of the science treated, but many methods of preparation of the most important derivatives of the different classes of bodies are given. The new edition contains additions to the methods of analysis described in the first, and naturally due references to the recent advances in chemical theory. The section on carbohydrates has been entirely rewritten and brought into agreement with the present views. Professors Ostwald, von Baeyer, and Emil Fischer aided the author in the presentation of the material drawn from their special fields of investigation. The book will be to some extent available as a text-book, but its considerable size will make it more useful as a guide in the laboratory and as a volume of reference to the advanced student.

— In the *Review of Reviews* each month the pages of small print at the end of the periodical contain classified lists of all the new books that have lately appeared, with bits of running comment on them; lists of the contents of all the principal periodicals of America, England, France, Germany, Italy, Belgium, and the Scandi-

navian countries; and a complete index, which under one alphabet lists the important articles that have appeared in the previous month in every important periodical published in the English language.

— The opening article of *The Century* for October is the closing one of Mr. Kennan's series, and is entitled "My Last Days in Siberia." He describes his experiences among the Kachinski Tatars and the political exiles of Minusinsk, and with the "plague-guard" or quarantine, and narrates the journey by way of Tobolsk and Tiumen to St. Petersburg. The promised article by Hiram S. Maxim, the inventor, on "Aerial Navigation" appears in this number, and considers particularly the question of the power required for aviation. Mr. Maxim discusses the philosophy of the subject and relates the progress of his experiments at Kent, England, which are illustrated with drawings of the machine employed. He also adds a forecast of the possible future uses of the new mode of locomotion.

"The story is a piquant, good-humored, entertain-  
ing narrative of a canoe voyage. A neater, prettier  
book is seldom seen."—*Literary World*.

"This is a sprightly narrative of personal inci-  
dent. The book will be a pleasant reminder to  
many of rough experiences on a frontier which is  
rapidly receding."—*Boston Transcript*.

"The picture of our desolate North-western terri-  
tory twenty-five years ago, in contrast with its  
civilized aspect to-day, and the pleasant features of  
the writer's style, constitute the claims of his little  
book to present attention."—*The Dial*.

and America."—*Brighton (Eng.) Herald*.

## THE MODERN MALADY; or, Suf- ferers from 'Nerves.'

An introduction to public consideration,  
from a non-medical point of view, of a con-  
dition of ill-health which is increasingly  
prevalent in all ranks of society. In the  
first part of this work the author dwells on  
the errors in our mode of treating Neurast-  
henia, consequent on the wide ignorance of  
the subject which still prevails; in the sec-  
ond part, attention is drawn to the principal  
causes of the malady. The allegory forming  
the Introduction to Part I. gives a brief his-  
tory of nervous exhaustion and the modes of  
treatment which have at various times been  
thought suitable to this most painful and try-  
ing disease.

### IV. THE CHEROKEES IN PRE-CO- LUMBIAN TIMES. By CYRUS THOMAS. 12°. \$1.

Dr. Thomas has already presented to the public  
some reasons for believing the Cherokees were  
mound-builders, but additional evidence bearing  
on the subject has been obtained. A more careful  
study of the Delaware tradition respecting the Tal-  
legwi satisfies him that we have in the Bark Record  
(Walum Olum) itself proof that they were Chero-  
kees. He thinks the mounds enable us to trace back  
their line of migration even beyond their residence  
in Ohio to the western bank of the Mississippi. The  
object is therefore threefold: 1. An illustration of  
the reverse method of dealing with prehistoric sub-  
jects; 2. Incidental proof that some of the Indians  
were mound-builders; 3. A study of a single tribe in  
the light of the mound testimony. This work will be  
an important contribution to the literature of the  
Columbian discovery which will doubtless appear  
during the coming two years.

"A valuable contribution to the question, 'Who  
were the mound-builders?' "—*New York Times*.

"Professor Cyrus Thomas undertakes to trace  
back the evidences of a single Indian tribe into the  
prehistoric or mound-building age."—*N. Y. Sun*.

"An interesting paper."—*Christian Union*.

### V. THE TORNADO. By H. A. HAZEN.

"The little book is extremely interesting."—*Bos-

"A book which will find many readers. The  
chapter on 'Tornado Insurance' is of interest to  
all property-holders in the tornado States."—*Boston  
Herald*.

"The 'Tornado' is a popular treatise on an impor-  
tant province of meteorology, in which science, the  
author, Professor Hazen of the United States Signal  
Service, may be regarded as an expert."—*Philadel-  
phia Ledger*.

### VI. TIME-RELATIONS OF MENTAL PHENOMENA. By JOSEPH JASTROW. 12°. 50c.

"All students of psychology will find the book full  
of interesting facts. Professor Jastrow's good qual-  
ities as a thinker and as a writer are too well and  
too widely known to require comment."—*Public  
Opinion*.

"A useful work for psychologists—as well as the  
general reader—by setting forth in brief and easily  
intelligible form the present state of knowledge in  
regard to the time required for the performance of  
mental acts."—*The Critic*.

### VII. HOUSEHOLD HYGIENE. By
