

Optocoupler, Phototransistor Output, AC Input (Dual, Quad Channel)

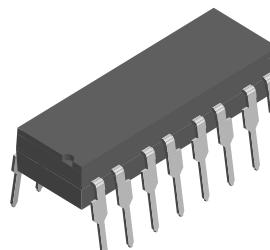

Features

- Identical Channel to Channel Footprint
- ILD620 Crosses to TLP620-2
- ILQ620 Crosses to TLP620-4
- High Collector-Emitter Voltage, $BV_{CEO} = 70\text{ V}$
- Dual and Quad Packages Feature:
 - Reduced Board Space
 - Lower Pin and Parts Count
 - Better Channel to Channel CTR Match
 - Improved Common Mode Rejection
- Isolation Test Voltage 5300 V_{RMS}
- Lead-free component
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC

Description

The ILD620/ ILQ620 and ILD620GB/ ILQ620GB are multi-channel input phototransistor optocouplers that use inverse parallel GaAs IRLED emitter and high gain NPN silicon phototransistors per channel. These devices are constructed using over/under leadframe optical coupling and double molded insulation resulting in a withstand test voltage of 5300 V_{RMS} .

The LED parameters and the linear CTR characteristics make these devices well suited for AC voltage detection. The ILD/Q620GB with its low I_F guaranteed CTR_{CEsat} minimizes power dissipation of the AC voltage detection network that is placed in series with the LEDs. Eliminating the phototransistor base connection provides added electrical noise immunity from the transients found in many industrial control environments.

Order Information

Part	Remarks
ILD620	$CTR > 50\%$, DIP-8
ILD620GB	$CTR > 100\%$, DIP-8
ILQ620	$CTR > 50\%$, DIP-16
ILQ620GB	$CTR > 100\%$, DIP-16
ILD620-X007	$CTR > 50\%$, SMD-8 (option 7)
ILD620-X009	$CTR > 50\%$, SMD-8 (option 9)
ILD620GB-X009	$CTR > 100\%$, SMD-8 (option 9)
ILQ620-X009	$CTR > 50\%$, SMD-16 (option 9)
ILQ620GB-X009	$CTR > 100\%$, SMD-16 (option 9)

Absolute Maximum Ratings

$T_{amb} = 25 \text{ }^{\circ}\text{C}$, unless otherwise specified

Stresses in excess of the absolute Maximum Ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute Maximum Rating for extended periods of the time can adversely affect reliability.

Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design
and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
