

## Low-Drop Voltage Regulator

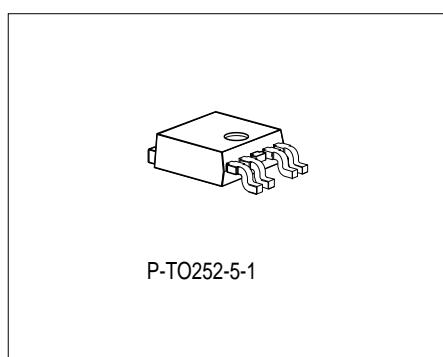

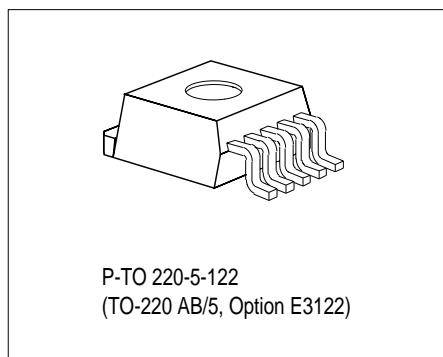

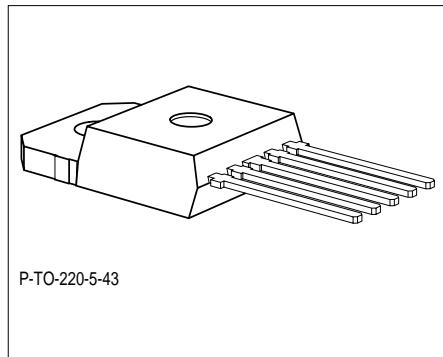

TLE 4276

### Features

- Output voltage tolerance  $\leq \pm 4\%$
- Low-drop voltage
- Inhibit input
- Very low current consumption
- Short-circuit-proof
- Reverse polarity proof
- Suitable for use in automotive electronics

## Functional Description

The TLE 4276 is a low-drop voltage regulator in a TO220 package. The IC regulates an input voltage up to 40 V to  $V_{Q\text{rated}} = 5.0 \text{ V}$  (V50), 8.5 V (V85), 10 V (V10) and adjustable voltage (V). The maximum output current is 400 mA. The IC can be switched off via the inhibit input, which causes the current consumption to drop below 10  $\mu\text{A}$ . The IC is short-circuit-proof and incorporates temperature protection that disables it at over-temperature.

## Dimensioning Information on External Components

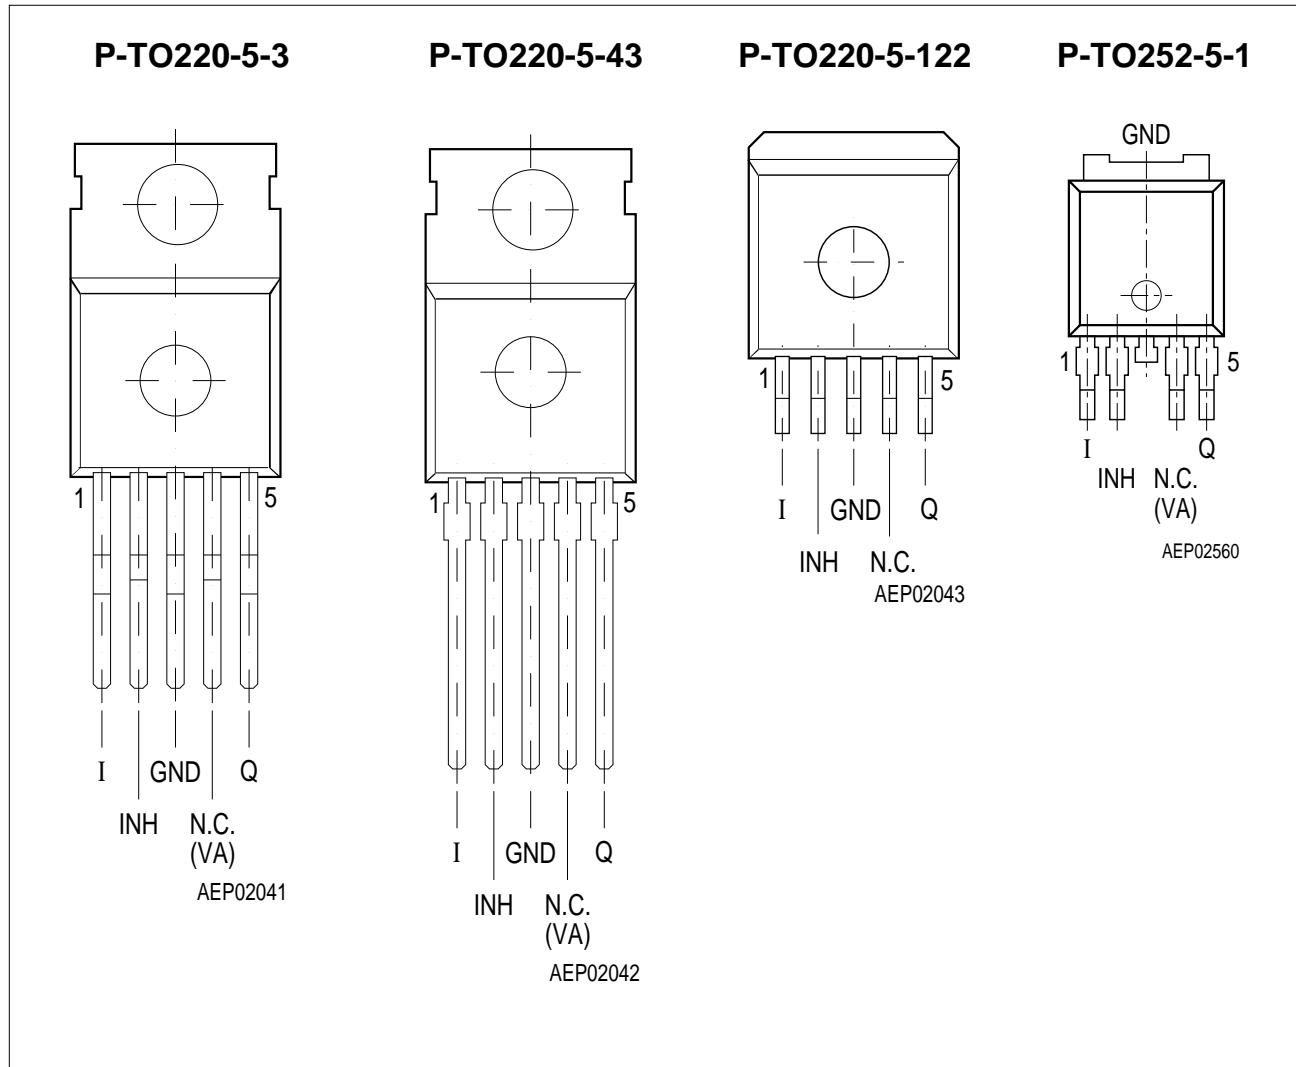

The input capacitor  $C_I$  is necessary for compensating line influences. Using a resistor of approx. 1  $\Omega$  in series with  $C_I$ , the oscillating of input inductivity and input capacitance can be damped. The output capacitor  $C_Q$  is necessary for the stability of the regulation circuit. Stability is guaranteed at values  $C_Q \geq 22 \mu\text{F}$  and an ESR of  $\leq 3 \Omega$  within the operating temperature range.

## Circuit Description

The control amplifier compares a reference voltage to a voltage that is proportional to the output voltage and drives the base of the series transistor via a buffer. Saturation control as a function of the load current prevents any oversaturation of the power element. The IC also incorporates a number of internal circuits for protection against:

- Overload
- Overtemperature
- Reverse polarity

**Pin Definitions and Functions**

Pin No.	Symbol	Function
1	I	<b>Input</b> ; block to ground directly at the IC with a ceramic capacitor.
2	INH	<b>Inhibit</b> ; low-active input
3	GND	<b>Ground</b>
4	N.C. VA	<b>Not connected</b> for V50, V85, V10 <b>Voltage Adjust Input</b> ; only for adjustable output from external voltage divider.
5	Q	<b>Output</b> ; block to ground with a $\geq 22 \mu\text{F}$ capacitor.
