

1. * Indicates low-noise film resistor, 1-w.
2. All resistors 1/2 watt unless specified.
3. All capacitors 600v unless specified.
4. Close-tolerance Components of symmetrical circuits may simply be matched pairs.
5. Volts and milliwatts shown as RMS are relative signal levels with power amp fed for 20 volts output across 16 ohms with 1KHz test signal.
6. D.C. voltages measured with VTVM
