### INTRODUCTION

This service manual describes the latest service information for the IC-12GAT/GE 1200MHz FM TRANSCEIVER at the time of going to press.

This service manual covers both the IC-12GAT and IC-12GE.

### SECTION 3 ADJUSTMENT PROCEDURES

#### 3-1 PREPARATION BEFORE SERVICING

#### **REPAIR NOTE**

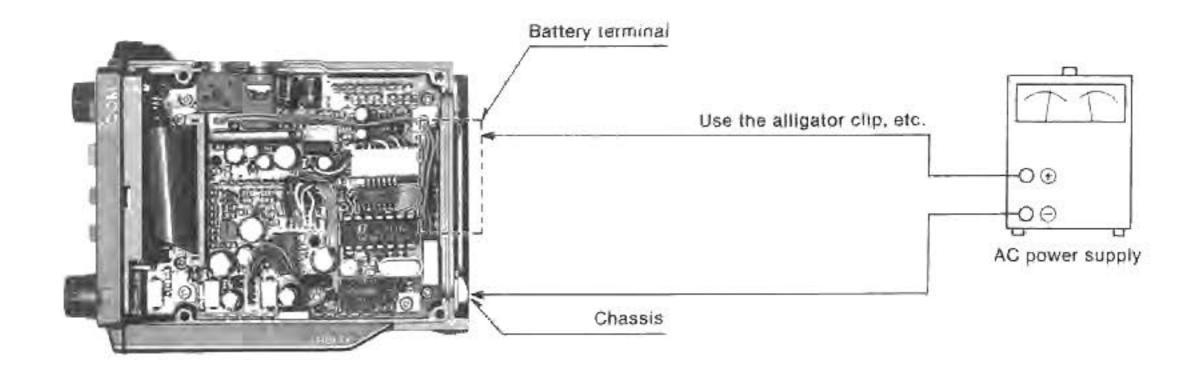

- 1. Make sure a problem is internal before disassembling the transceiver.
- 2. **DO NOT** open the transceiver until the transceiver is disconnected from a power source.
- 3. **DO NOT** force any of the variable components. Turn them slowly and smoothly.
- DO NOT short any circuits or electronic parts.
   An insulated tuning tool MUST be used for all adjustments.
- 5. **DO NOT** keep power ON for a long time when the transceiver is defective.
- 6. **DO NOT** transmit power into a signal generator or a sweep generator.

- ALWAYS connect a 30 dB~40 dB attenuator between the transceiver and a deviation meter or spectrum analyzer when using such test equipment.
- 8. **READ** the instructions of test equipment thoroughly before connecting equipment to the transceiver.
- There are different versions of this transceiver.
   Adjustment procedures and results may differ
   for each version. Be sure to follow the correct
   procedure for the transceiver you adjust.
