DESCRIPTION

This improved version of MDmesh™ which is based on Multiple Drain process represents the new benchmark in high voltage MOSFETs. The resulting product exhibits even lower on-resistance, impressively high dv/dt and excellent avalanche characteristics. The adoption of the Company's proprietary strip technique yields overall performances that are significantly better than that of similar competition's products.

APPLICATIONS

The MDmesh™ family is very suitable for increasing power density of high voltage converters allowing system miniaturization and higher efficiencies.
