VHF variable capacitance diode

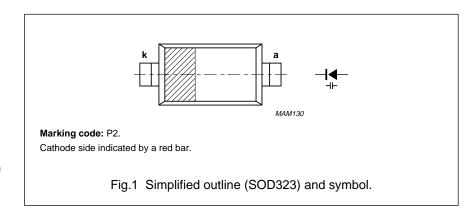

BB132

FEATURES

- · High linearity
- Excellent matching to 1% DMA
- · Very small plastic SMD package
- C28: 2.5 pF; ratio: 26.

APPLICATIONS

- Electronic tuning in VHF television tuners, band A up to 160 MHz
- VCO.

DESCRIPTION

The BB132 is a variable capacitance diode fabricated in planar technology, and encapsulated in the SOD323 very small plastic SMD package.

The excellent matching performance is achieved by gliding matching and a direct matching assembly procedure.

Limiting values

Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information

Where application information is given, it is advisory and does not form part of the specification.
