

**Absolute Maximum Ratings  $T_A=25^\circ\text{C}$** 

Stresses in excess of the Absolute Maximum Ratings can cause permanent damage to the device. These are absolute stress ratings only. Functional operation of the

device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to Absolute Maximum Ratings for extended periods of time can adversely affect reliability.

| Parameter   | Symbol            | Test Conditions   | LH1501      | LH1511      | Units                   |

**Recommended Operating Conditions**

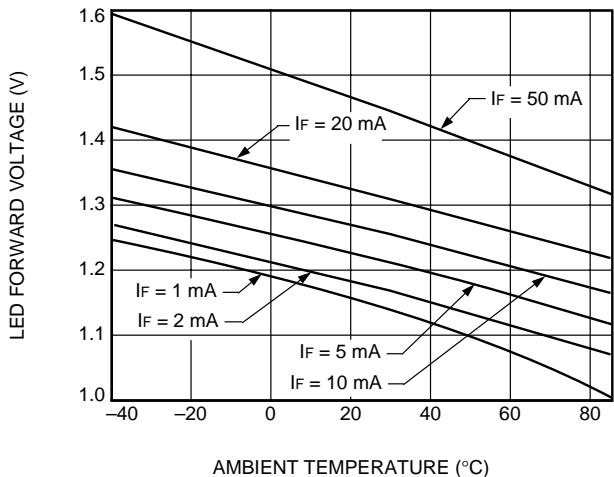

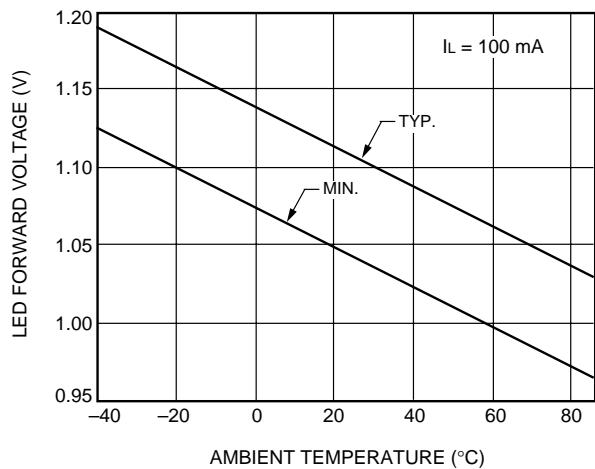

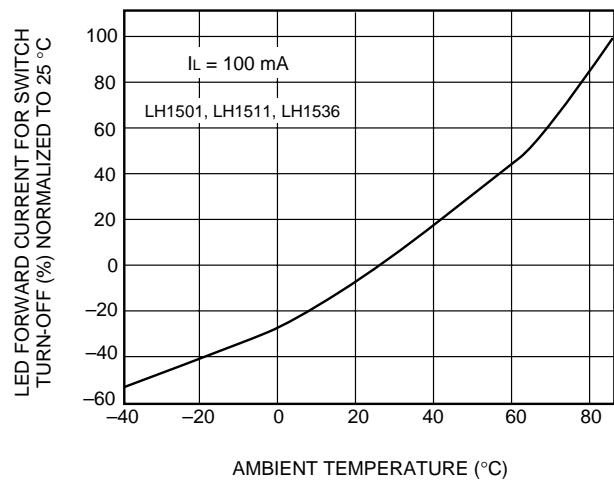

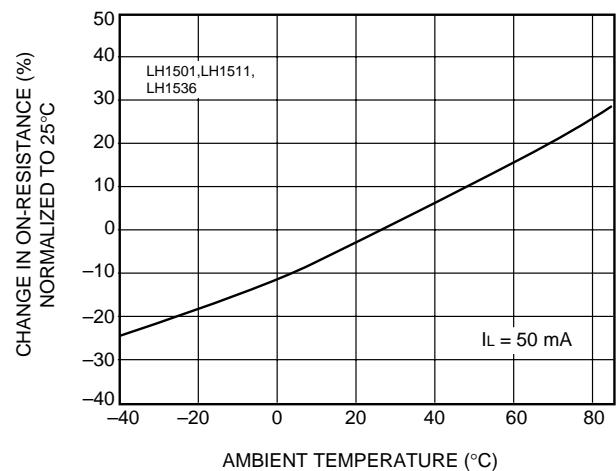

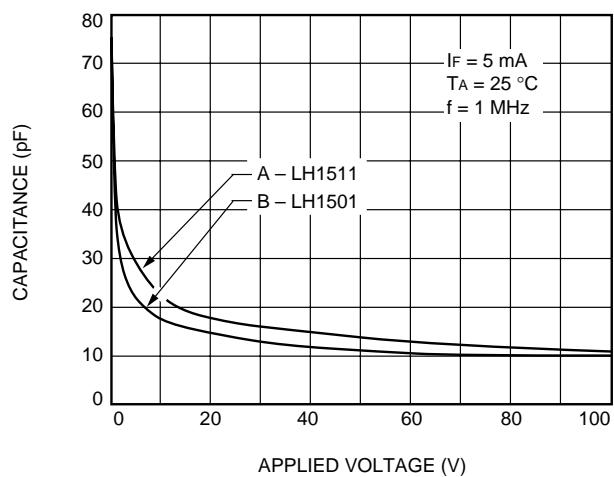

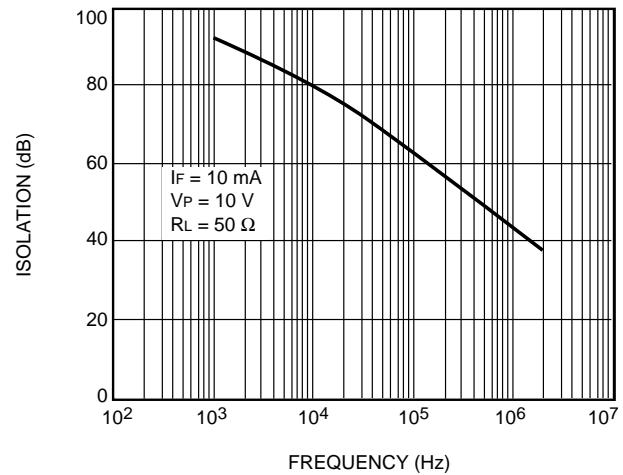

## Electrical Characteristics $T_A=25^\circ\text{C}$

Minimum and maximum values are testing requirements. Typical values are characteristics of the device

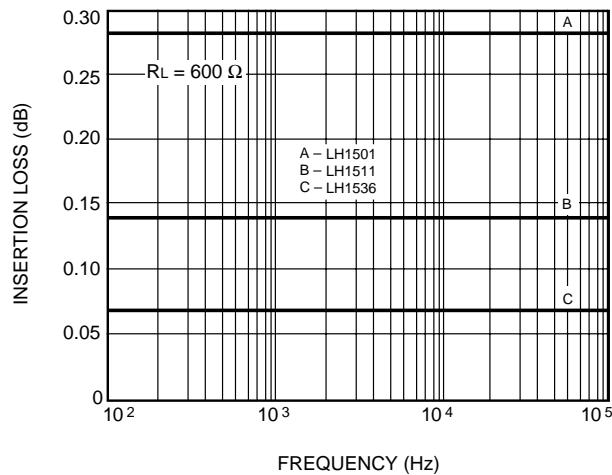

and are the result of engineering evaluations. Typical values are for information purposes only and are not part of the testing requirements.

|        | Parameter   | Symbol     | Test Conditions                             | Values | LH1501 | LH1511 | Units            |
