Description/Features

The 152CNQ030 non-isolated, center tap Schottky rectifier module series has been optimized for very low forward voltage drop, with moderate leakage. The proprietary barrier technology allows for reliable operation up to 150°C junction temperature. Typical applications are in switching power supplies, converters, free-wheeling diodes, and reverse battery protection.

- 150° C T_j operation
 - Center tap module
 - Multiple leads per terminal for high frequency, high current PC board mounting
 - High purity, high temperature epoxy encapsulation for enhanced mechanical strength and moisture resistance
 - Very low forward voltage drop
 - High frequency operation
 - Guard ring for enhanced ruggedness and long term reliability
 - Low profile, high current package
