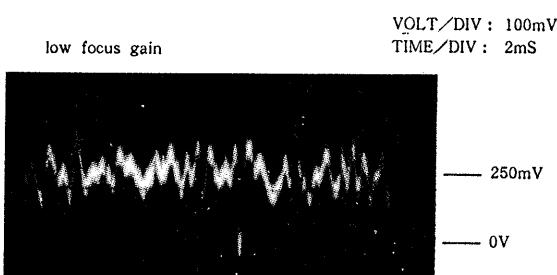

2. Set disc (YEDS-18) and turn POWER switch on.

3. Connect oscilloscope to main amp board TP.

4. Adjust RV103 so that the waveform is as shown in the figure below. (focus gain adjustment)

• Incorrect Examples (DC level changes more than on adjusted waveform)

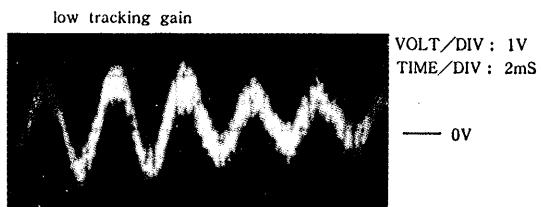

5. Connect oscilloscope to main board TP (TEO).

6. Adjust RV104 so that the waveform is as shown in the figure below. (tracking gain adjustment)

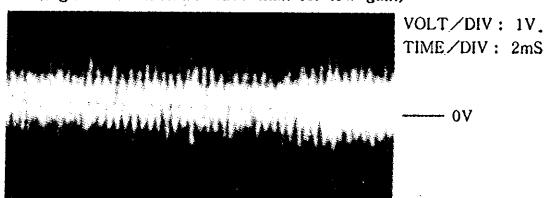

7. Turn POWER switch off.

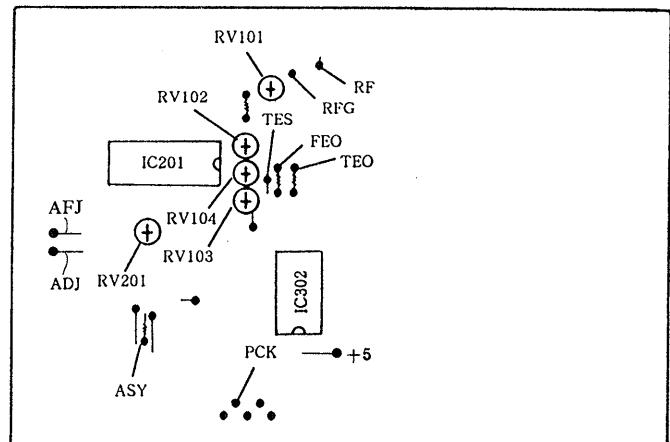

• Incorrect Examples (fundamental wave appears)

high tracking gain  
(higher fundamental wave than for low gain)

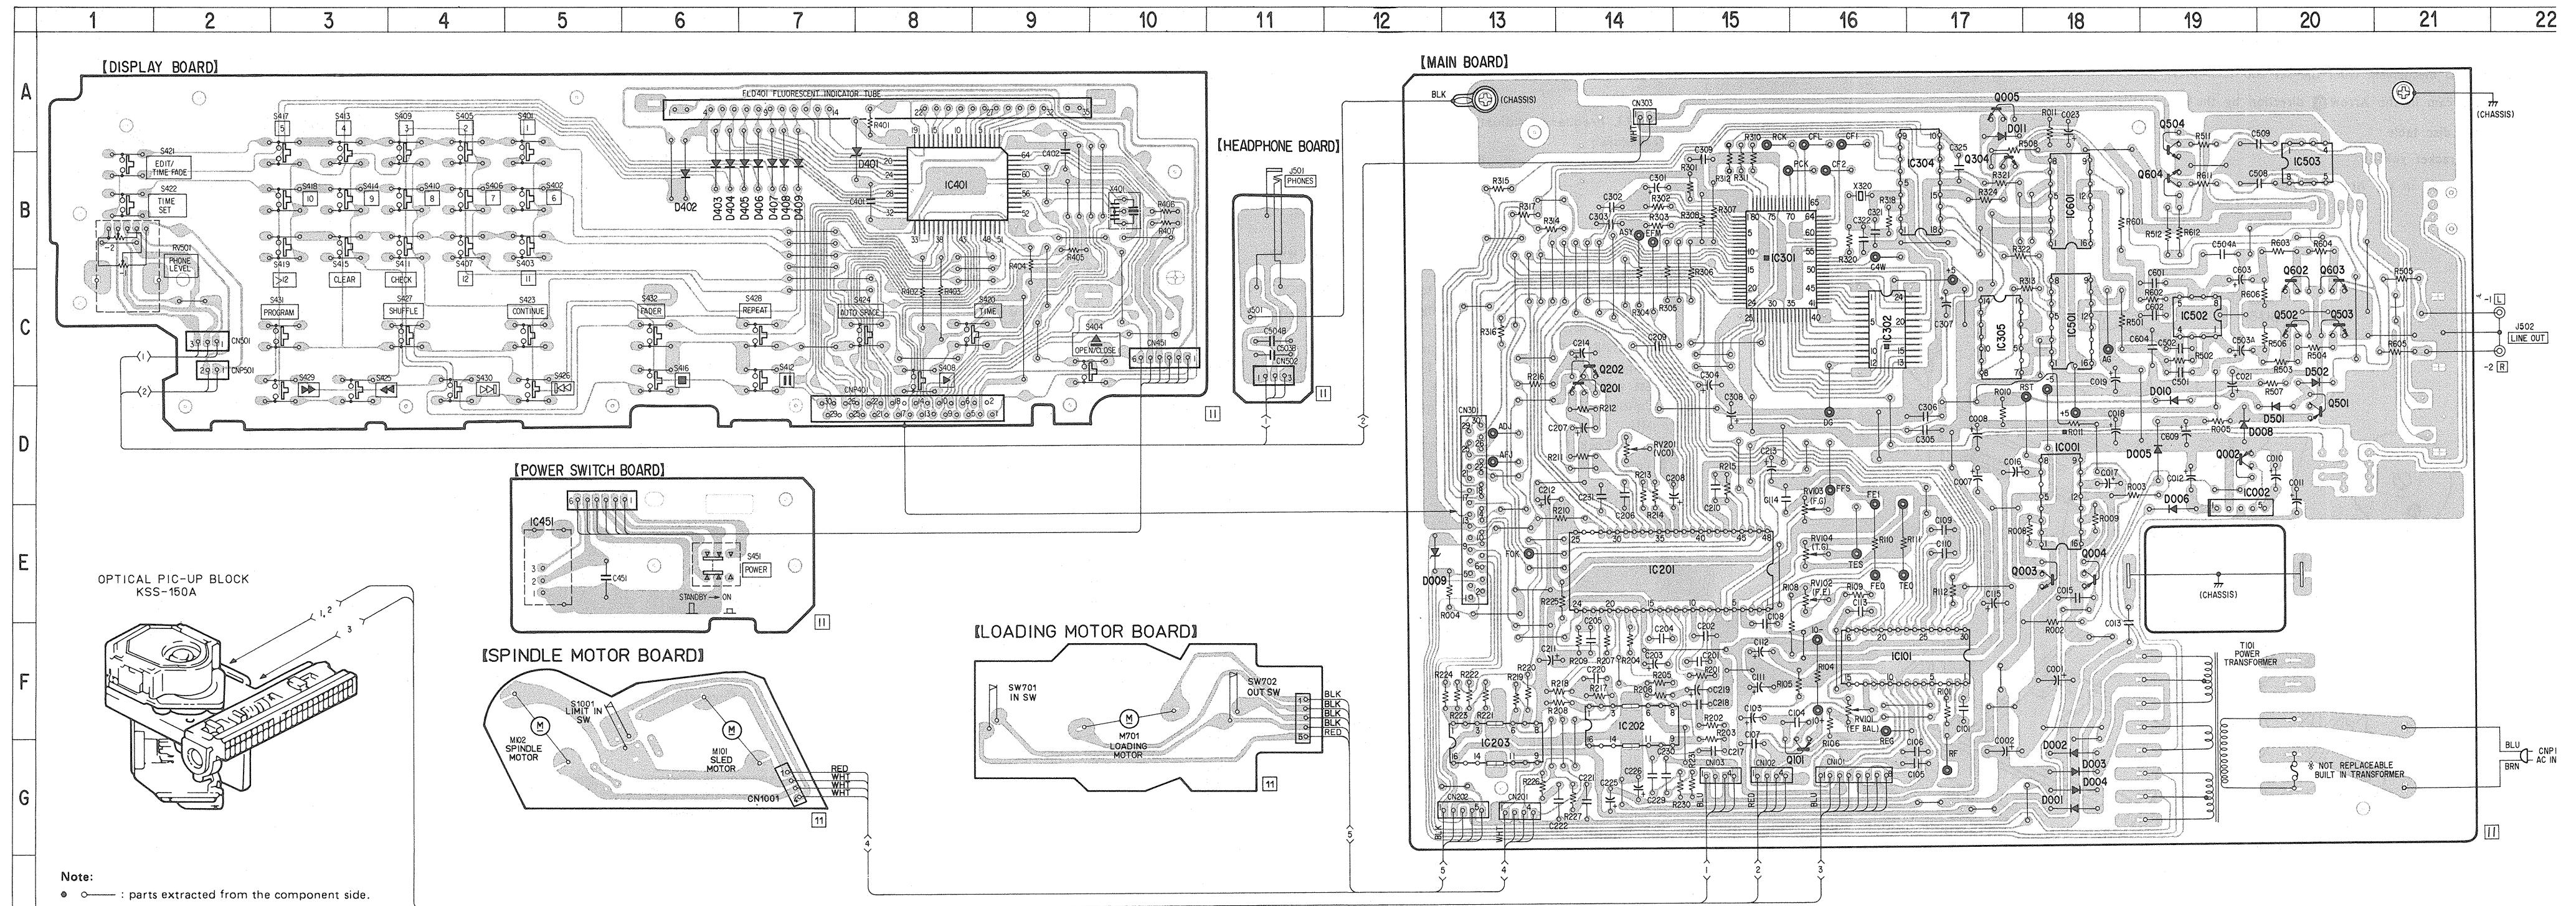

Adjustment Location : main board -component side-

				IC401					

Note

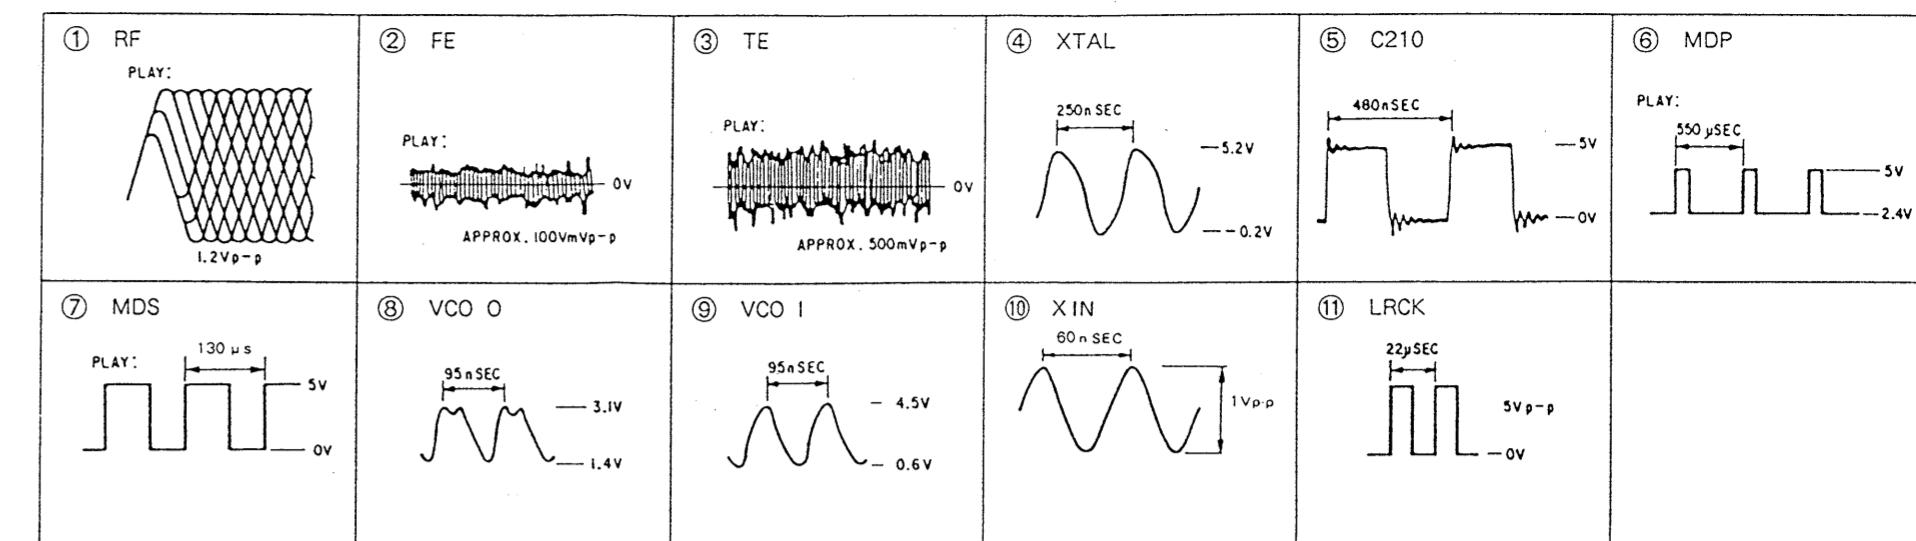

- All capacitors are in  $\mu$  F unless otherwise noted. pF :  $\mu$   $\mu$  F  
50WV or less are not indicated except for electrolytics and tantalums.
  - All resistors are in  $\Omega$  and  $1\frac{1}{2}$ W or less unless otherwise specified.
  - $\Delta$  : internal component.
  - **B+** : B+ Line
  - **B-** : B- Line
  - : adjustment for repair.

**Note:** The components identified by mark  or dotted line with mark  are critical for safety.  
Replace only with part number specified.

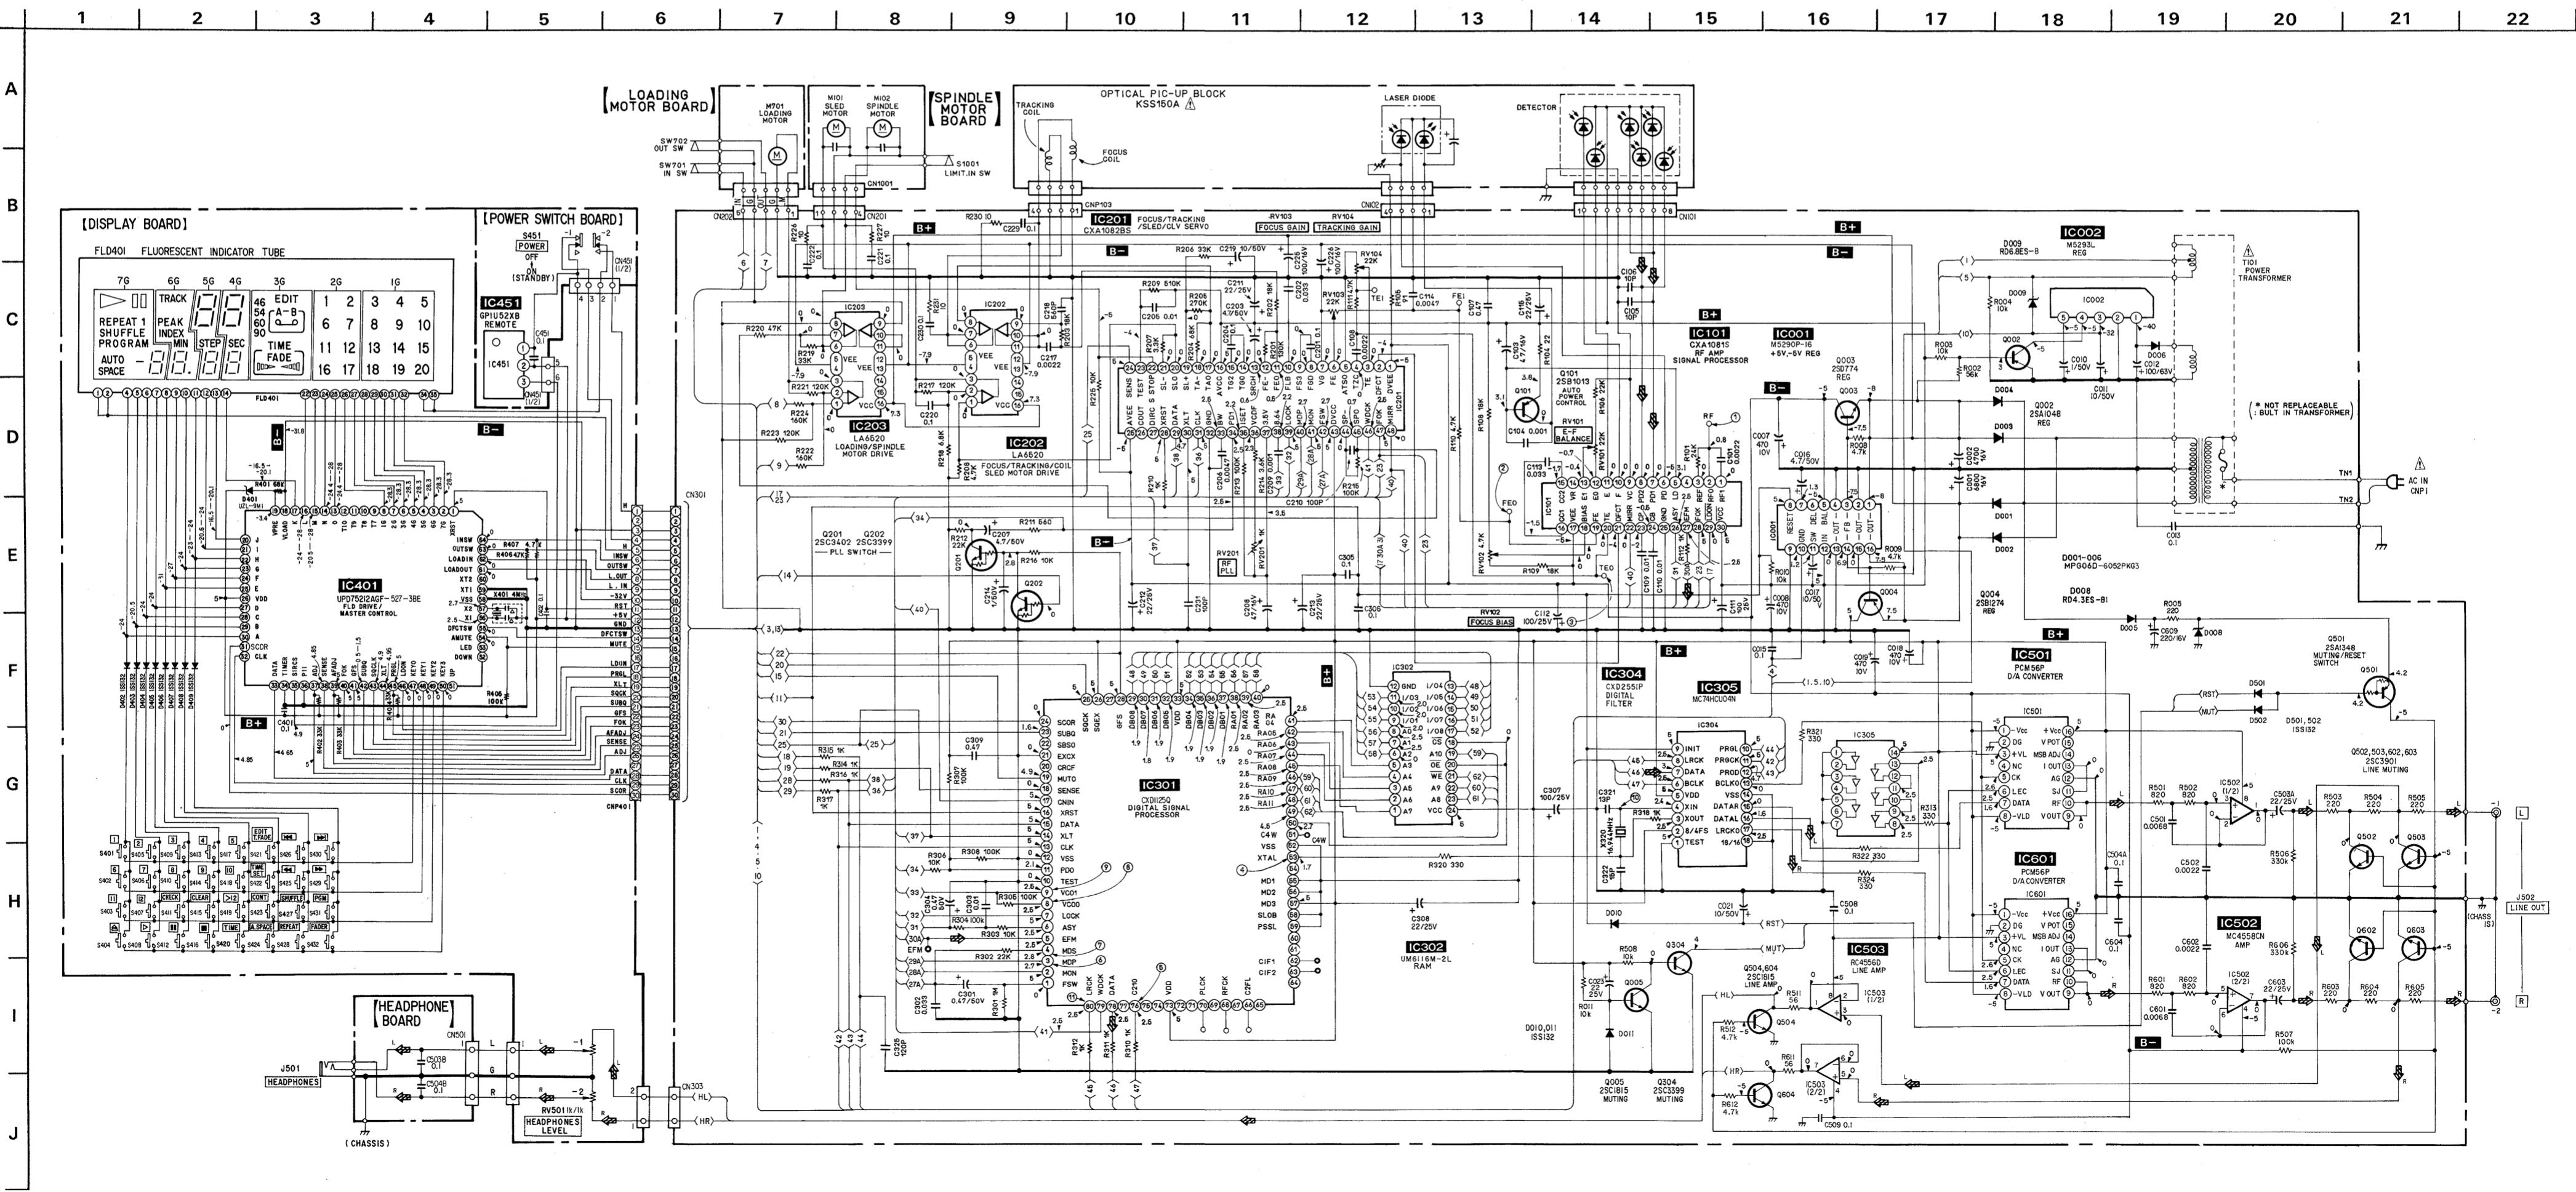

- Voltage and waveforms are dc with respect to ground under no-signal conditions.
- no mark : PLAY
- Voltages are taken with a VOM (input impedance 10MΩ).  
Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with a oscilloscope.  
Voltage variations may be noted due to normal production tolerances.
- Circled numbers refer to waveforms.
- Signal path.

## SECTION 4 EXPLODED VIEWS

**NOTE:**

- The mechanical parts with no reference number in the exploded views are not supplied.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked “★” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

- Due to standardization, parts with part number suffix -XX and -X may be different from the parts specified in the components used on the set.

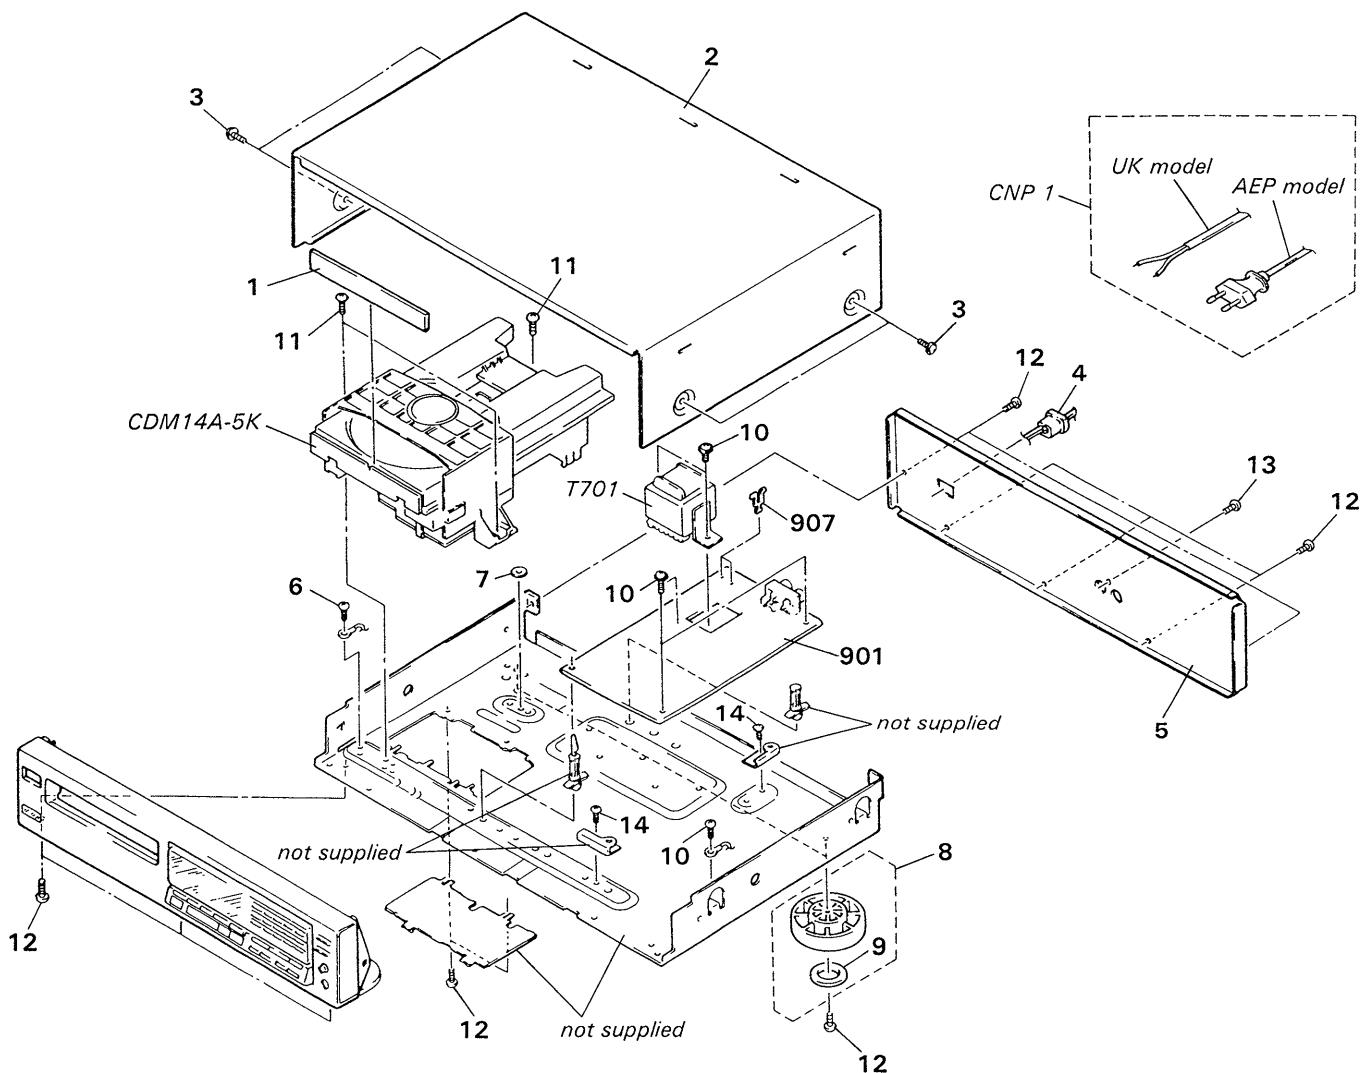

- Color Indication of Appearance Parts Example:

(RED) ... KNOB, BALANCE (WHITE)  
 ↑   ↑  
 Cabinet's Color                          Parts' Color

The components identified by mark or dotted line with mark are critical for safety. Replace only with part number specified.

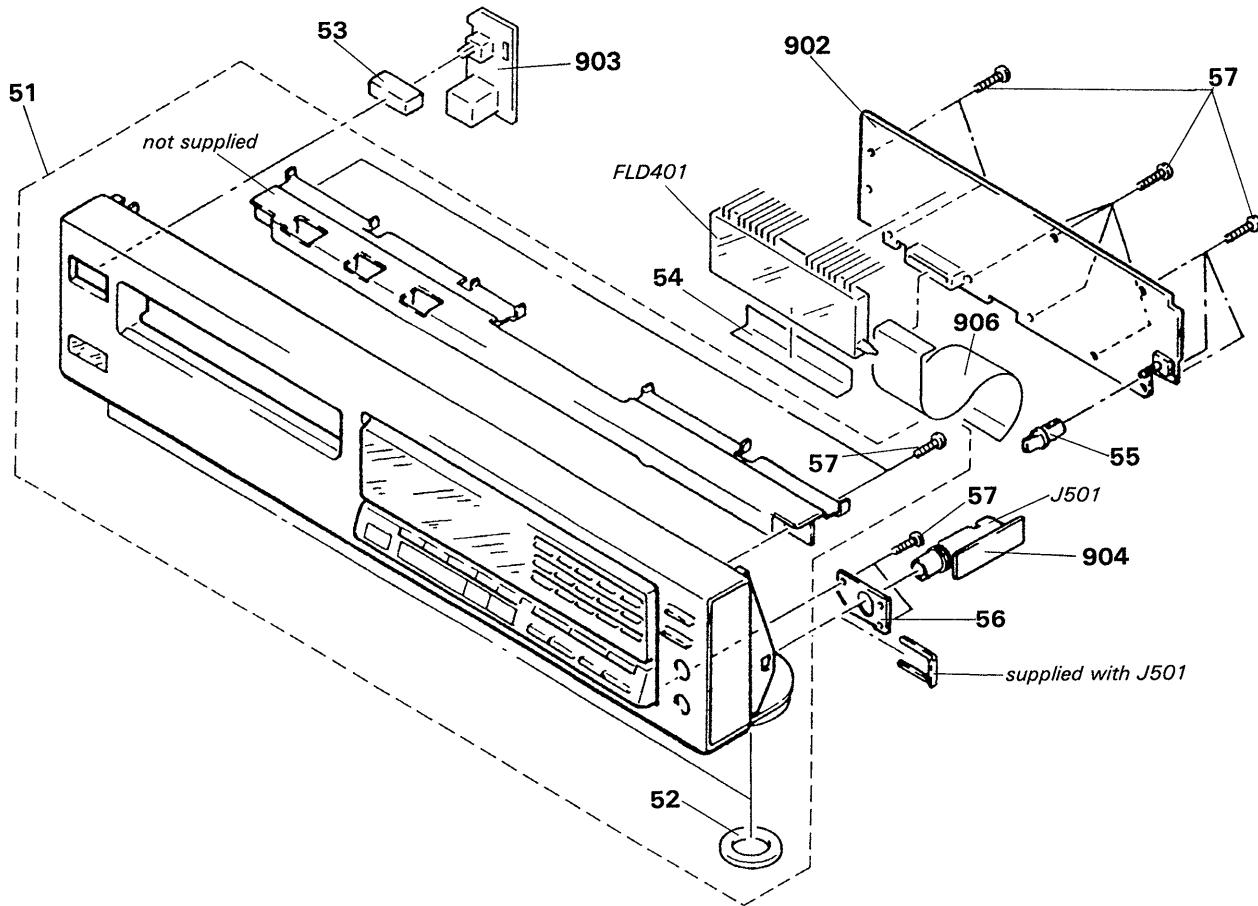

Les composants identifiés par une marque sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

## SECTION 5

### ELECTRICAL PARTS LIST

**NOTE:**

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked “★” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

**CAPACITORS:**  
MF:  $\mu$ F, PF:  $\mu\mu$ F.**RESISTORS**

- All resistors are in ohms.
- F: nonflammable

**COILS**

- MMH: mH, UH:  $\mu$ H

**SEMICONDUCTORS**

In each case, U:  $\mu$ , for example:  
 UA...:  $\mu$ A..., UPA...:  $\mu$ PA...,  
 UPC...:  $\mu$ PC, UPD...:  $\mu$ PD...

The components identified by mark  or dotted line with mark  are critical for safety.  
 Replace only with part number specified.
