

16 × 32 dot matrix unit

LUM-5122MU302

The LUM-5122MU302 is a 16 × 32 dot matrix display which can be used in a wide range of applications, including alphabet, numeric, symbol and graphical displays. A large display can be easily created by arranging a number of these dot matrix displays in an array, and they can be applied to a variety of display purposes. A custom controller has display data memory for two screens, and data for each screen can be written and displayed in turn.

●Applications

Light source for displays
