

many additions to the text and illustrations, will be collected in a very handsome volume, to be published by Charles Scribner's Sons early in the fall.

— George H. Ellis, Boston, will publish shortly a book of social essays entitled "Problems in American Society," by Joseph Henry Crooker, the author of "Jesus Brought Back." The book will deal with the problems of charity, temperance, political conscience, moral and religious instruction in public schools, and also the problem of solving the question at issue between the Catholic Church and the secular schools.

— G. P. Putnam's Sons have published "Great Words from Great Americans," a neatly gotten up little book giving the Declaration of Independence, the Constitution of the United States, Washington's and Lincoln's inaugural and farewell addresses, etc.; and "Seven Thousand Words Often Mispronounced," by William H. P. Phyfe.

— W. W. Pasko, 19 Park Place, New York, has issued the first number of *Old New York*, a journal relating to the history and antiquities of New York City. Mr. Pasko is also the editor. The periodical is intended to cover the entire range of events "from the discovery of the river and bay down to a period within the recollection of middle-aged persons." It will be published in monthly numbers containing sixty-four pages each. The editor invites the co-operation of all those interested and will be glad to be furnished with material. "Nothing will be inserted for sensation; truth, and truth alone, will be his purpose."

— A remarkable chapter of Napoleonic history will appear in the September *Century*, consisting of letters and journals of British officers describing Napoleon's voyage to Elba, also to St. Helena. The first part of the article is a letter written by Captain Ussher, who commanded the "Undaunted," which took the exile to Elba; the last part is by Lieutenant Miles, of the "Northumberland," and consists partly of a diary which the young lieutenant kept while on

the way to St. Helena in the same ship with the ex-emperor. Napoleon talked quite freely about some of his plans — especially with regard to the French navy — told a number of stories, and explained various points in his own career.

— D. Appleton & Co. announce for early publication "European Schools," by L. R. Klemm, which will be fully illustrated and included in the International Education Series; "A First Book in American History," by Edward Eggleston, which will be beautifully illustrated by eminent American artists; and Youmans' "Class-Book of Chemistry," thoroughly revised by Dr. W. J. Youmans, a brother of the author, and made quite up to date by including the latest developments of the science.

— Sir Charles Dilke is engaged upon a new work, entitled, "Problems of Greater Britain." "Though covering in some respects the same ground as 'Greater Britain,'" says the *Athenaeum*, "it will not be, like that book, a record of travel, but a study of comparative politics and a complete survey of the empire. Special attention will be paid to the question of Indian frontier defence, to the situation in Canada and South Africa, and above all to the many important problems which concern the present and future of Australia." The book will be published by Messrs. Macmillan & Co. in January.

— A "floral campaign," for the choice of a national flower, to correspond with the rose of England and the lily of France, is now in progress in many parts of the country, and is arousing considerable interest and discussion among flower loving patriots. Prang & Co. of Boston, who started the campaign, have just issued a little volume containing pictures of the two favorite candidates, the mayflower and the golden-rod, two poems reciting the claims of each, a history of the campaign, and a postal ballot for the use of those who wish to vote on the subject. The polls will close on Dec. 31, this year, when the results will be published. The result of the voting so far is as follows. For the golden-rod, 67 per cent;

Exchanges.

[Exchanges are inserted for subscribers free of charge. Address N. D. C. Hodges, 47 Lafayette Place, New York.]

I want to correspond and exchange with a collector of beetles in Texas or Florida. — Wm. D. Richardson, P.O. Box 223, Fredericksburg, Virginia.

I want botanical specimens and analyses for exchange. Send list of those desired and those which can be furnished, and receive a similar list in return. Also cabinet specimens and curiosities for the same. Scientific correspondence solicited. — E. E. Bogue, Orwell, Ashta County, O.

I will sell to chapters or individual members of the Agassiz Association, 25 fine specimens of fossil plants from the Dakota group (cretaceous), correctly named, for \$2.50. Send post-office order to Charles H. Sternberg (author "Young Fossil-Hunters"), 1033 Kentucky Street, Lawrence, Kan.

One mounted single achromatic photographic lens for making 4 X 5 pictures, in excellent condition; also one "new model" double dry-plate holder (4 X 5"), for fine geological or mineralogical specimens, properly classified. — Charles E. Frick, 1019 West Lehigh Avenue, Philadelphia, Penn.

Drawings from nature — animals, birds, insects, and plants — to exchange for insects for cabinet; or I will send them in sets of ten each for ten cents in stamps. My drawings in botany are in detail, showing plant, leaves, flowers, seed, stamens, pistils, etc. — Alda M. Sharp, Gladbrook, Io.

The undersigned wishes to make arrangements for the exchange of *Lepidoptera* of eastern Pennsylvania for those from other localities. All my specimens are named and in good condition. — Charles S. Westcott, 613 North 17th Street, Philadelphia, Penn.

California onyx, for minerals and coins not in my collection. — W. C. Thompson, 612 East 141st Street, New York, N.Y.

Any one who has a botanical box in good condition will please write. I will offer about 30 specimens in exchange. — C. B. Haskell, Box 826, Kennebunk, Me.

A few first-class mounted birds, for first-class birds' eggs of any kind in sets. — J. P. Babbitt, secretary Chapter 755, 10 Hodges Avenue, Taunton, Mass.

HEAVEN AND HELL, by EMANUEL SWEDENBORG, 416 pages, paper cover. Mailed pre-paid for 14 Cents by the American Swedenborg Printing and Publishing Society, 20 Cooper Union, New York City.

BOOKS THAT EVERY TEACHER SHOULD POSSESS.

METHODS OF TEACHING. A Handbook of Principles, Directions, and Working Models for Common-school Teachers. By John Swett, Principal of the San Francisco Girls' High School and Normal Class. 12mo, Half Leather, \$1.00. "Every teacher may derive immediate practical benefit from its perusal." — F. Louis Soldan, Principal St. Louis Normal School.

BROWNING'S EDUCATIONAL THEORIES. An Introduction to the History of Educational Theories. By Oscar Browning, M.A., King's College, Cambridge, England. 16mo, Cloth, 50 cents.

It is a concise and popular account of the main lines of thought that have been followed on educational subjects from ancient times to our own day. Mr. Browning gives a chapter on education among the Greeks; one to Roman education, to Humanistic education, the Realist, the Naturalist, English Humanists and Realists, Locke, the Jesuits and Jansenists, Rousseau, Pestalozzi, Kant, Fichte and Herbart, and finally, the English public school. He writes clearly and pleasantly.

GENTLE MEASURES IN TRAINING THE YOUNG. By Jacob Abbott. Illustrated. 12mo, Cloth, \$1.00.

There are few questions connected with the early education of children that are not discussed in the course of the volume, with reference to the leading principle of which it treats, each topic is illustrated by a variety of examples derived from practical life, and the whole treatment of the subject evinces the parental wisdom of the author, his deep insight into the juvenile nature, and his large experience in the work of education.

DEWEY'S PSYCHOLOGY. By John Dewey, Ph.D., of the University of Michigan. 12mo, Cloth, \$1.25.

This new and *live* presentation of the subject develops the principles of psychology in such an orderly way, and with such fullness of illustration, that the reader obtains clear, accurate, and connected ideas. It gives definite statements of fundamental facts, progressive development of principles, accurate definitions, and clear and precise discussion, omitting irrelevant detail.

CONTRIBUTIONS TO THE SCIENCE OF EDUCATION. By William H. Payne, A.M., Professor of the Science and the Art of Teaching, University of Michigan. 12mo, Cloth, \$1.25.

A timely book, bearing on active controversies of to-day, and casting new light upon them. It is the fruit of long study and broad observation. The author is a clear, strong, practical thinker, bold in his championship of his own ideas, yet reverent towards all conservatism that can claim respect. The book should be in the hands of all who are interested in education.

MANUAL OF OBJECT TEACHING. With Illustrative Lessons in Methods and the Science of Education. By N. A. Calkins, Supt. of Primary Schools of New York City. 12mo, Cloth, \$1.25.

PRIMARY OBJECT LESSONS. By N. A. Calkins. Subjects Treated: Elementary Arithmetic. — Reading. — Phonetics. — Drawing. — Object Lessons. — Form, Color, and Size. — Simple Lessons on the Human Body. 12mo, Cloth, \$1.00.

STUDIES IN ENGLISH LITERATURE. By William Swinton, author of "Harper's Language Series," and Gold Medalist Paris Exposition, 1878. Embellished with portraits and Autographs. 8vo, Cloth, \$1.20.

It is a series of *studies in the masters* of English, from Shakespeare to the present time. The authors chosen are not only of the first rank, but they also represent epochs of literature, marked phases of style, distinctive contributions to literary method.

A SHORT HISTORY OF THE ENGLISH PEOPLE. By J. R. Green, M.A., Examiner in the School of Modern History, Oxford, England. 8vo, Cloth, \$1.20.

This book is not a mere record of kings, battles, and wars, but is a history of the *development* of the people in literature, religion, and civil institutions. It contains eight hundred and twenty-four pages, with Colored Maps, Chronological Tables, Genealogical Tables of Sovereigns, Marginal Notations, etc.

The above named books are selected from HARPER & BROTHERS' List of Publications, and offered on the following terms: 1. Single copies will be mailed to any address on receipt of the price. 2. When Books are ordered for the use of Institute Classes or Reading Circles, or in clubs of six or more, we will send the same by express at a discount of 20 per cent. from the prices given. On account of these special rates, cash must accompany the order. Money may be sent to us by P.O. Money Order or Draft, Registered Letter, or Express. Address,

HARPER & BROTHERS, Publishers, Franklin Square, N. Y.

The Barrett Mil-Ammeter.

The mil-ammeter shown in the accompanying sketch has been designed especially to meet the wants of the medical practitioner, and, with this end in view, has been made as compact and uncomplicated as is consistent with accuracy.

The question of accuracy has to be carefully considered in in-

THE BARTLETT MIL-AMMETER.

struments of this kind, for the present tendency in the application of electricity to medicine and surgery is to obtain results based upon such systems of measurement as shall be comparable at any locality.

The John A. Barrett Battery Company's mil-ammeter is believed to be an important improvement over most instruments of its class, and it embodies in its construction several features which are entirely novel.

Of these, the most important is the manner of rendering the metre capable of measuring currents of very great differences in value. This is secured by a system of shunts which are automatically thrown into circuit simultaneously with a corresponding change of the scale. The instrument is provided with three independent scales, whose ranges are respectively 0-5, 0-25, and 0-250 milli-amperes. By turning a screw at the side of the case, these scales are made visible one after the other, and at the same time the corresponding shunt is put in action, so that correct readings may be taken at once.

The metre is also provided with a screw-clamp, which removes the pivoted needle (the needle having a jewel pivot) from its bearing; and when this is adjusted, the instrument can be carried around with little care and with almost perfect safety.

Recently the range of these metres has been extended, so that they now read up to 1,000 milli-amperes.

Electrical Train Heating.

The Burton Electric Company, of Richmond, Va., have recently been making some experiments with their electric heaters for railway cars, a Sprague electric car being used for the purpose. An 80 volt current was used. Each heater had a resistance of 35 ohms, and required $2\frac{1}{2}$ amperes of current to raise the temperature 200 degrees Fahrenheit. The heater is composed of a resistance coil, inclosed in a cast iron case provided with projections for increasing the radiating surface. The wires of the resistance coil are covered with powdered clay, to absorb the heat and prevent the wires from being burnt out. In the experiments mentioned fourteen heaters were used, absorbing three and a half electrical horse-power. The heaters were connected in multiple arc. In practice it is proposed to generate currents on trains under way by means of dynamos driven from the car-axes, the cars to be heated before starting out by currents from stationary dynamos at the stations.

GUARANTY INVESTMENT COMPANY

CAPITAL \$250,000.

7% Guaranteed Farm Mortgages 7%

The Company sends each year to Kansas and Nebraska for the purpose of examining its loans and methods of business a

COMMITTEE OF INVESTORS.

The Committee for 1889 visited Fifty counties in the two States, examined over **100** farms on which loans had been made and reported every one to be **SAFE**.

The Company will be glad to send to any address the Report of the Committee which presents a very interesting statement of the general development of Kansas and Nebraska.

A large number of loans equally as good as any examined by the Committee are always on hand for sale.
