PUBLISHED THIS WEEK:

I.

Mental Evolution of Man:

THE ORIGIN OF HUMAN FACULTY. By GEORGE JOHN ROMANES, F.R.S., author of "Mental Evolution in Animals," etc. One vol., 8vo, cloth. Price, \$3.00.

This work, which follows "Mental Evolution in Animals," by the same author, considers the probable mode of genesis of the human mind from the mind of lower animals, and attempts to show that there is no distinction of kind between man and brute. It is likely to provoke no little discussion in the religious and literary as well as the scientific world.

"The vast array of facts, and the sober and solid method of argument employed by Mr. Romanes, will prove, we think, a great gift to knowledge."—*Saturday Review*.

II.

The Folk-lore of Plants.

By T. F. THISELTON DYER, M.A. 12mo, cloth. Price, \$1.50.

"The Folk-lore of Plants" traces the superstitions and fancies connected with plants in fairy-lore, in witchcraft and demonology, in religion, in charms in medicine, in plant language, etc. The author is an eminent English botanist, and superintendent of the gardens at Kew.

1, 3, & 5 Bond Street, New York.

SPECIAL TEACHER'S EXCURSION TO

PARIS EUROPE AND THE
WORLD'S EXPOSITION,

visiting England, France, Germany, the Rhine, Belgium and Holland. All travel and hotels FIRST-CLASS. Finest line of Steamers crossing the Atlantic. Low Rates. Rooms are being rapidly taken. Send for circular, free.

E. TOURJEE, Franklin Square, Boston, Mass.

STAR ATLAS.

Containing Maps of all the Stars from 1 to 6.5 magnitude between the North Pole and 34° South Declination, and of all Nebulae and Star-Clusters in the same region which are visible in telescopes of moderate powers. With Explanatory Text, by Dr. HERMANN J. KLEIN. Translated and adapted for English Readers, by EDMUND McCURE, M.A., M.R.I.A. 18 Charts and 81 pages of illustrative letter press. Imperial 4to, cloth. \$2.25 net. If by mail, 20 cents must be added for postage.

"I have been looking for just such an Atlas for more than thirty years. The absence of those hideous figures which adorn most all star maps and every celestial globe is certainly a great step forward. The astronomer wants the outlines only of the constellations on his star-maps. The insertion of Nebulae and star-clusters visible in small telescopes only, is a boon to the astronomer who does much work (or any) in searching for Comets; and as this work is mostly done with small telescopes the observer wants only the Nebulae and star-clusters on his map which his telescope will show, and no more. The Atlas is just the proper size; if larger it would be inconvenient, and if smaller the maps would have little value."—H. P. TUTTLE, M.A., formerly of the Cambridge (Mass.) Observatory.

"I have carefully examined the Star Atlas . . . and consider it in every respect a first class work. . . . The maps are clear, distinct and remarkably accurate; the boundaries of the constellations agree exactly with the very best authorities; the names are marked distinctly. The Nebulae and star-clusters are all marked and accurately named down to such a magnitude as could be seen with an ordinary two or three-inch telescope, and their positions are remarkably accurate. The descriptions of astronomical phenomena agree with the best authorities and with the heavens; they are accurate and just as exhaustive as possible for the space. The pictures of some of the most important phenomena are derived from the best sources, some of them excellent copies, and others quite accurate representations of the heavens. The whole work was written by an astronomer of acknowledged reputation, which itself is a sufficient recommendation. The book is very handy and it surprises me how much is contained in such a small compass; it is practical, for no stars or other objects are put down below a certain limit, and it is practically exhaustive up to that limit. There are three classes of people that it may benefit. 1. Astronomers who are particularly engaged in comet hunting; on account of the Nebulae being marked as they are. 2. Amateurs with a two or three inch telescope, who want to get a general view of the sidereal heavens. 3. Students, for I think a copy of this Atlas would be extremely useful as a hand-book wherever sidereal astronomy is taught in any manner. It gives me great pleasure to state that I do not know of any book of its kind that contains so much accurate knowledge in so small a compass."—EDGAR FRISBY, Professor of Mathematics, U. S. Navy. U. S. Naval Observatory, Washington, D. C.

E. & J. B. Young & Co.,

COOPER UNION, FOURTH AVE., NEW YORK.

Schools.

NEW JERSEY, PLAINFIELD.

THE CHESTNUTS.—Parents with daughters to educate, or orphan girls with companion, may find a comfortable home, with school instruction by applying to Miss E. E. Kenyon.

CONNECTICUT, NEW HAVEN.

MRS. CADY'S SCHOOL FOR YOUNG LADIES. Prepares for Smith and Wellesley, and admits to Vassar by Certificate. Circulars. Early application necessary.

VERMONT, BURLINGTON.

VERMONT EPISCOPAL INSTITUTE. Boarding School for Boys. Prepares for College or Business. Military drill. Terms moderate. Fifty-seventh half-year opens September 3, 1888. Send for catalogue. H. H. ROSS, A.M., Principal.

TERRE HAUTE, IND.

ROSE POLYTECHNIC INSTITUTE.—A School of Engineering. Well endowed, well equipped departments of Mechanical and Civil Engineering. Electricity. Chemistry, Drawing. Extensive Shops & Laboratories. Expenses low. For catalogue address T. C. Mendenhall, Pres.

SCIENCE CLUBBING RATES.

10% DISCOUNT.

We will allow the above discount to any subscriber to *Science* or *The Swiss Cross* who will send us an order for periodicals exceeding \$10, counting each at its full price.
