

biography will be a valuable contribution to the history of the last half-century of our national life. The second volume of "Hermetic Philosophy," by Styx of the "H. B. of L." will soon be issued by the same publishers. As in the first volume, it includes lessons, general discourses, and explanations of "Fragments" from the schools of Egypt, Chaldea, Greece, Italy, etc., and is a continuation of the line of thought treated in that work. One of the acquisitions to medical literature of the year will be the new edition of Professor Roberts Bartholow's "Hypodermatic Medication," about to be issued from the press of the same company.

—The J. B. Lippincott Company of Philadelphia have published an octavo volume entitled "Harmony of Ancient History," by Malcomb Macdonald. It is an attempt to determine the dates of the best known events in Oriental History and to harmonize the chronology of the Egyptians with that of the Jews. Our knowledge of Egyptian chronology was formerly confined to the statements of the Greek historian Manetho, but we now have the testimony of the Egyptian monuments to aid us; yet the best modern authorities differ by many centuries as to the dates of Egyptian kings. On the other hand, the Bible chronology, besides being sometimes inconsistent with itself, is not in accord with that of Egypt and other nations, and the result is a mass of doubt and confusion. Mr. Macdonald has here endeavored to fix the dates of some Egyptian kings by means of astronomical phenomena recorded on the monuments whose occurrence our modern astron-

omy enables us to verify. He then proceeds to the Jewish chronology with the avowed purpose of showing that it harmonizes with that of Egypt and Assyria; and he claims for his scheme that "there is not one single chronological statement in the Bible from which it does not remove all improbability." To attain this end, however, he is obliged to resort to some devices and interpretations that seem forced and arbitrary, and he admits that "the whole scheme rests largely on circumstantial evidence." For our part we doubt if any reconciliation of the ancient chronologies is possible, the gaps in the monumental records being so great and other ancient histories so largely mythical as to preclude a satisfactory solution of the problem; but Mr. Macdonald has made an elaborate attempt at such reconciliation, and we leave the criticism of his work to those who have made a special study of the subject.

—The newest of important educational movements, "University Extension," will have first place in the *Popular Science Monthly* for November. The article is by Professor C. Hanford Henderson, and, after sketching what has been done in England, it describes the beginning that has been made in this country, and tells the plans of the extension organizers for the future. In the same number Mr. W. F. Durfee will conclude his contributions to the series of illustrated articles on the development of American industries with a paper on "The Manufacture of Steel." This paper completes the account of the Bessemer process, and proves

THE MODERN MALADY; or, Suf- ferers from 'Nerves.'

An introduction to public consideration,
from a non-medical point of view, of a con-
dition of ill-health which is increasingly
prevalent in all ranks of society. In the
first part of this work the author dwells on
the errors in our mode of treating Neurast-
henia, consequent on the wide ignorance of
the subject which still prevails; in the sec-
ond part, attention is drawn to the principal
causes of the malady. The allegory forming
the Introduction to Part I. gives a brief his-
tory of nervous exhaustion and the modes of
treatment which have at various times been
thought suitable to this most painful and try-
ing disease.

IV. THE CHEROKEES IN PRE-CO- LUMBIAAN TIMES. By CYRUS THOMAS. 12°. \$1.

Dr. Thomas has already presented to the public
some reasons for believing the Cherokees were
mound-builders, but additional evidence bearing
on the subject has been obtained. A more careful
study of the Delaware tradition respecting the Tal-
legwi satisfies him that we have in the Bark Record
(Walam Oium) itself proof that they were Chero-
kees. He thinks the mounds enable us to trace back
their line of migration even beyond their residence
in Ohio to the western bank of the Mississippi. The
object is therefore threefold: 1. An illustration of
the reverse method of dealing with prehistoric sub-
jects; 2. Incidental proof that some of the Indians
were mound builders; 3. A study of a single tribe in
the light of the mound testimony. This work will be
an important contribution to the literature of the
Columbian discovery which will doubtless appear
during the coming two years.

"A valuable contribution to the question, 'Who
were the mound-builders?'"—*New York Times*.

"Professor Cyrus Thomas undertakes to trace
back the evidences of a single Indian tribe into the
prehistoric or mound-building age."—*N. Y. Sun*.

"An interesting paper."—*Christian Union*.

V. THE TORNADO. By H. A. HAZEN. 12°. \$1.

"The little book is extremely interesting."—*Bos-
