## BLOCK DIAGRAM

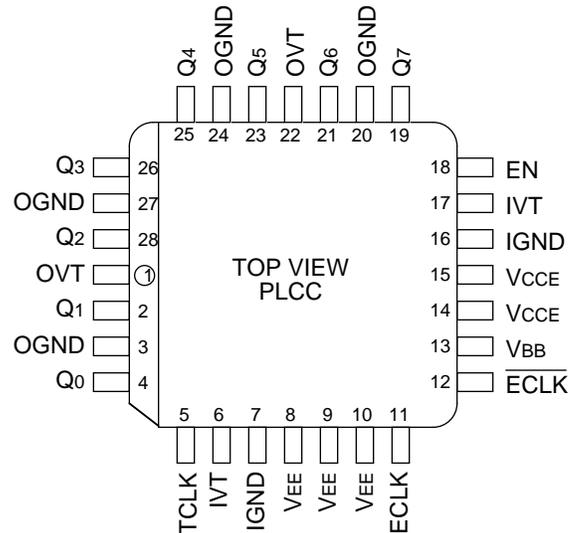

## DESCRIPTION

The SY10/100H646L are single supply, low skew translating 1:8 clock drivers. Devices in the Micrel-Synergy H600 translator series utilize the 28-lead PLCC for optimal power pinning, signal flow-through and electrical performance. The single supply H646L is similar to the HA643 which is a dual supply 1:8 version of the same function.

These devices feature a 24mA TTL output stage, with AC performance specified into a 20pF load capacitance.

The 10H version is compatible with 10K ECL logic levels. The 100H version is compatible with 100K levels.
