

**Fender®**

**PASSPORT® PD-150 PLUS**

(This is the model name for warranty claims)

p/n 069-3005-000

# SERVICE MANUAL

**ATTENTION:**  
**WARRANTY SERVICE PROCEDURES**

Warranty field service of the Passport PD-150 Plus will be limited to replacement of defective PCB Assemblies and all other parts not marked as “REF” in the Parts List. **Non-Warranty** repairs can of course be to the component level at the Service Center’s discretion. For **non-warranty** component level repairs all parts listed as “REF” in the Parts List must be sourced from suppliers other than FMIC.

# PASSPORT® PD-150 PLUS<sup>2</sup>

## IMPORTANT NOTICE

- Copyright © 2007 FMIC. All rights reserved. All information contained herein is CONFIDENTIAL and PROPRIETARY and is the property of Fender® Musical Instruments Corporation. It is not to be sold or assigned to another party and is disclosed solely for use by Fender Authorized Service Centers for purposes of product service and maintenance. All information is not to be disclosed to others without the expressed permission of Fender® Musical Instruments Corporation. All

specifications are subject to change without notice. This information and any copies produced electronically or otherwise must be surrendered upon demand of Fender® Musical Instruments Corporation.

- Parts marked with two asterisks (\*\*) indicate the required use of that specific part. This is necessary for RELIABILITY and SAFETY requirements.  
**DO NOT USE A SUBSTITUTE!**

## PARTS LIST CODES

The description codes used in the itemized Parts Lists are defined below:

### CAPACITOR CODES

CAP AE	= Aluminum Electrolytic
CAP CA	= Ceramic Axial
CAP CD	= Ceramic Disk
CAP CR	= Ceramic Radial
CAP MPF	= Metalized Polyester Film
CAP MY	= Mylar
CAP PFF	= Polyester Film/Foil

### RESISTOR CODES

RES CC	= Carbon Comp
RES CF	= Carbon Film
RES FP	= Flame Proof
RES MF	= Metal Film
RES MOX	= Metal Oxide
RES WW	= Wire Wound

### HARDWARE CODES

BLX	= Black Oxide
CR	= Chrome Plated
HWH	= Hex Washer Head
M	= Machine Screw
NI	= Nickel Plated
OHP	= Oval Head Phillips
PB	= Particle Board
PHP	= Pan Head Phillips
PHPS	= Pan Head Phillips Sems
SMA	= Sheet Metal "A" Point
SMB	= Sheet Metal "B" Point
SS	= Stainless Steel
TF	= Thread Forming
ZI	= Zinc Plated

# PASSPORT® PD-150 PLUS

## SPECIFICATIONS

Model Name:	PASSPORT PD-150 PLUS
Release Number:	PR688
Part Number:	(120V, 60Hz) US: 069-3005-000 (120V, 60 Hz) DS: 069-3005-900 (240V, 50 Hz) AUS: 069-3005-930 (230V, 50 Hz) UK: 069-3005-940 (230V, 50 Hz) EUR: 069-3005-960 (100V, 50 Hz) JPN: 069-3005-970
Frequency Response:	50 Hz to 20 kHz ± 1 dB (at speaker output) 30 Hz to 20 kHz ± 1 dB (at send output)
Distortion:	< 0.5%, 20 Hz to 20 kHz (at speaker output) < 0.1%, 20 Hz to 20 kHz (at send output)
Signal to Noise Ratio:	> 90 dB, "A" WTD
Power Output:	150W (75W/ch @ 8Ω per channel)
Input Impedance:	"Mic" switch position: 2 kΩ "Line" switch position: 66 kΩ 78 kΩ (Channels 1-2 XLR and 1/4") (Phono and Stereo Channel 1/4")
Max. Input Level:	Mic: -11 dBu Line: 20 dBu Stereo: 26 dBu
Return Input Impedance:	47kΩ
Fuse type:	T3.15AL, 250V
Passport System:	Width: 610 mm (24 in.) Height: 541 mm (18 in.) Depth: 254 mm (10 in.) Weight: 14.97 kgs (33 lbs)
Speakers:	Width: 245 mm (9.65 in.) Height: 439 mm (17.5 in.) Depth: 241 mm (9.5 in.) Weight: 4.08 kgs (9.0 lbs)
Power Tower:	Width: 245 mm (9.65 in.) Height: 451 mm (18 in.) Depth: 178 mm (7 in.) Weight: 6.80 kgs (15.00 lbs)
Tower Footprint:	241 x 298 mm (9.5 x 11.75 in.)
Microphone:	Dynamic Cardioid, balanced
Microphone Cable:	XL-Male to XL-Female, 6 m (20 feet)
Speaker Cables:	1/4 in. to 1/4 in., 9 m (27 feet)

0 dBu is referenced to 0.775 volts rms

*Product specifications are subject to change without notice*

## **SERVICE NOTES**

The following describes the procedure to dismantle the PD-150+ Cabinets.

### **STEP A: PD-150+ CABINET**

- A1. Unscrew two M4 machine screws on each of the left and right hatches on either side of the unit (8 total).
- A2. Unscrew two M3 pan-head machine screws on the handle cover and detach it.
- A3. Place the unit upside down. Unscrew eight M4 self-tapping screws off the foot standers.
- A4. Detach the foot standers. There are six M3 self-tapping screws in the middle portion.
- A5. Unscrew three M3 self-tapping screws located on the right-hand-side.
- A6. Place the unit in the normal position.
- A7. Locate the four M3 and two M4 self-tapping screws on the top and unscrew them.
- A8. Separate the left and right cabinets.
- A9. Locate the UHF and VHF antennas on the right and left cabinets respectively.
- A10. De-solder both antennas.
- A11. Unscrew three M3 self-tapping screws on left and right side panels (6 total) of the tower metal assembly.
- A12. Unscrew eight M2.6 and six (three on top of front panel, three on top of rear panel) M3 self-tapping screws.
- A13. Detach the left and right metal side panels.
- A14. Detach the 8-pin antenna connector.
- A15. Detach the top metal cover.
- A16. Unscrew seven outer M3 self-tapping screws on the rear panel.
- A17. Detach all connectors.
- A18. The procedure is completed.

### **STEP B: PD150+ MIXER PCB**

- B1. Detach 24 knobs and their nuts.
- B2. Detach the Reverb PCB assembly.

- B3. Unscrew nine M3 machine screws from the mixer PCB assembly.
- B4. Detach all connectors.
- B5. The procedure is completed.

### **STEP C: PD150+ DSP REVERB PCB**

- C1. Detach all connectors.
- C2. The procedure is completed.

### **STEP D: PD150+ INPUT PCB**

- D1. Unscrew six screws and nuts from the front panel.
- D2. Detach all connectors.
- D3. The procedure is completed.

### **STEP E: PD150+ DAMP PCB**

- E1. Unscrew four screws from the PD150+ DAMP PCB.
- E2. De-solder four wires connecting to Output PCB assembly.
- E3. The procedure is completed.

### **STEP F: PD150+ SMPS PCB**

- F1. Unscrew three screws from the front panel.
- F2. Unscrew two screws at the back of the CD mechanism.
- F3. Detach all wiring and connectors.
- F4. Unscrew six screws from the top cabinet of the SMPS.
- F5. Unscrew three screws from the bottom cabinets of the SMPS.
- F6. Detach the spacer from the wiring of the SMPS.
- F7. Unscrew the earthing M4 nut.
- F8. Detach the mains connector from the AC inlet.
- F9. Unscrew five screws from the SMPS PCB assembly
- F10. The procedure is completed.

# PASSPORT® PD-150 PLUS

(This is the model name for warranty claims)

## STEP G: PD150+ LCD KEY PCB

- G1. Unscrew six screws from the LCD KEY PCB.
- G2. Detach all connectors.
- G3. The procedure is completed.

## STEP H: PD150+ CD SERVO PCB

- H1. First complete STEP D.
- H2. Unscrew three screws from the SMPS at the front panel.
- H3. Unscrew two screws from the CD mechanism at the back.

- H4. Detach all wiring from the SMPS cabinet.

- H5. Unscrew four M2 machine screws from the CD SERVO PCB assembly

- H6. Detach/De-solder all wiring and connectors from the CD SERVO PCB assembly.

- H7. The procedure is completed.

## STEP I: Output Jack PCB

- I1. Remove the two M9 nuts and washers on the Output Jack PCB assembly.

# PASSPORT® PD-150 PLUS

(This is the model name for warranty claims)

## PCB EXCHANGE POLICY

Parts marked with a single asterisk (\*) in the Part Lists are not field replaceable. If a failure due to one of these components is detected, please

contact the FMIC Customer Service Department to order the complete PCB Assembly.

## CIRCUIT DESCRIPTION

This section provides concise information about new or unusual circuitry designs incorporated into this amplifier model. The purpose is to aid the service technician by providing insight into the design areas most likely to become obstacles in troubleshooting. Information is focused for its effective use while maintaining the security of Fender® proprietary information wherever possible.

The PD-150+ consists of the following modules:

1. The SMPS PCB module
2. The CD servo PCB module (common with PD-250+)
3. LCD Key PCB module
4. The input PCB module
5. The mixer PCB module
6. The class-D amplifier PCB module
7. The DSP Reverb PCB module (common with PD-250+)

### The SMPS PCB Module

The SMPS PCB module accepts AC mains voltage from 90Vr.m.s. ~ 264Vr.m.s. and provides the following output voltages to power the PD-150+ for various functions:

1. +42.5V DC for the class-D amplifier PCB assembly
2. +15/-15VDC for the input PCB assembly
3. +12VDC for the fan
4. +8VDC for the wireless microphone
5. +8VDC for the CD servo mechanism and PCB assembly
6. +5VDC for the DSP Reverb PCB assembly

U1 (ML4824-1) is the PWM controller which switches at a frequency of about 64 KHz. It also has the function of power factor correction. U1 switches Q1 on and off according to the load condition. Q1 in turn drives transformer T1 which independently supplies +42.5VDC power to the class-D amplifier PCB assembly. The bridge rectifier BD2 rectifies the AC input separately from LF2 and feeds the DC to U2 (TOP249Y). U2 in turn switches and drives T4 directly. T4 then provides the rest of the power rails for items 2 to 6 mentioned above. The fan will engage when a temperature of about 40 degrees C is reached by RT2, and will run at full speed when a temperature above 50 degrees C is attained.

### The CD Servo PCB Module

The CD Servo PCB module consists of the following IC's:

1. IC401 (TC94A58FA-006) - CD servo DSP
2. IC402 (TA2157F) - Digital Servo Head Amplifier
3. IC403 (MM1669AH) - Motor Driver
4. IC405 (TA7291S) - Bridge Driver

IC402 amplifies the laser pickup signal and feeds it to IC401, which is a single-chip CD servo system. IC 402 interfaces with the LCD Key PCB module via three wires [DATA (pin 14), STB (pin 15) and ACK (pin 16)] to receive control commands and return data and status information to and from the LCD Key PCB module. IC402 also directly controls IC403, which in turn drives the forward and disc motors via pins 17 and 18, and pins 11 and 12, respectively. KIA7029 provides a synchronized reset signal to both IC401 and the LCD Key PCB module. The CD output signal is fed to the Mixer PCB module for further processing.

#### The LCD Key PCB Module

The LCD Key PCB module consists of U701 (EM78P468NAQ) which is an MCU controlling IC401 in the CD servo PCB module via CD\_STB (pin 38), CD\_ACK (pin 39), and CD\_DATA (pin 40). It also drives the LCD display directly via pins 1 thru 19, receives an MCU RESET signal at pin 25 in synchronization with IC401 from the CD servo PCB module, and interfaces directly with the six keys providing the CD functions STOP, PLAY/PAUSE, EJECT, FF, RW, and MODE.

#### The Input PCB Module

The input PCB provides both channels 1 and 2 with XLR and ¼" phone jacks, and channel 3 with stereo RCA jacks and a ¼" phone jack. It also provides the AUX SEND, AUX RET, and FOOT SWITCH inputs. The signals from the XLR and ¼" jacks are amplified (mic mode by +30dB) or buffered (line mode by 0 dB) and then fed to the Mixer PCB module.

#### The Mixer PCB module

The Mixer PCB module receives inputs from channels 1-3 and the CD servo PCB module. For each channel it provides the following control functions.

1. LEVEL
2. EQ LOW
3. EQ HIGH
4. REV/AUX
5. PAN/BAL

These signals from each channel are mixed at the inputs of U209A and U209B. From here they are controlled by U210A and U210B for Master Volume Left and Right, and then by U211A and U211B for System EQ Left and Right. Finally the left and right channel signals are buffered by U212A and U212B respectively before they go to the inputs of the class-D amplifier PCB module. The REV/AUX signals from each channel are sent to pin 4 of connector CN210, which is the input to the DSP Reverb PCB module, via U208A and U208B. The output signal from the DSP Reverb PCB module is sent to pin 6 of connector CN210. The level of Reverb can be controlled by MASTER REV (VR224A).

#### The Class-D Amplifier PCB Module

The class-D amplifier TDA8920B is a single 42VDC-supplied bridge configured to deliver 75W output power for both the left and right channels at THD < 1% into an 8-ohm load.

#### The DSP Reverb PCB Module

The DSP Reverb PCB module receives the input REV/AUX signals at pin 4 of connector CN401. The DSP Reverb's IC's consist of U404 (AL1101 ADC), U405 (AL1201 DAC), and U406 (AL3201B). The outputs from U405 are fed to U402B and then buffered by U402A before feeding back to pin 6 of CN 401.
