

'CLASSIC' WITH DF-203 INSTALLED

NOTES: I. THE BLUE/WHITE WIRE AND THE BROWN/WHITE WIRE COMING OUT OF THE DF-203 MUST BE ISOLATED SO THAT THEY MAKE NO CONNECTION.

THEY MAKE NO CONNECTION.

2. THE BROWN AND THE BLUE WIRES COMING OUT OF THE DF-203 ARE CONNECTED IN REVERSE POSITION FROM THE ORIGINAL DF-184 TRANSFORMER.

3. SOME EARLY MODEL 'CLASSIC' AMPS DID NOT HAVE A WHITE WIRE COMING FROM THE DF-184 TRANSFORMER. IN SUCH CASES, ISOLATE THE WHITE WIRE OF THE DF-203 SO THAT IT MAKES NO CONNECTION. (SEE INSET)

4. IN MOST CASES, THE CHASSIS MUST BE RE-DRILLED FOR MOUNTING THE DF-203 DUE TO DIFFERENT MOUNT PATTERN.
