

aware that all teachers do not agree with us in this; but we do not hesitate in saying that to this, even now, new method of study "The Elements of Laboratory Work" is an addition, and that those who have such work in charge will find the experiments and exercises full of suggestions.

AMONG THE PUBLISHERS.

"HINTS on How to Travel" is the title of a handsomely illustrated little guide and information book just published by H. D. Newson & Co., 852 Broadway, this city.

—"The Growth of Yale Athletics," by Walter Camp, illustrated by instantaneous photographs taken on the campus; "Path of the Cyclone," seventeen views of the ruins in Louisville; "Mississippi Floods," breaks in the levees, river scenes, as pictured from the government vessel,—are published in *Illustrated American* No 9, for the week ending April 19.

—In the May number of the *New England Magazine* there will be a full-page portrait of George Kennan, which appears in connection with a poem on the recent Russian atrocities.

—"The Better Day" (New York, Funk & Wagnalls) is the title of the new periodical, the organ of the Better Day Reading Circles. It is a journal of temperance education, to extend the work begun by the course of scientific temperance instruction in the public schools.

—Encouraged by the success of the "Historiettes Modernes," by Professor C. Fontaine, Washington, D.C., the publishers, D. C. Heath & Co. (Boston) issued on the 21st a second volume by the same author, and edited on the same plan. The stories are short, pure, interesting, and of recent appearance in France, and the notes are full and suggestive.

—Two American honeysuckles which have often been confounded are admirably figured in last week's *Garden and Forest*. They are *Lonicera flava* and *Lonicera Sullivantii*, and the por-

traits will serve to facilitate their identification. Some sound advice about planting new places is given in the leading editorial article, and the great nurseries of the Messrs. Veitch & Sons, near London, are described. Besides the usual variety of seasonable horticultural matter, the number contains a review of Dr. Heinrich Mayr's important work on the forests of North America.

—Roberts Brothers have ready "London of To-Day," by Charles Eyre Pascoe, an illustrated handbook for the season of 1890.

—An article in *Lippincott's Monthly Magazine* for May of timely interest is "Subsidies and Shipping," by Henry W. Raymond. Mr. Raymond points out that all nations who are leaders in commerce grant subsidies to their shipping, and argues that in order to compete successfully with foreign nations we must adopt their methods.

—Charles Scribner's Sons have ready "The Wife of the First Consul," translated from the French of St. Amand by T. S. Perry, and have in press two more books by the same author,—"Marie Antoinette and the End of the Ancient Régime" and "The Happy Days of the Empress Louise." A revised edition has been prepared of Lafayette C. Loomis's "Index Guide to Travel and Art Study in Europe."

—Little, Brown, & Co. will publish next month "The Influence of Sea Power upon History," by Capt. A. T. Mahan, U.S.N., with twenty-five charts illustrative of great naval battles. The object of the work is an examination of the general history of Europe and America, and exemplification of the great determining influence of the maritime strength upon great issues,—a point which many historians have either overlooked or touched upon superficially. The period embraced is from 1660 to the end of the American Revolution.

—Messrs. Ginn & Co. announce for publication May 1, "Common School Music Charts," by W. S. Tilden, teacher of music in the State Normal School, Framingham, and author of "A Common School Song Reader." These charts are designed

DICTIONARY OF ECONOMIC PLANTS,

BY JOHN SMITH,

Associate of the Linnæan Society, author of "Historia Filicum," "History of Bible Plants," etc., etc.

For more than forty years Mr. Smith was connected with the Royal Gardens, Kew, which gave him remarkable opportunities for becoming acquainted with the largest collection of living plants, native and exotic, ever brought together; and from 1846, he was associated with the late Sir. W. Hooper in building up the Kensington Museum of Economic Botany. Based on all this experience, Mr. Smith has produced this Dictionary which gives under their popular names information about plants that furnish the wants of man, their history, products and uses. Having received a large invoice of this book from the London publisher, we offer to mail copies postpaid at a discount.

ing to note that these have been materially modified recently, as shown by column (7). Formerly they were exceedingly unsatisfactory. It will be seen that the most satisfactory argument lies in columns (3) and (6); but since column (6) is for a ventilated psychrometer, and the readings used were unventilated, we must conclude that the chemical method for obtaining vapor pressure, as given by this investigation, does not agree with the condensing

hygrometer. It is much to be regretted that comparisons were not instituted between the chemical method, the sling psychrometer, and the condensing hygrometer. This paper is a valuable addition to our knowledge of chemical methods, and narrows down the remaining unexplored field of research for measuring the moisture of the air.

### A New Method of Treating Disease. HOSPITAL REMEDIES.

What are they? There is a new departure in the treatment of disease. It consists in the collection of the specifics used by noted specialists of Europe and America, and bringing them within the reach of all. For instance, the treatment pursued by special physicians who treat indigestion, stomach and liver troubles only, was obtained and prepared. The treatment of other physicians celebrated for curing catarrh was procured, and so on till these incomparable cures now include disease of the lungs, kidneys, female weakness, rheumatism and nervous debility.

This new method of "one remedy for one disease" must appeal to the common sense of all sufferers, many of whom have experienced the ill effects, and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which, as statistics prove, has ruined more stomachs than alcohol. A circular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole proprietors.

**CATARRH.**

**Catarrhal Deafness—Hay Fever.**

A NEW HOME TREATMENT.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been formulated whereby catarrh, catarrhal deafness and hay fever are permanently cured in from one to three simple applications made at home by the patient once in two weeks.

N.B.—This treatment is not a snuff or an ointment; both have been discarded by reputable physicians as injurious. A pamphlet explaining this new treatment is sent free on receipt of stamp to pay postage, by A. H. Dixon & Son, 337 and 339 West King Street, Toronto, Canada.—*Christian Advocate.*

! Sufferers from Catarrhal troubles should carefully read the above.
