"There could be no better proof of the gradual establishment of real scientific principles in the study of man than that which is afforded by the growing convergence of all our modern thinkers in their views upon anthropological subjects. Not long since the time was when the claims of anthropology to be regarded as a science at all were universally derided, and when objectors asked, with a not wholly unjustifiable sneer, what single admitted principle had the anthropologists yet succeeded in establishing with any unanimity among themselves. But Mr. Tylor's little book shows that a great deal has now been ascertained with tolerable certainty. The close argument which it keeps up with Mr. Herbert Spencer, with Sir John Lubbock, and with Professor Boyd Dawkins is extremely noticeable throughout; and it is an excellent test of the extent to which a firm basis of almost incontrovertible fact has now at last been satisfactorily laid down. As a whole, Mr. Tylor's admirable little book certainly deserves the success with which it will doubtless meet.—*Pall Mall Gazette*."

A TREATISE ON THE DISEASES OF THE NERVOUS SYSTEM.

By William A. Hammond, M. D., Surgeon-General U. S. Army, (retired list); Professor of Diseases of the Mind and Nervous System in the University of the City of New York.

This the SEVENTH EDITION of Dr. Hammond's well-known work has been thoroughly revised, and enlarged by the addition of new chapters and of a section on Diseases of the Sympathetic System.

The work has received the honor of a French translation by Dr. Labadie-Lagrave, of Paris, and an Italian translation by Prof. Diodato Borrelli, of the Royal University, is now going through the press at Naples.

In one large 8vo volume of over 900 pages, and about 150 illustrations. Price, cloth, \$5.00; sheep, \$6.00; half Russia, \$6.00.
