J17 FM Fixed Deemphasis for 0.5/0.45 μ MSP 34xxD Versions:

This supplement refers to the DSP register “FM Fixed Deemphasis” (address: 000F_{hex}) and is valid for all 0.5/0.45 μ MSP 34xxD versions:

- MSP 3410/3400D-C5,
- MSP 3415/3405D-B3, and
- MSP 3417/3407D-B2.

1. The FM-deemphasis “J17” is no longer available for these ICs.
2. If “J17” is selected, the 75 μ s deemphasis will be active.
3. In order to avoid any misunderstandings, please note that the obligatory J17-deemphasis for **NICAM** will of course continue to be available.
