**Programma di regolazione
dell'orologio LCD**

**Instelprogramma
voor de LCD-klok**

After fitting or changing the batteries, arbitrary numbers appear.

```
10:23 08
```

FUNCT. ⊂⊃ ⊂⊃ SELECT.

| FUNCT.	Function selection (time/date) Entry of data
SELECT.	Selecting the position, which has to be set
⊂⊃	Press the button as long (indication advances in 1/2 second rhythm), or as often, until the desired indication is reached.
⊂ X ⊃	Press once
1 2̈	Indication blinks in 1/2 second rhythm

Setting the clock time

FUNCT. S 1	SELECT. S 2	Indication	Explanation
——	——	10:25 08	Initial state: arbitrary time indication
——	⊂ X ⊃	10:25 10	Ready for setting the hours
⊂⊃	——	22:25 35	Setting hours, clock function not interrupted
——	⊂ X ⊃	22:25 40	Ready for setting the minutes, clock function not interrupted
⊂⊃	——	22:06 00	Setting minutes, clock function interrupted, seconds at zero
——	⊂ X ⊃	22:06 00	Setting process concluded, clock function started, indication, "time" 1)

Setting the date (week-day, calendar day, month) (German week-day letters)

FUNCT. S 1	SELECT. S 2	Indication	Explanation
——	——	22:06 30	Initial state: "time"
⊂ X ⊃	——	MO 8 2	Indication: date
——	⊂ X ⊃	MO 8 2	Ready for setting the week-day
⊂⊃	——	DO 8 2	Setting week-day
——	⊂ X ⊃	DO 8 2	Ready for setting the calendar day
⊂⊃	——	DO 12 2	Setting calendar day
——	⊂ X ⊃	DO 12 2	Ready for setting the month
⊂⊃	——	DO 12 11	Setting month
——	⊂ X ⊃	DO 12 11	Setting concluded, indication "date". Changes after approx. 30 secs. back to indication "time". 2)

1) By actuating the "SELECT." button after the minutes have been set it is possible to start the clock **exactly to the second** (e. g. by means of radio or TV time check).

2) If the indication "time" is desired at once, then the "FUNCT." button must be pressed **4 times.**
The appearing symbols have no function in this unit.

Attention: After adjustment has been completed, the "SELECT." button must be pressed repeatedly until no sign is blinking.
