Remote Control Encoder PT2265

Description

PT2265 is a remote control encoder paired with PT2275 utilizing CMOS Technology. Using a special coding technique, PT2265 increases noise immunity to a very great extent and can perform one bit error check. It is housed in 14-pins, DIP Package and has a maximum of eight (8) input channels. Its high performance features make PT2265 a MUST in every fan and other electrical home appliance remote control application.

Features

| CMOS Technology Low Power Consumption Very High Noise Immunity Operating Voltage: Vcc = 2.2 ~ 5.0 Volts Transmits signals to a maximum of 8 channels Start Word Custom Code Options Available (Please contact PTC for details.) |
|--|
| Applications |
| ☐ Fan Remote Control |
| ☐ Air Cleaner |
| Humidifier |
| ☐ Heater |

Note: PT2265 has been updated and can be identified by the "B" mark on the lower right hand corner of the IC's topcode (beside the date code). Please refer to the diagram on the Order Information Section The difference between the old and new version is the external application circuit in the OSC1 and OSC2 pins. (*see* Oscillator Section)
