

Garden," "Faults in Grafting," and "The Longevity of the Elm," are titles of a few of the remaining articles.

—The University of Pennsylvania is about to begin the issue of a series of monographs representing work done in the fields of philosophy, psychology, and ethics. The first number is announced for April, and is a work on "Sameness and Identity," by Professor Fullerton. Following this number will be a series of studies from the laboratory of experimental psychology, and an edition of Descartes' "Meditations," with Latin and English texts, and philosophical commentary. The series will be published by the University of Pennsylvania Press, under the editorship of Professors Fullerton and Cattell. Dr. E. J. James, professor in the Wharton

School of Finance and Economy, is preparing for the American Economic Association a paper on the "Canal Question in the United States." He will show how great a mistake the American people have committed in allowing its canal system to fall into decay. He is warmly in favor of the construction of a new system which shall unite the great water-ways of the West to the Atlantic seaboard at various points. Dr. Simon N. Patten, professor in the Wharton School of Finance and Economy, has in press a book entitled "The Economic Basis of Protection." He "re-examines the whole question of free trade *versus* protection in the light of modern economic theories, and shows how the free-trade theories are inconsistent with the best results of late economic thought."

**DICTIONARY  
OF  
ECONOMIC PLANTS,**

BY JOHN SMITH,

Associate of the Linnæan Society, author of  
"Historia Filicum," "History of  
Bible Plants," etc., etc.

For more than forty years Mr. Smith was connected with the Royal Gardens, Ken., which gave him remarkable opportunities for becoming acquainted with the largest collection of living plants, native and exotic, ever brought together; and from 1846, he was associated with the late Sir W. Hooper in building up the Kensington Museum of Economic Botany. Based on all this experience, Mr. Smith has produced this Dictionary which gives under their popular names information about plants that furnish the wants of man, their history, products and uses. Having received a large invoice of this book from the London publisher, we offer to mail copies postpaid at a discount.

List price, \$3.50: our price, \$2.80.

**A New Method of Treating Disease.**

## HOSPITAL REMEDIES.

What are they? There is a new departure in the treatment of disease. It consists in the collection of the specifics used by noted specialists of Europe and America, and bringing them within the reach of all. For instance, the treatment pursued by special physicians who treat indigestion, stomach and liver troubles only, was obtained and prepared. The treatment of other physicians celebrated for curing catarrh was procured, and so on till these incomparable cures now include disease of the lungs, kidneys, female weakness, rheumatism and nervous debility.

This new method of "one remedy for one disease" must appeal to the common sense of all sufferers, many of whom have experienced the ill effects, and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which, as statistics prove, *has ruined more stomachs than alcohol*. A circular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole proprietors.

**A TEMPORARY BINDER**
