## DESCRIPTION

This series of hermetically packaged products feature the latest advanced MOSFET and packaging technology. The device breakdown ratings provide a substantial voltage margin for stringent applications such as 270 VDC aircraft power and/or rectified 230 VAC power (line operation). They are ideally suited for Military requirements where small size, high performance and high reliability are required, and in applications such as switching power supplies, motor controls, inverters, choppers, audio amplifiers and high energy pulse circuits.
