

#### PENTAGRID CONVERTER

RENEWAL TYPE FOR MAJESTIC RECEIVERS Heater • Coated Unicotential Cathode Voltage 6.3 a-c or d-c volts 0.3 Current amp. Overall Length 4-9/32" to 4-17/32" 3-21/32" to 3-29/32" Seated Height Maximum Diameter (without shield) 1-9/16" Bulb (with form-fitting shield) ST-12 Small Metal Cap Base \*\* Small 7-Pin

In circuits where the cathode is not directly connected to the heater, the potential difference between heater and cathode should be kept as

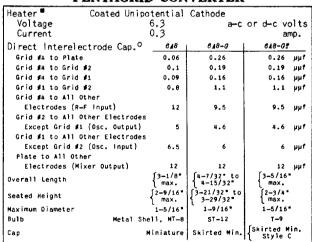

the potential difference between heater and cathode should be kept as low as possible.

A Requires a different socket than the medium 7-pin base.

Basing arrangement is the same as for the 6A7, except that the external shield on the 6A7s is connected to cathode.

Typical Operating Conditions and Curves for the 6A7S are the same as for Type 6A6.

### 6A8, 6A8-G, 6A8-GT PENTAGRID CONVERTER

In circuits where the cathode is not directly connected to the heater, the potential difference between heater and cathode should be kept as low as possible.

With shell of 648 connected to cathode, and with close-fitting shield on 648-6 and 648-6T connected to cathode.

Indicates a change.

## 6A8, 6A8-G, 6A8-GT
