

JEWETT'S Portable Crock Filter.

Pat. Nov. 16, 1869, Oct. 15, 1878.

PATENT PENDING.

The Latest Improvement

consists in placing the filtering material in a separate vessel or crock. The advantage being this, viz :

That whenever the filter part gives out, a new crock can be obtained, which will make the whole complete as when first purchased. We, therefore, recommend parties at a distance (instead of attempting to get the Filter re-packed) that they should purchase a new filter crock, the cost of which is moderate, and no more than the cost of repacking.

ORNAMENTAL STYLE.

No. 71, Porcelain Reservoir, $4\frac{1}{4}$ quarts.....	\$7.25 each.

READ THE TWO MOST CONVINCING TESTIMONIALS.

ISAAC S. WILLIAMS & CO., 728 Market Street, Philadelphia, Pa.—We have sold your "Patent Water Filter" for the last six years. Our sales at that time having reached upwards of five thousand, and in no instance have we heard of any failure in performing all you claim for them.

BOARD OF HEALTH, Washington, D. C., Aug. 27, 1877.

WEBB & BEVERIDGE:—I am just in receipt of your favor of yesterday, requesting my opinion of the "Jewett Filter" purchased of you several months ago for my personal use, and am pleased to say that it has fully answered your expressed estimate of its value. As a cleanser and purifier of drinking water it is certainly not excelled by any mechanical arrangement known to me. THE FOREGOING REMARKS APPLY EQUALLY TO THE LARGE FILTER OF THE SAME MAKE PURCHASED FOR THE BOARD OF HEALTH.

Very respectfully yours,

CHRIS. C. COX, M. D.

Manufactured only by JOHN C. JEWETT & SONS, Buffalo, New York.

FOR SALE IN NEW YORK CITY BY KING, BRIGGS & CO., 506 Broadway. J. H. BALDWIN & CO., 21 Murray Street. L. HEYNIGER, 18 Fulton Street. CHARLES JONES, 920 Broadway. LEWIS & CONGER, 601 Sixth Avenue.

URANIA. AN INTERNATIONAL JOURNAL OF ASTRONOMY.

Under the above title we intend from January next to publish a Journal for astronomical research, for which undertaking we are anxious to obtain your co-operation.

What chiefly induces us to increase the number of scientific periodicals by a new one is the circumstance that every year many astronomical papers and memoirs of great value are published in Transactions or Proceedings of Learned Societies, and, in consequence, remain unknown to many astronomers. In publishing *Urania* it is our aim to provide a receptacle for papers of this kind, which, we trust, will thereby become more generally known, and by preparing reviews or abstracts of all papers of any importance published in places where they seem likely to be overlooked, we shall endeavor to keep our readers as fully acquainted as possible with the progress of astronomical research. At the same time observations or ephemerides of planets, comets, etc., will not be excluded, and in addition to purely astronomical subjects, the essentially cosmical phenomena of magnetism as connected with Aurorae will also meet with their share of attention.

The journal will be printed in Dublin, and will be issued in numbers of from 16 to 24 pages each, demy 4to, whenever we have material enough for a number. Longer memoirs will not be cut up in several parts, but will be printed together in one number, or carried through two numbers without interruption. Shorter numbers will be issued whenever subjects of more immediate interest shall require it, and in particular ephemerides of comets, etc., will be issued on advance sheets, if necessary. Twelve numbers will contain 240 pages, and will form a volume.

The numbers will be sent by post to all subscribers. The subscription for one volume, including postage to all countries in the postal union, is Sixteen Shillings, payable in advance to the undersigned, J. L. E. DREYER. Post Office Orders to be made payable at the General Post Office, Dublin. Intending subscribers are requested to send in their subscription as soon as possible, in order that the number of copies to be printed may be known at once. No. I. will be published early in January.

We have already secured the co-operation of eminent men of science both at home and abroad. Thus the two first numbers will contain contributions from Lord Rosse, Lord Lindsay, Professor Klinkerfues, Professor Schjellerup, Dr. R. S. Ball, Dr. Börgen, and others. Papers written in French, German, or Italian will be printed in the original language (German MSS. are requested to be written in Roman characters).

RALPH COPELAND,

Observatory, Duncricht, Aberdeen.

J. L. E. DREYER,

Observatory, Dunsink, Co. Dublin.

BRAIN AND NERVE FOOD. VITALIZED PHOS-PHITES,

Composed of the Vital or Nerve-giving Principles of the Ox-Brain and Wheat-Germ.

IT RESTORES THE ENERGY LOST BY NERVOUSNESS OR INDIGESTION; RELIEVES LASSITUDE, ERRATIC PAINS AND NEURALGIA; REFRESHES THE NERVES TIRED BY WORRY, EXCITEMENT, OR EXCESSIVE BRAIN FATIGUE; STRENGTHENS A FAILING MEMORY, AND GIVES RENEWED VIGOR IN ALL DISEASES OF NERVOUS EXHAUSTION OR DEBILITY IT IS THE ONLY **PREVENTIVE** OF CONSUMPTION.

IT GIVES VITALITY TO THE INSUFFICIENT BODILY OR MENTAL GROWTH OF CHILDREN, PREVENTS FRETFULNESS AND GIVES QUIET, REST AND SLEEP. IT GIVES A BETTER DISPOSITION TO INFANTS AND CHILDREN, AS IT PROMOTES GOOD HEALTH TO BRAIN AND BODY.

PHYSICIANS HAVE PRESCRIBED 300,000 PACKAGES. For Sale by Druggists or by Mail, \$1.

F. CROSBY, 664 & 666 Sixth Ave., N. Y.—London, 137 A Strand.
