#### Description

UHP-200 series is a 200W single-output slim type power supply with 26mm of low profile design. Adopting the full range  $90\sim264$ VAC input, the entire series provides an output voltage line of 3.3V, 4.2V, 5V, 12V, 15V, 24V, 36V,48V and 55V. In addition to the high efficiency up to 94%, that the whole series operates from  $-30^{\circ}$ C  $\sim$   $70^{\circ}$ C under air convection without fan. UHP-200 has the complete protection functions and 5G anti-vibration capability; It is complied with the international safety regulations such as TUV EN62368-1,EN60335-1,UL 62368-1 and GB4943. UHP-200 series serves as a high performance power supply solution for various industrial applications.

#### ■ Installation

#### 1. Operate with additional aluminum plate

In order to meet the "Derating Curve" and the "Static Characteristics", UHP-200 series must be installed onto an aluminum plate (or the cabinet of the same size) on the bottom. The size of the suggested aluminum plate is shown as below. And for optimizing thermal performance, the aluminum plate must have an even and smooth surface (or coated with thermal grease), and UHP-200 series must be firmly mounted at the center of the aluminum plate.
