

## MC14551B

### Quad 2-Channel Analog Multiplexer/Demultiplexer

The MC14551B is a digitally-controlled analog switch. This device implements a 4PDT solid state switch with low ON impedance and very low OFF Leakage current. Control of analog signals up to the complete supply voltage range can be achieved.

- Triple Diode Protection on All Control Inputs
- Supply Voltage Range = 3.0 Vdc to 18 Vdc
- Analog Voltage Range ( $V_{DD} - V_{EE}$ ) = 3.0 to 18 V  
Note:  $V_{EE}$  must be  $\leq V_{SS}$
- Linearized Transfer Characteristics
- Low Noise — 12 nV/ $\sqrt{\text{Cycle}}$ ,  $f \geq 1.0$  kHz typical
- For Low  $R_{ON}$ , Use The HC4051, HC4052, or HC4053 High-Speed CMOS Devices
- Switch Function is Break Before Make

#### MAXIMUM RATINGS\*

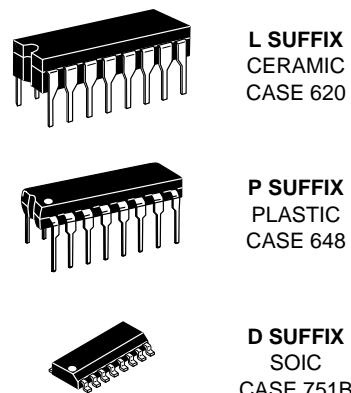

| Symbol            | Parameter  | Value                  | Unit |
|-------------------|--|------------------------|------|
| $V_{DD}$          | DC Supply Voltage (Referenced to $V_{EE}$ , $V_{SS} \geq V_{EE}$ )   | -0.5 to +18.0          | V    |
| $V_{in}, V_{out}$ | Input or Output Voltage (DC or Transient) (Referenced to $V_{SS}$ for Control Input & $V_{EE}$ for Switch I/O) | -0.5 to $V_{DD} + 0.5$ | V    |
| $I_{in}$          | Input Current (DC or Transient), per Control Pin   | $\pm 10$               | mA   |
| $I_{sw}$          | Switch Through Current   | $\pm 25$               | mA   |
| $P_D$             | Power Dissipation, per Package†  | 500                    | mW   |
| $T_{stg}$         | Storage Temperature  | -65 to +150            | °C   |
| $T_L$             | Lead Temperature (8-Second Soldering)  | 260                    | °C   |

\* Maximum Ratings are those values beyond which damage to the device may occur.

†Temperature Derating:

Plastic "P and D/DW" Packages: -7.0 mW/°C From 65°C To 125°C

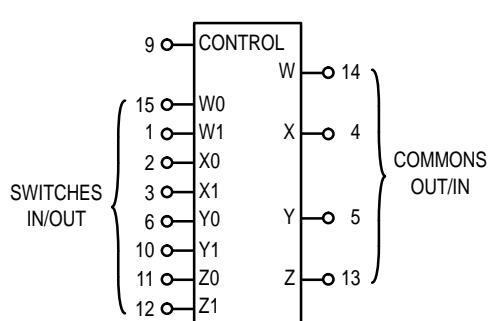

Ceramic "L" Packages - 12 mW/°C From 100°C To 125°C

#### ORDERING INFORMATION

|            |         |
|------------|---------|
| MC14XXXBCP | Plastic |
| MC14XXXBCL | Ceramic |
| MC14XXXBD  | SOIC    |

$T_A = -55^\circ$  to  $125^\circ\text{C}$  for all packages.

| Control | ON          |
|---------|-------------|
| 0       | W0 X0 Y0 Z0 |
| 1       | W1 X1 Y1 Z1 |

$V_{DD} = \text{Pin } 16$   
 $V_{SS} = \text{Pin } 8$   
 $V_{EE} = \text{Pin } 7$

#### PIN ASSIGNMENT

|     |     |    |          |
|-----|-----|----|----------|
| W1  | 1 • | 16 | $V_{DD}$ |
| X0  | 2   | 15 | $W_0$    |
| X1  | 3   | 14 | W        |
| X   | 4   | 13 | Z        |
| Y   | 5   | 12 | Z1       |
| Y0  | 6   | 11 | Z0       |
| VEE | 7   | 10 | Y1       |
| VSS | 8   | 9  | CONTROL  |

NOTE: Control Input referenced to  $V_{SS}$ . Analog Inputs and Outputs reference to  $V_{EE}$ .  $V_{EE}$  must be  $\leq V_{SS}$ .

#Data labeled "Typ" is not to be used for design purposes, but is intended as an indication of the IC's potential performance.

\*\*For voltage drops across the switch ( $\Delta V_{switch}$ ) > 600 mV (> 300 mV at high temperature), excessive V<sub>DD</sub> current may be drawn; i.e. the current out of the switch may contain both V<sub>DD</sub> and switch input components. The reliability of the device will be unaffected unless the Maximum Ratings are exceeded. (See first page of this data sheet.)

#Data labelled "Typ" is not to be used for design purposes but is intended as an indication of the IC's potential performance.

This device contains protection circuitry to guard against damage due to high static voltages or electric fields. However, precautions must be taken to avoid applications of any voltage higher than maximum rated voltages to this high-impedance circuit. For proper operation,  $V_{in}$  and  $V_{out}$  should be constrained to the range  $V_{SS} \leq (V_{in} \text{ or } V_{out}) \leq V_{DD}$  for control inputs and  $V_{EE} \leq (V_{in} \text{ or } V_{out}) \leq V_{DD}$  for Switch I/O.

Unused inputs must always be tied to an appropriate logic voltage level (e.g., either  $V_{SS}$ ,  $V_{EE}$ , or  $V_{DD}$ ). Unused outputs must be left open.

## APPLICATIONS INFORMATION

Figure A illustrates use of the on-chip level converter detailed in Figure 2. The 0-to-5 volt Digital Control signal is used to directly control a 9 V<sub>p-p</sub> analog signal.

The digital control logic levels are determined by V<sub>DD</sub> and V<sub>SS</sub>. The V<sub>DD</sub> voltage is the logic high voltage; the V<sub>SS</sub> voltage is logic low. For the example, V<sub>DD</sub> = +5 V = logic high at the control inputs; V<sub>SS</sub> = GND = 0 V = logic low.

The maximum analog signal level is determined by V<sub>DD</sub> and V<sub>EE</sub>. The V<sub>DD</sub> voltage determines the maximum recommended peak above V<sub>SS</sub>. The V<sub>EE</sub> voltage determines the maximum swing below V<sub>SS</sub>. For the example, V<sub>DD</sub> – V<sub>SS</sub> = 5 volt maximum swing above V<sub>SS</sub>; V<sub>SS</sub> – V<sub>EE</sub> = 5 volt maximum swing below V<sub>SS</sub>. The example shows a ±4.5 volt signal which allows a 1/2 volt margin at each peak. If voltage

transients above V<sub>DD</sub> and/or below V<sub>EE</sub> are anticipated on the analog channels, external diodes (D<sub>X</sub>) are recommended as shown in Figure B. These diodes should be small signal types able to absorb the maximum anticipated current surges during clipping.

The absolute maximum potential difference between V<sub>DD</sub> and V<sub>EE</sub> is 18.0 volts. Most parameters are specified up to 15 volts which is the recommended maximum difference between V<sub>DD</sub> and V<sub>EE</sub>.

Balanced supplies are not required. However, V<sub>SS</sub> must be greater than or equal to V<sub>EE</sub>. For example, V<sub>DD</sub> = +10 volts, V<sub>SS</sub> = +5 volts, and V<sub>EE</sub> = -3 volts is acceptable. See the table below.

NOTES:

1. DIMENSIONING AND TOLERANCING PER ANSI Y14.5M, 1982.
2. CONTROLLING DIMENSION: MILLIMETER.
3. DIMENSIONS A AND B DO NOT INCLUDE MOLD PROTRUSION.
4. MAXIMUM MOLD PROTRUSION 0.15 (0.006) PER SIDE.
5. DIMENSION D DOES NOT INCLUDE DAMBAR PROTRUSION. ALLOWABLE DAMBAR PROTRUSION SHALL BE 0.127 (0.005) TOTAL IN EXCESS OF THE D DIMENSION AT MAXIMUM MATERIAL CONDITION.

| DIM | MILLIMETERS |       | INCHES    |       |
|-----|-------------|-------|-----------|-------|
|     | MIN         | MAX   | MIN       | MAX   |
| A   | 9.80        | 10.00 | 0.386     | 0.393 |
| B   | 3.80        | 4.00  | 0.150     | 0.157 |
| C   | 1.35        | 1.75  | 0.054     | 0.068 |
