**BYC8B-600** 

## **FEATURES**

- Extremely fast switching
- Low reverse recovery current
- · Low thermal resistance
- Reduces switching losses in associated MOSFET

### **SYMBOL**

## QUICK REFERENCE DATA

$$V_R = 600 \text{ V}$$
 $V_F \le 1.85 \text{ V}$ 
 $I_{F(AV)} = 8 \text{ A}$ 
 $t_{rr} = 19 \text{ ns (typ)}$ 

### **APPLICATIONS**

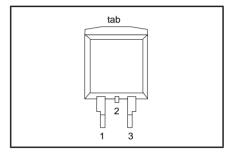

- Active power factor correction
- Half-bridge lighting ballastsHalf-bridge/ full-bridge switched mode power supplies.

The BYC8B-600 is supplied in the SOT404 surface mounting package.

### **PINNING**

| PIN | PIN DESCRIPTION      |  |
|-----|----------------------|--|
| 1   | no connection        |  |
| 2   | cathode <sup>1</sup> |  |
| 3   | anode                |  |
| tab | cathode              |  |
|     |                      |  |

### **SOT404**

## LIMITING VALUES

Limiting values in accordance with the Absolute Maximum System (IEC 134).

| SYMBOL             | PARAMETER                       | CONDITIONS  | MIN. | MAX. | UNIT |
|--------------------|---------------------------------|---|------|------|------|
| $V_{RRM}$          | Peak repetitive reverse voltage |   | -    | 600  | V    |
| V <sub>RWM</sub>   | Crest working reverse voltage   |   | -    | 600  | V    |
| V <sub>R</sub>     | Continuous reverse voltage      | $T_{mb} \le 110 ^{\circ}C$  | -    | 500  | V    |
| I <sub>F(AV)</sub> | Average forward current         | $\delta = 0.5$ ; with reapplied $V_{RRM(max)}$ ; $T_{mb} \le 82  ^{\circ}C$ | -    | 8    | A    |
| I <sub>FRM</sub>   | Repetitive peak forward current | $\delta = 0.5$ ; with reapplied $V_{RRM(max)}$ ; $T_{mb} \le 82  ^{\circ}C$ | -    | 16   | Α    |
| I <sub>FSM</sub>   | Non-repetitive peak forward     | t = 10 ms   | -    | 55   | A    |
| 1 SW               | current.                        | t = 8.3 ms<br>sinusoidal; T <sub>i</sub> = 150°C prior to surge             | -    | 60   | A    |
|                    |                                 | with reapplied $V_{RWM(max)}$   |      |      |      |
| T <sub>stg</sub>   | Storage temperature             | i i ivvivi(max)   | -40  | 150  | °C   |
| $ T_{j}^{s.g} $    | Operating junction temperature  |   | -    | 150  | °C   |

## THERMAL RESISTANCES

| SYMBOL               | PARAMETER  | CONDITIONS                   | MIN. | TYP. | MAX. | UNIT |
|----------------------|--|------------------------------|------|------|------|------|
| R <sub>th j-mb</sub> | Thermal resistance junction to                       |                              | -    | -    | 2.2  | K/W  |
| R <sub>th j-a</sub>  | mounting base Thermal resistance junction to ambient | minimum footprint, FR4 board | -    | 50   | -    | K/W  |

May 1999 1 Rev 1.300

<sup>1</sup> it is not possible to make connection to pin 2 of the SOT404 package

BYC8B-600

## **ELECTRICAL CHARACTERISTICS**

T<sub>i</sub> = 25 °C unless otherwise stated

| SYMBOL           | PARAMETER                     | CONDITIONS  | MIN. | TYP.     | MAX.       | UNIT     |
|------------------|-------------------------------|---|------|----------|------------|----------|

Philips Semiconductors Product specification

Rectifier diode ultrafast, low switching loss

BYC8B-600

#### **DEFINITIONS**

| Data sheet status   |   |  |  |  |
|---|---|--|--|--|
| Objective specification   | This data sheet contains target or goal specifications for product development. |  |  |  |
| Preliminary specification This data sheet contains preliminary data; supplementary data may be published late |   |  |  |  |
| Product specification   | This data sheet contains final product specifications.                          |  |  |  |
| Limiting values   |   |  |  |  |

Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

### **Application information**

Where application information is given, it is advisory and does not form part of the specification.
