Low Voltage 16:1 Multiplexer

The MC100LVE164 is a 16:1 multiplexer with a differential output. The select inputs (SEL0, 1, 2, 3) control which one of the sixteen data inputs (A0 – A15) is propagated to the output. The device is functionally equivalent to the MC100E164 except it operates from a -3.3V supply. The device is packaged in the 32–lead TQFP. The TQFP has a 7x7mm body with a 0.8mm lead pitch.

Special attention to the design layout results in a typical skew between the 16 inputs of only 50ps.

- 850ps Data Input to Output
- Differential Output
- Extended 100E VEE Range of -3.0V to -3.8V
- Internal 75kΩ Input Pulldown Resistors

Pinout: 32-Lead TQFP (Top View)

PIN NAMES

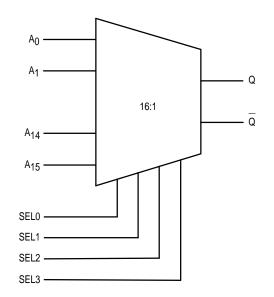

Pin	Function
A ₀ - A ₁₅	Data Inputs
SE <u>L[</u> 0:3]	Select Inputs
Q, Q	Output
