

throughout his book. In discussing the relations of mind and body, he rejects both spiritualism and materialism, and maintains the doctrine that matter and spirit are the two aspects of some third entity different from either; yet he is obliged to confess that no such third substance is known to us, so that the assumption of its existence seems to be only a way of evading a difficulty. In dealing with ideas and feelings, he endeavors, like other associationists, to derive them all from sensation; but, as the more important of them refuse to lend themselves to this interpretation, he is obliged to assume a "mental chemistry" by which sensations are transmuted into something radically different from themselves. Yet he gives no proof that any such transmutation ever takes place, so that this theory also is merely a way of evading a problem which the association principle cannot solve. In spite, however, of his predilection for the association principle, he is not able to adhere to it rigidly, but adopts some views that are inconsistent with it. This is specially apparent in his account of our notion of space, which he thinks cannot be explained by sensation and association; so that, after discussing the various theories, he ends by adopting one not essentially different from that of Kant. In short, Professor Höffding's work reflects the present unsettled and sceptical state of philosophy; and it is safe to say that such a work could not have been written thirty years ago, and that no such work will be written thirty years hence. Nevertheless, there is much in it that students of the subject will like to read, and it

will doubtless stimulate thought in many who disagree with its conclusions.

*Chapters on the Theory and History of Banking.* By CHARLES F. DUNBAR. New York, Putnam. 12°. \$1.25.

THIS is an excellent book. It was originally prepared as a course of lectures to college students, and throughout the work the wants of beginners are kept in mind. Yet it is by no means confined to the mere rudiments of the subject, but contains about all the information that most readers will require. Professor Dunbar begins with the simplest cases of deposit and discount, and then proceeds to explain all the operations commonly carried on by banks, including the various kinds of loans and the issue of notes; and he succeeds in making the subject plainer than we have ever seen it made before. He devotes some space to showing the real character of the transaction known as discounting bills, and also points out the analogies that exist between notes and deposits. Numerous brief examples of banking accounts make the subject more intelligible; and the student who uses this book faithfully can hardly fail to get a good general idea of the nature and operations of a bank. After the descriptive and theoretical passages come several chapters on the history of banking, beginning with the Bank of Amsterdam, and tracing the outlines of the subject to the present day. The Banks of England, France, and Germany, with the peculiarities of each, are described, and

"The Week, one of the ablest papers on the continent."—*Descriptive America.*

## THE WEEK,

A Canadian Journal of Politics, Literature, Science and Art.

PUBLISHED EVERY FRIDAY.

\$3.00 per Year. \$1.00 for Four Months.

THE WEEK has entered on its EIGHTH year of publication, greatly improved in every respect, rendering it more worthy the cordial support of every one interested in the maintenance of a first-class literary journal.

The independence in politics and criticism which has characterized THE WEEK ever since its first issue will be rigidly maintained; and unceasing efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now, or have promised to become, contributors to its columns, and the constant aim of the Publisher will be to make THE WEEK fully equal to the best literary journals in Britain and the United States.

As heretofore, PROF. GOLDWIN SMITH will, from time to time, contribute articles. London, Paris, Washington and Montreal letters from accomplished correspondents will appear at regular intervals. Special Ottawa Letters will appear during the sessions of Parliament.

THE WEEK being the same size as "Harper's Weekly," is the largest paper of its class on the continent.

*The French Invasion of Ireland in '98.* By VALERIAN GRIBAYE-DOFF. New York, Truth Seeker Company. 8°. \$1.50.

THIS interesting work is not only a strong "side-light" on the times, persons, and places of which it treats, but also an important footnote to the history of Europe. It is well written and easily read; and the many authorities quoted or referred to prove that there was no lack of material from which to compile a truthful narrative of one of the many extraordinary episodes of the French Revolution. The greater events taking place at the time, Bonaparte and his doings then furnishing more than ample material for historians, crowded out or overshadowed the fact that Gen.

Humbert, with a handful of French soldiers (little more than a thousand), penetrated to the heart of Ireland, held his own for several weeks against vastly superior numbers, and conquered an entire province before he was finally compelled to surrender to overwhelming odds. And the reasons why the apparently quixotic expedition failed of its purpose, or at least did not achieve a greater measure of success, are apparent to all who peruse this narrative, and at the same time consider the course of recent events in Ireland and the erratic actions of some of the present leaders in Irish political affairs.

The interest in the stirring events narrated in this volume will be enhanced by the fact that the commander of the expedition, Gen. Humbert, afterwards became an American citizen, served with honor in the war of 1812, and distinguished himself at the battle of New Orleans, where, by one of the coincidences of warfare, he found himself opposed to some of the English officers who had contributed to his defeat in Ireland.
