

AMPEG J-12B JET

Schematic redrawn by Steve Luckey on October 10, 2012

Original J-12-B circuit

Tremolo modification notes

- o Replaced V1A cathode R/C with yellow LED for more trem signal.
- o Moved Speed control to first R/C phase shift node.
- o Added Speed switch for greater speed range.
- o Replaced tremolo output 1M resistor with 1M Intensity pot.
- o Tremolo footswitch rewired same as Fender 6G16 to allow fast start with no pops.
