

Thick film thermal printhead (8 dots / mm)

KF2002-GL41A

The KF2002-GL41A is a 24 V standard thick film thermal printhead with a printing speed up to 6 inch / second that has been developed mainly for label printer use. (This product is a development product, so please contact ROHM for more details.)

●Applications

High-speed barcode label printer
High-speed ticket printer
High-speed multi-purpose small-sized printers

●Features

- 1) With the newly designed thick film high-speed heater, the KF2002-GL41A achieves high-speed printing of up to 6 inch / second (150 mm / second) without heat history control. With heat history control, the super high speed of 10 inch / second (250 mm / second) is also supported.
- 2) The use of the hard highly-durable conductive protective film ensures a long product life.
- 3) Uses a special partial glaze construction for support of thermal transfer printing.
- 4) Uses the thick film G-series structure (see "Features" on page 138) to provide you the proven record that the G-series has attained on the market.

●External dimensions (Units: mm)

- Equivalent circuit

DI No.	DOT No.
DI 1	1~192
DI 2	193~448

STB No.	DOT No.
STB 1	1~192
STB 2	193~448

●Characteristics

Parameter	Symbol	Typical	Unit
Effective printing width	—	56	mm
Dot pitch	—	0.125	mm
Total dot number	—	448	dots
Average resistance value	Rave	550	Ω
Applied voltage	V _H	24	V
Applied power	P _O	0.93	W / dot
Print cycle	SLT	0.82	ms
Pulse width	T _{ON}	0.26	ms
Maximum number of dots energized simultaneously	—	448	dots
Maximum clock frequency	—	8	MHz
Maximum roller diameter	—	φ 20.0	mm
Running life / pulse life	—	50 / 5×10 ⁷	km / pulses
Operating temperature	—	5~45	°C
