

The schematic diagram illustrates the internal components and wiring of the TS-240FM radio. Key sections include:

- Power Supply:** Features a 250V 100mA transformer, a 500V 100mA capacitor, and a 500V 100mA capacitor. It includes a 500V 100mA capacitor and a 500V 100mA capacitor.
- RF Section:** Includes a 7000V 100mA tube, a 7000V 100mA tube, and a 7000V 100mA tube.
- Audio Section:** Features a 6X4 tube, a 6X4 tube, and a 6X4 tube.
- Power Output Section:** Includes a 6X4 tube, a 6X4 tube, and a 6X4 tube.
- Channel Switch:** A 500V 100mA switch.
- Display Code Switch:** A 500V 100mA switch.
- 7-Segment LED Display:** A 7-segment LED display.

The diagram is labeled with various components like resistors, capacitors, and tubes, and includes a parts list at the bottom right.
