

# DATA SHEET

## **BGD904L** CATV amplifier module

Product specification  
Supersedes data of 1999 Mar 26

1999 Aug 17

## CATV amplifier module

## BGD904L

## FEATURES

- Excellent linearity
- Extremely low noise
- Excellent return loss properties
- Silicon nitride passivation
- Rugged construction
- Gold metallization ensures excellent reliability
- Low DC current consumption.

## APPLICATIONS

- CATV systems operating in the 40 to 900 MHz frequency range.

## DESCRIPTION

Hybrid amplifier module in a SOT115J package operating with a supply voltage of 24 V.

## PINNING - SOT115J

| PIN | DESCRIPTION     |
|-----|-----------------|
| 1   | input           |
| 2   | common          |
| 3   | common          |
| 5   | +V <sub>B</sub> |
| 7   | common          |
| 8   | common          |
| 9   | output          |

Fig.1 Simplified outline.

## QUICK REFERENCE DATA

| SYMBOL           | PARAMETER                      | CONDITIONS            | MIN. | MAX. | UNIT |
|------------------|--------------------------------|-----------------------|------|------|------|
| G <sub>p</sub>   | power gain                     | f = 50 MHz            | 19.7 | 20.3 | dB   |
|                  |                                | f = 900 MHz           | 20.5 | 21.5 | dB   |
| I <sub>tot</sub> | total current consumption (DC) | V <sub>B</sub> = 24 V | 350  | 380  | mA   |

## LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 134).

| SYMBOL           | PARAMETER                           | MIN. | MAX. | UNIT |
|------------------|-------------------------------------|------|------|------|
| V <sub>B</sub>   | supply voltage                      | –    | 30   | V    |
| V <sub>i</sub>   | RF input voltage                    | –    | 70   | dBmV |
| T <sub>stg</sub> | storage temperature                 | –40  | +100 | °C   |
| T <sub>mb</sub>  | operating mounting base temperature | –20  | +100 | °C   |

## CATV amplifier module

## BGD904L

## CHARACTERISTICS

Bandwidth 40 to 900 MHz;  $V_B = 24$  V;  $T_{mb} = 35$  °C;  $Z_S = Z_L = 75$   $\Omega$ .

| SYMBOL    | PARAMETER              | CONDITIONS                                                                | MIN. | TYP.       | MAX.      | UNIT |
|-----------|------------------------|---------------------------------------------------------------------------|------|------------|-----------|------|
| $G_p$     | power gain             | $f = 50$ MHz                                                              | 19.7 | 20         | 20.3      | dB   |

## Notes

1. Tilt = 9 dB (50 to 550 MHz); tilt = 3.5 dB at –6 dB offset (550 to 750 MHz).
2. Tilt = 12.5 dB (50 to 860 MHz).
3.  $f_p = 55.25$  MHz;  $V_p = 44$  dBmV;  $f_q = 805.25$  MHz;  $V_q = 44$  dBmV; measured at  $f_p + f_q = 860.5$  MHz.
4.  $f_p = 55.25$  MHz;  $V_p = 44$  dBmV;  $f_q = 691.25$  MHz;  $V_q = 44$  dBmV; measured at  $f_p + f_q = 746.5$  MHz.
5.  $f_p = 55.25$  MHz;  $V_p = 44$  dBmV;  $f_q = 493.25$  MHz;  $V_q = 44$  dBmV; measured at  $f_p + f_q = 548.5$  MHz.
6. Measured according to DIN45004B:  
 $f_p = 851.25$  MHz;  $V_p = V_o$ ;  $f_q = 858.25$  MHz;  $V_q = V_o - 6$  dB;  
 $f_r = 860.25$  MHz;  $V_r = V_o - 6$  dB; measured at  $f_p + f_q - f_r = 849.25$  MHz.
7. Measured according to DIN45004B:  
 $f_p = 740.25$  MHz;  $V_p = V_o$ ;  $f_q = 747.25$  MHz;  $V_q = V_o - 6$  dB;  $f_r = 749.25$  MHz;  $V_r = V_o - 6$  dB;  
measured at  $f_p + f_q - f_r = 738.25$  MHz.
8. Measured according to DIN45004B:  
 $f_p = 540.25$  MHz;  $V_p = V_o$ ;  $f_q = 547.25$  MHz;  $V_q = V_o - 6$  dB;  $f_r = 549.25$  MHz;  $V_r = V_o - 6$  dB;  
measured at  $f_p + f_q - f_r = 538.25$  MHz.
9. The module normally operates at  $V_B = 24$  V, but is able to withstand supply transients up to 35 V.

Fig.8 Composite triple beat as a function of output voltage.

$Z_S = Z_L = 75 \Omega$ ;  $V_B = 24 \text{ V}$ ; 129 chs;  $f_m = 860.5 \text{ MHz}$ .

- (1) Typ. +3  $\sigma$ .
- (2) Typ.
- (3) Typ. -3  $\sigma$ .

Fig.9 Composite second order distortion as a function of output voltage.

CATV amplifier module

BGD904L

PACKAGE OUTLINE

Rectangular single-ended package; aluminium flange; 2 vertical mounting holes; 2 x 6-32 UNC and 2 extra horizontal mounting holes; 7 gold-plated in-line leads

SOT115J

| Preliminary specification                                                                                                                                                                                                                                                                                                                                                                                                                                 | This data sheet contains preliminary data; supplementary data may be published later. |
| Product specification                                                                                                                                                                                                                                                                                                                                                                                                                                     | This data sheet contains final product specifications.                                |
| <b>Limiting values</b>                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                       |
| Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability. |                                                                                       |
| <b>Application information</b>                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                       |
| Where application information is given, it is advisory and does not form part of the specification.                                                                                                                                                                                                                                                                                                                                                       |                                                                                       |

**LIFE SUPPORT APPLICATIONS**

These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
