

April 1995

30A, 100V - 200V Ultrafast Diodes

Features

- Ultrafast with Soft Recovery Characteristic ($t_{RR} < 45\text{ns}$)
- +175°C Rated Junction Temperature
- Reverse Voltage Up to 200V
- Avalanche Energy Rated

Applications

- Switching Power Supply
- Power Switching Circuits
- General Purpose

Description

RURP3010, RURP3015, RURP3020 are ultrafast diodes ($t_{RR} < 45\text{ns}$) with soft recovery characteristics. They have a low forward voltage drop and are of planar, silicon nitride passivated, ion-implanted, epitaxial construction.

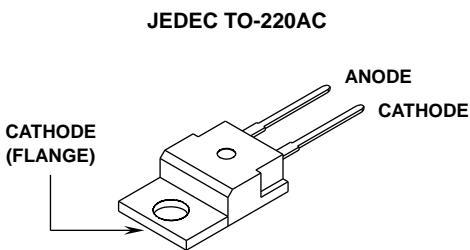

These devices are intended for use as energy steering/clamping diodes and rectifiers in a variety of switching power supplies and other power switching applications. Their low stored charge and ultrafast recovery with soft recovery characteristics minimizes ringing and electrical noise in many power switching circuits thus reducing power loss in the switching transistor.

PACKAGING AVAILABILITY

PART NUMBER	PACKAGE	BRAND
RURP3010	TO-220AC	RURP3010
RURP3015	TO-220AC	RURP3015
RURP3020	TO-220AC	RURP3020

NOTE: When ordering, use the entire part number.

DEFINITIONS

V_F = Instantaneous forward voltage ($pw = 300\mu\text{s}$, $D = 2\%$).

I_R = Instantaneous reverse current.

t_{RR} = Reverse recovery time at $dI_F/dt = 100\text{A}/\mu\text{s}$ (See Figure 2), summation of $t_A + t_B$.

t_A = Time to reach peak reverse current at $dI_F/dt = 100\text{A}/\mu\text{s}$ (See Figure 2).

t_B = Time from peak I_{RM} to projected zero crossing of I_{RM} based on a straight line from peak I_{RM} through 25% of I_{RM} (See Figure 2).

$R_{\theta\text{JC}}$ = Thermal resistance junction to case.

E_{AVL} = Controlled avalanche energy (See Figures 7 and 8).

pw = pulse width.

D = duty cycle.

V_1 AMPLITUDE CONTROLS I_F

V_2 AMPLITUDE CONTROLS dI_F/dt

L_1 = SELF INDUCTANCE OF

$R_4 + L_{\text{LOOP}}$
