

Aryan race to the writings of mediæval days. The author reviews the labors of Sanscrit scholars in this vast field of literature, and then gives a survey of the great Indian epics, whose character and scope are illustrated by copious extracts. Her work has elicited the cordial interest of such authorities as Professor Max Müller and Sir Monier Williams, professor of Sanscrit in Oxford University; and the latter has done her the high honor of revising the chapter on "Krishna."

—Messrs. E. & F. N. Spon announce as nearly ready, "Mining and Ore Dressing Machinery," by C. G. Warnford Lock, being a comprehensive treatise dealing with the modern practice of winning both metalliferous and non metalliferous minerals, including all the operations incidental thereto, and preparing the product for the market; and as just published "Waterways and Water Transport in Different Countries, with a Description of the Panama, Suez, Manchester, Nicaraguan, and other Canals," by J. Stephen Jeans. The purpose of this latter volume is to deal with water-transport only, and more particularly that part of water-transport which is carried on by means of artificial waterways. A good deal of attention has been given in this work to the subject of isthmian canals; and in the appendix will be found a large mass of information as to the extent of the British canal system, and the dates at which the principal canal and river navigations were executed.

—The following announcement by the D. Van Nostrand Company is made regarding their Science Series. No. 9 of the series, "Fuel," by C. William Siemens, is now out of print, but it is to be entirely rewritten and very much enlarged by Mr. Arthur V. Abbott. The additional matter will take up the subject of gas and petroleum as fuel; while the chapter on artificial fuel, by John Wornald, will be retained, with some new matter. Tables will be added, so as to increase the value of the work to students in general. The title of the new edition of No. 57, which will be

ready soon, will be "Incandescent Electric Lighting: A Practical Description of the Edison System, by L. H. Latimer, to which is added the Design and Operation of Incandescent Stations by C. J. Field, and a Paper on the Maximum Efficiency of Incandescent Lamps by John W. Howell." The same firm have in preparation a translation of Dr. Otto Dziobek's "Mathematical Theories of the Motion of the Planets."

—The *Quarterly Journal of Economics*, published for Harvard University by George H. Ellis, Boston, begins its fifth volume with the number for October. The number will contain papers by Professor A. G. Warner of Nebraska, on "Some Experiments in Behalf of the Unemployed," describing interesting experiments in the United States, Germany, and Holland; by Professor S. M. Macvane of Harvard University, on "The Discussion of Value and Wages in the Recent Great Work of Boehm-Bawerk, the Austrian economist;" by Chauncey Smith, of the Boston bar, on "A Century of Patent Law," an account of the patent law of the United States and of its working during the last hundred years; and by Henry Hudson, on "The Southern Railway and Steamship Association." In addition, there will be the usual list of recent publications on economics, and general notes and memoranda, among which is a description, by Herr Stephan Bauer of Vienna, of recent discoveries by him of unpublished material on the French economists.

—Messrs. Funk & Wagnalls send us two numbers of their series of "American Reformers." The first is a life of "Wendell Phillips the Agitator," by Carlos Martyn, and is not a good beginning of the series. It gives, indeed, a large amount of information not only about Phillips himself, but also about the anti-slavery agitation and other movements in which he was engaged, and contains many extracts from his speeches. But the author's style is full of "gush" and magniloquent expressions, such as would have been displeasing to Phillips himself, and will be equally so to every

PRACTICAL ELECTRICAL NOTES AND DEFINITIONS.

For the use of engineering students and practical men by W. P. MAXCOCK, together with Rules and Regulations to be observed in Electrical Installation Work, with diagrams. 130 pages, 32mo, cloth, 60 cts. E. & F. N. SPON, 12 Cortlandt St., New York.

TO BE READY OCT. 18.

HOUSEHOLD HYGIENE.

By MARY TAYLOR BISSELL, M.D., NEW YORK.

12°. 75 cents.

"This little volume has been compiled with the hope that the housekeeper of to-day may find in its pages a few definite and simple suggestions regarding sanitary house-building and house-keeping which will aid her to maintain in her own domain that high degree of intelligent hygiene in whose enforcement lies the physical promise of family life" (author's preface).

TIME RELATIONS OF MENTAL PHENOMENA.

By JOSEPH JASTROW, PROFESSOR OF PSYCHOLOGY AT THE UNIVERSITY OF WISCONSIN.

12°. 50 cents.

It is only within very recent years that this department of research has been cultivated; and it is natural that the results of different workers, involving variations in method and design, should show points of difference. In spite of these it seems possible to present a systematic sketch of what has been done, with due reference to the ultimate goal as well as to the many gaps still to be filled.

RACES AND PEOPLES.

By DANIEL G. BRINTON, M.D.

This book is a review of the whole domain of ethnography, with particular attention to the white or European race, the Aryan peoples, their origin and distribution. The latest opinions of the leading European scholars have been consulted, but the work is largely the result of independent research, and does not follow any especial school of ethnographers.

Price, postpaid, \$1.50.

cultivated reader. The other book, "Horace Greeley the Editor," by Francis Nicoll Zabriskie, is a better work. The author, in our opinion, has too high an estimation of his hero, yet he exposes Greeley's faults, and perhaps says a little too much about his eccentricities. On the whole, though it bears, like Mr. Martyn's work, the marks of too great haste in writing, it will serve a purpose as a popular biography of Greeley. Let us hope, however, that the authors of the remaining books of the series will all use a sober and simple style, with careful avoidance of rhetoric.

— "English Sanitary Institutions, Reviewed in their Course of Development, and in Some of their Political and Social Relations," is the title of a volume by Sir John Simon, K.C.B., which the Cassell Publishing Company announce. The book is the result of some twenty-eight years' experience and of various official relations to the business of sanitary government. The author has written for the lay as well as the professional reader, and has as far as possible avoided technicality in the expression of his views.

— The contributors to the October *Magazine of American History* present a rare combination of eminence in the scholarly world. The number opens with a paper on the "Sources and Guarantees of National Progress," by Rev. Dr. R. S. Storrs of Brooklyn. This is prefaced by a portrait of the distinguished author, and, occupying twenty-eight of the pages of this periodical, is from first to last a procession of brilliant passages, clear, forcible, suggestive, showing what principles developed the little settlements into a great nation, whose future history is as secure as the past if only that moral life remains which characterized the founders of empire on this continent. The second paper, entitled

"The American Flag and John Paul Jones," is from the pen of Professor Theodore W. Dwight of the Columbia Law School, New York. "Southold and her Homes and Memories," one of Mrs. Lamb's entertaining articles, is illustrated with antique dwellings of one of the oldest towns on the continent. "The Historic Temple at New Windsor, 1788," together with a curious picture recently discovered, comes from the well-known jurist, Hon. J. O. Dykman. "About Some Public Characters in 1786," we have a readable group of extracts from the private diary of Sir Frederick Haldimand. The "General Characteristics of the French Canadian Peasantry," by Dr. Prosper Bender, furnishes much interesting data on a theme of present interest. "The Mountains and Mountaineers of Craddock's Fiction," by Milton T. Adkins; "Anecdotes of Gen. Grenville M. Dodge," by Hon. Charles Aldrich; "The Story of Roger Williams retold," by H. E. Banning; "Antiquarian Riches of Tennessee;" and the several departments of miscellany,—follow. This magazine is in close sympathy with current affairs.

— Mr. T. Wemyss Reid, the biographer of the Right Hon. W. E. Forster, has performed an equally friendly office for the late Richard Monck-Milnes (Lord Houghton). "The Life, Letters, and Friendships" of this poet will form the subject of two volumes which the Cassell Publishing Company have now in press.

— The Johns Hopkins University has issued a pamphlet on "The Study of History in Holland and Belgium," by Paul Frédéricq, translated from the French by Henrietta Leonard. The same author had previously described the methods of historical teaching in England, France, and Germany, and he here endeavors to apply

Dyspepsia

Horsford's Acid Phosphate.

In dyspepsia the stomach fails to assimilate the food. The Acid Phosphate assists the weakened stomach, making the process of digestion natural and easy.

Dr. R. S. McComb, Philadelphia, says:

"Used it in nervous dyspepsia, with success."

Dr. W. S. LEONARD, Hinsdale, N. H., says:

"The best remedy for dyspepsia that has ever come under my notice."

Dr. T. H. ANDREWS, Jefferson Medical College, Philadelphia, says:

"A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia"

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

A Cure for CATARRH.

Mrs. A. S. CHASE, of Jamaica Plains, Mass., one of our professional nurses, writes:

"Its work as a purifier of air is so absolute as to place its value beyond all other inventions, since this, as a preventive of disease, is the greatest work before us. I am convinced there is no place within doors that it will not purify and keep pure. My catarrh trouble has found great relief from its use, and I confidently expect with persistent use a permanent cure."

From A. B. PUTNAM, Holyoke, Mass., who had been troubled for 20 years:

"I continue to use the Vaporizer, and would not part with it for one hundred dollars if I could not get another. I consider it the best remedy for Catarrh ever invented, and wish you all the success that you are entitled to for so great an invention."

Illustrated Pamphlet, with testimonials, free. SELF-ACTING. Each Vaporizer sold charged for use. No care except to replenish once in two months at expense of 4 to 8 cents, according to size. Three sizes, \$3.50, \$5, \$8.

SHERMAN "KING" VAPORIZER COMPANY, Chicopee Falls, Mass.; Boston, New York, Philadelphia, or Chicago.
