## 300 kRAD RADIATION TOLERANT 1.5 AMP POSITIVE FIXED VOLTAGE REGULATORS

Please see mechanical  
outlines herein

**300K Rad Tolerant Three Terminal,  
Positive Fixed Voltage Regulators  
In Hermetic Packages**

### FEATURES

- Isolated & Non-Isolated Hermetic Packages
- Output Voltages: +5V, +12V, +15V (Other Voltages Available)
- Output Voltages Set Internally To  $\pm 1\%$  or  $\pm 2\%$
- Built-In Thermal Overload Protection
- Short Circuit Current Limiting
- Radiation Tolerant up to 450 K Rad (Si)
- Available Hi-Rel Screened, Class B and Class S, MIL-STD-883

### DESCRIPTION

These three terminal negative regulators are supplied in a high density hermetically sealed metal package and are available hi-rel screened. All protective features are designed into the circuit, including thermal shutdown, current limiting and safe-area control. With heat sinking, they can deliver over 1.5 amps of output current. These units feature internally trimmed output voltages to  $\pm 1\%$  or 2% of nominal voltage. Standard voltages are +5V, +12V, and +15V. However, other voltages are available up to +24 volts. These devices are ideally suited for Space applications where small size, high reliability, and radiation tolerance is required. The high level of Radiation Tolerance of these devices makes them a desirable choice for LEO and many MEO and GEO communication satellites. Radiation testing is performed on a single wafer by wafer basis. Random die samples per wafer are selected, packaged and radiation tested to qualify each individual semiconductor wafer-by-wafer.

### ABSOLUTE MAXIMUM RATINGS @ 25°C

Input Voltage .....	-35 V
Operating Junction Temperature Range .....	- 55°C to + 150°C
Storage Temperature Range .....	- 65°C to + 150°C
Power Dissipation: TO-205 .....	1.1 W
TO-257/SMD-1/ D <sup>2</sup> Pac .....	20 W
Lead Temperature (Soldering 10 seconds) .....	300°C
Surface Mount Package Soldering Temperature .....	250°C
Thermal Resistance, Junction to Case:	
TO-205 .....	.17°C/W
TO-257(Isolated), D <sup>2</sup> Pac (Isolated) .....	.42°C/W

**Notes:**

1. Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used.  
Changes in output voltage due to heating effects must be taken into account separately.
2. Short Circuit protection is only assured up to  $V_{IN} = 35V$ .
3. If not tested, shall be guaranteed to the specified limits.
4. The • denotes the specifications which apply over the full operating temperature range.
5. Refer to curves for typical characteristics versus Total Dose Radiation Levels.

## RADIATION TEST PROGRAM

The following chart is a summary of the test data collected on Radiation Tolerant OMR7805/12/15 at various doses. The chart depicts the Total Radiation Dose that each device was exposed to on a step stress irradiation basis prior to failure. Failure is defined as any electrical test that does not meet the limits of the device per the published data sheet specifications after radiation testing.

## **OMNIREL'S RADIATION TEST PROCEDURE**

- Radiation Testing is performed on a single wafer by wafer basis.
- Each wafer is identified and a random sample of 5 die per wafer is selected.
- The die are then individually assembled in a hermetic package, data logged, electrically tested, hi-rel screened and then submitted to radiation testing.
- The packaged die are submitted to Steady State Total Dose radiation per Method 1019, Condition A, at a dose rate of 50 RAD/sec biased at maximum supply voltage.
- Final electrical test is performed within two hours of both Total Dose Radiation level from a Cobalt 60 source and 168 hr, 100°C annealing process. Read and record data including two non-radiated control samples.
- The wafer is then qualified only if samples from wafers meet full electrical specifications after 150% of total dose rating as specified in each product data sheet.
- Omnidrel's controlling specifications are as follows: For Voltage Regulators the controlling specification is MIL-PRF- 38534/MIL-STD-883. For Rectifiers/Schottky the controlling specification is MIL-PRF-19500/MIL-STD-750.
