

BOOK-REVIEWS.

Electricity in Modern Life. By G. W. TUNZELMANN. New York, Scribner & Welford. 12°. \$1.25.

THIS is the second volume of the Contemporary Science Series, a series of inexpensive and handy illustrated books intended to bring within the reach of the general public the "best that is known and thought in all departments of modern scientific research." The scope of the series is broad, but the character of the few volumes issued (some of which have been already noticed in these columns), and the high standing of the writers engaged on forthcoming works, are a guaranty that the subjects are and will be not only well selected, but ably handled.

Owing to the prominent place now occupied by electrical science, it will be readily understood that Professor Tunzelmann's volume is one of the most important in the series. For this reason much will be expected of it; more, perhaps, than should be looked for in a work of its modest size. The field is so large, the ramifications of the subject are so many, and the connections with kindred subjects are so close and so complicated, that the author's work was doubly difficult; but it must be admitted that he has succeeded in giving us a volume fulfilling every requirement of the prospectus quoted above. The more important of the many useful functions of electricity in our daily life, the scientific principles underlying its practical applications, and the history of their development, are briefly but clearly sketched.

Being intended primarily for the use of readers without previous knowledge of the subject, it begins with the familiar but necessary sealing-wax and glass-rod phenomenon, and leads the reader step by step to the modern commercial applications of electricity, as exemplified in the telegraph, telephone, lighting, and the transmission of power. None of the many modern uses to which electrical energy has been adapted appears to have been neglected, though of course the space devoted to many of them is brief. There are errors in the book, more or less important, ac-

cording to the point from which they are viewed. They will attract the attention of the electrician and the engineer, and have doubtless been pointed out to the author ere this, but they will scarcely detract from the value of the volume for those for whom it is intended.

Evolution and Disease. By J. BLAND SUTTON. New York, Scribner & Welford. 12°. \$1.25.

To demonstrate that there is a natural history of disease as well as of plants and animals was the object the author had in mind in writing this book. The science of disease, or pathology, is generally regarded as of interest only to medical men; yet it is but a department of biology, and should therefore be studied by all who desire to make themselves masters of this science. The basis of the author's argument is, that, as there has been a gradual evolution of complex from simple organisms, it necessarily follows that the principles of evolution ought to apply to diseased conditions if they hold good for the normal or healthy states of organisms: in plain words, there has been an evolution of disease *pari passu* with evolution of animal forms. The author recognizes the difficulty of the task which he has set himself to perform. He thinks that a more extended study will serve to show that many of his conclusions are fallacious, and he candidly invites corrections from all who have opportunities of practically testing his theories. He has certainly succeeded in presenting his subject in a most attractive form, and has apparently succeeded in sustaining the points which he has made. We shall, however, before accepting his claims as proven, wait until his theories have been more fully tested.

A Course of Lectures on the Growth and Means of Training the Mental Faculty. By FRANCIS WARNER. Cambridge, Eng., University Pr. 16°. 90 cents.

THE title of this book is a misnomer, there being very little in it about mental faculty. Dr. Warner's views of human na-

ture are very frankly and decidedly materialistic. He says that he has "found it convenient to omit from the definitions and descriptions here used all terms implying subjective conditions which are incapable of direct observation by our senses" (p. 37). In another place he speaks of "the physical action called 'thought'" (p. 39); and again he expresses the opinion that "thought consists in the formation of the union of cells whose motor or efferent action produces expression of the thought" (p. 40). A considerable part of the book is taken up by general discussions about the brain, the body, and the life of animals and plants, much of which has no bearing on the ostensible subject of the work. Whenever we come to the essential part of the book, we find it to be in the main a study of abnormal and pathological states of young children, with advice as to the best mode of dealing with them. On these points he shows abundant knowledge, and makes suggestions that we should think teachers would find useful. He is specially concerned for children that have some mental or physical defect, and points out how faults of temper, as well as inattention and idleness, often arise from physical defect or from weariness. At the end of the book is a catalogue of a museum of natural history, such as the author has found useful in giving instruction, and which will doubtless be interesting to teachers.

AMONG THE PUBLISHERS.

THE question of hours of labor is discussed by Gen. Walker in the *Atlantic* for June. This and Hannis Taylor's consideration of "The National House of Representatives: Its Growing Inefficiency as a Legislative Body," are the two articles which make up the solid reading of the number.

—"With Fly-Rod and Camera" is the title of an elaborately illustrated work announced for immediate publication by the Forest and Stream Publishing Company. The author is Edward A. Samuels of Boston. The book contains 150 full page reproductions of photographs, to the collection of which Mr. Samuels has devoted the vacations of several years on the picturesque salmon rivers of Canada.

—The size of the *American Machinist* has been increased to twenty pages, the four pages thus added being divided between

readers and advertisers. On and after June 1, 1890, the subscription price will be increased to three dollars a year, and the newsstand retail price to six cents a copy.

—Not all new things come from the effete East. The Bannack and Crow Indians and other tribes in the northern Rockies are laboring with an extraordinary delusion that Christ has come to earth, and is now in the Big Horn Mountains, somewhere between Fort Custer and Fort Washakie, Wyoming Territory. Gen. James S. Brifbin, U.S.A., commanding in Montana, has in the *New York Ledger* of May 17 an interesting letter concerning the hallucination, and giving full and interesting details about it.

—Messrs. Houghton, Mifflin, & Co. have in preparation an entirely new and complete large-paper edition of the writings of James Russell Lowell. These have been re-arranged by Mr. Lowell, and will appear in volumes not bearing the titles by which his works have heretofore been known, but titles suggested by the new classification. Thus there will be "Literary Essays," in four volumes; "Political Essays," in one volume; "Literary and Political Addresses," in one volume; "Poems," in four volumes. These will comprise all of Mr. Lowell's writings up to date which he wishes to preserve, and will include several addresses, etc., not contained in his volumes hitherto published. Mr. Lowell has carefully revised the whole, prose and poetry. To "The Biglow Papers," which owed their great effectiveness, at the time of their publication, to their many personal and political allusions almost as much as to their wit, full explanatory notes are added, which will render these remarkable papers more intelligible to readers of this and future generations. Thus his writings in this issue will bear the form which he regards as final, and which for the future will represent his definitive contribution to the world's literature.

—In the Department of Arizona, on May 17, Lieut. Wittenmeyer succeeded in signalling a message by a signal-flash 125 miles from Mount Reno, near Fort McDowell, to Mount Graham, near Fort Grant, where it was received by Capt. Murray. The latter, by turning his instrument, flashed the message to Fort Huachuaca, a distance of 90 miles, making a distance of 215 miles with only one intervening station. This is the best work yet accomplished in heliography, the longest distance heretofore made with a signal-flash being only about 70 miles.

SCOTT'S EMULSION

Of Pure Cod Liver Oil with
Hypophosphites
Of Lime and Soda.

There are emulsions and emulsions, and there is still much skimmed milk which masquerades as cream. Try as they will many manufacturers cannot so disguise their cod liver oil as to make it palatable to sensitive stomachs. Scott's Emulsion of PURE NORWEGIAN COD LIVER OIL, combined with Hypophosphites is almost as palatable as milk. For this reason as well as for the fact of the stimulating qualities of the Hypophosphites, Physicians frequently prescribe it in cases of

CONSUMPTION,

SCROFULA, BRONCHITIS and
CHRONIC COUGH or SEVERE COLD.
All Druggists sell it, but be sure you get
the genuine, as there are poor imitations.

A New Method of Treating Disease.

HOSPITAL REMEDIES.

What are they? There is a new departure in the treatment of disease. It consists in the collection of the specifics used by noted specialists of Europe and America, and bringing them within the reach of all. For instance, the treatment pursued by special physicians who treat indigestion, stomach and liver troubles only, was obtained and prepared. The treatment of other physicians celebrated for curing catarrh was procured, and so on till these incomparable cures now include disease of the lungs, kidneys, female weakness, rheumatism and nervous debility.

This new method of "one remedy for one disease" must appeal to the common sense of all sufferers, many of whom have experienced the ill effects, and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which, as statistics prove, has ruined more stomachs than alcohol. A circular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole proprietors.

CATARRH

Catarrhal Deafness—Hay Fever.

A NEW HOME TREATMENT.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been formulated whereby catarrh, catarrhal deafness and hay fever are permanently cured in from one to three simple applications made at home by the patient once in two weeks.

N.B.—This treatment is not a snuff or an ointment; both have been discarded by reputable physicians as injurious. A pamphlet explaining this new treatment is sent free on receipt of stamp to pay postage, by A. H. Dixon & Son, 337 and 339 West King Street, Toronto, Canada.—*Christian Advocate*.

Sufferers from Catarrhal troubles should carefully read the above.

JUST OUT.

Speech Reading and Articulation Teaching.

By A. MELVILLE BELL.

Price, 25 Cents.

Practical Instructions in the Art of Reading Speech from the Mouth; and in the Art of Teaching Articulation to the Deaf.

[This Work—written at the suggestion of Miss Sarah Fuller, Principal of the Horace Mann School for the Deaf, Boston, Mass—is, so far as known, the first Treatise published on "Speech Reading."]

From *Principals of Institutions for the Deaf*.

"Admirable in its conciseness, clearness and freedom from technicality."
"The simplicity and perfection of this little book."
"Full of exact and helpful observations."
"A very interesting and valuable work."
"The rules are clearly given and will be of great utility."
"Every articulation teacher should study it."
"A model of clearness and simplicity, without having any of the puzzling symbols that trouble the common mind."
"The exercises given in speech-reading from the lips are especially interesting, and of great importance for the student of phonetics."
—*Modern Language Notes*.

DO YOU INTEND TO BUILD?

We offer an Atlas of Sensible Low Cost Houses, a portfolio 11x14 inches, containing handsome illustrations, floor plans, and full descriptions of this popular design, and fifty-four others, ranging in cost from \$800 to \$7,200. This specimen design is for a cottage with seven rooms, and costing \$1,100. It combines beauty and comfort, has two large porches, and is a popular and practical working design, having been built several times for its estimated cost.

No matter what style of a house you may intend to build, it will pay you to have this book.
We will send this Atlas, postpaid, on receipt of price, \$1.—N. D. C. Hodges, 47 Lafayette Place, New York.

THIS DIAL

Consists of a strong cardboard, 5½ by 4 inches, with movable metal hands, and is useful for mothers of infants to record the hour of last nursing, and thus attain regularity in feeding. Serviceable also for teaching time to little children, and as a toy in various plays. Mailed on receipt of 10 cents, by

"BABYHOOD,"
5 Beekman Street, New York.

RUPTURE

cured in stipulated time.

NO DELAY FROM WORK. NO OPERATION.

Call or send stamp for circular and reference of those cured. We have on hand over 300 styles of trusses, from \$1 up, and suspensories of all kinds. Orders filled by mail or express to any part of the United States.

C. A. M. BURNHAM, M.D.,
138 Clinton Place, New York.

Wants.

Any person seeking a position for which he is qualified by his scientific attainments, or any person seeking some one to fill a position of this character, be it that of a teacher of science, chemist, draughtsman, or what not, may have the "Want" inserted under this head FREE OF COST, if he satisfies the publisher of the suitable character of his application. Any person seeking information on any scientific question, the address of any scientific man, or who can in any way use this column for a purpose consonant with the nature of the paper, is cordially invited to do so.

ARCHITECTURAL DRAUGHTSMAN, of four years' practical experience, wants employment during the four months' summer vacation of the Mass. Institute of Technology. Best of references, including former employer. Address I. M. BARROWS, 50 Union Park, Boston, Mass.

AN OHIO STATE UNIVERSITY graduate desires a position for next year as laboratory assistant or instructor in chemistry and physics. Three years' special preparation for such work. Two years' experience in teaching. References as to character and scholarship. Address C. S. ARNOLD, O. S. U., Columbus, O.

WANTED.—At the BRYANT SUMMER SCHOOL, Roslyn, L. I., THREE professors to teach Sciences, Languages, Mathematics, etc. July 8-Sept. 8. Also, a six months' term beginning now. Other papers please copy. E. HINDS, A.M., Principal.

GRADUATE of Princeton, for several years university student and Fellow in Biology, desires a position either to teach biology or as assistant in a biological laboratory. Would prefer the latter and be satisfied with a moderate salary if the position afforded time for the prosecution of original research. Address, O. S., BOX 86, Princeton, N. J.

THE ADVERTISER—A Third Year Student in Honor Sciences at Toronto University, is willing to take position as Science Teacher or Tutor until next October. Enthusiastic and practical instructor in Biology, Chemistry, Physics, Mineralogy and Geology. Latin and Greek and other branches additional if required. Young, good family. References as to character and ability. CHEMIA, UNIV. COLL., TORONTO.

WANTED—Information concerning the production of Mushrooms in caves and other places. Address M. H. CRUMP, care Ky. Theological Sem'y, Frankfort, Ky.

ASSAYER.—Wanted position as above, has had three years' practical experience in a London firm of assayers to the Bank of England, Royal Mint, etc., etc. Thorough knowledge of bullion assaying, and of gold, silver and lead ores. I. FRED. JOHNSON, Northgate Brewery, Canterbury England.

WANTED—Two first-class Instrument Makers. Apply by letter to T. C. MENDENHALL, Superintendent United States Coast and Geodetic Survey, Washington, D.C.

AN EXPERIENCED Technical Chemist will be open to engagement this summer. Highest references. Address DIRECTOR, Office of SCIENCE.

PROF. WILLIAM FINDLAY, of the Philadelphia Institute of Physical Culture, is open to engagement in summer school to teach Free Movements, Wands, Clubs, Dumb-bells, Fencing and Sparring. Address 1,009 Arch St., Phila., Pa.

Exchanges.

[Free of charge to all, if of satisfactory character. Address N. D. C. Hodges, 47 Lafayette Place, New York.]

Meteorites.—Mr. George F. Kunz, 11 to 15 Union Square, New York, or Hoboken, N. J., will buy or give in exchange for whole or parts of meteorites. Whole ones, undescribed ones, and entire falls especially desired.

Wanted—To furnish roots of *Dodecatheon Meadia*, *Sarracenia purpurca*, and other wild flowers, native of Southern Wisconsin, in quantities. D. E. Willard, Curator of Museum, Albion Academy, Albion, Wis.

A large number of plants from Maine, Connecticut, Indiana and Illinois for exchange. Southern and western exchanges preferred. Address, enclosing lists, L. N. Johnson, 223 Chicago Ave., Evanston, Ill.

For Exchange—Fourteen volumes *Encyclopaedia Britannica* (Stoddard's ninth edition), bound in leather—part in original wrappers, all as new—can arrange to furnish volumes required to complete set, and six volumes "American Naturalist" in numbers. Want small screw-cutting foot lathe and testing galvanometer and rheostat. For particulars address A. B. Campbell, McKean Co., Bradford, Pa.

I have a number of duplicates of microscopic slides, mostly botanical, which I would like to exchange for others not now in my collection. Send list of what you have to exchange and get my list. S. R. Thompson, New Wilmington, Pa.

Correspondence and exchanges solicited with persons interested in the study of American and Mexican antiquities. L. W. Gunkel, 36 Elm St., New Haven, Conn.
