

Date: 4/5/02	Project #: 512	Project Engineer: Robert Boatright	ECN # 2047
Product:	dbx PA	Reason For Change: ECN number #2036 called for the wrong capacitor (60-0055) to be installed. It was too tall and 60-0201 should be used instead. Rather than have (3) 100uF capacitors of one type and (1) of the other, all (4) 100uF caps will be changed to 60-0201.	
Assy. Name:	dbxPA Main PCB Assy		
Assy. Number:	05-1790		
Revision: A2	To: A3		

Instructions:
Install 100uF cap (60-0201) on front panel PCB at location P1. Install positive lead of cap to P1 pin 1; install negative lead of cap to P1 pin 3.

In schematic, change capacitors C79-C81 and P1 to 60-0201.
