

## AMONG THE PUBLISHERS.

IN the *New England Magazine* for November, C. S. Plumb writes of "A Future Agriculture."

— Dr. Wyatt's work on "The Phosphates of America" is announced as in preparation by the Scientific Publishing Company of this city.

— The *Review of Reviews* seems to have come to the aid of the Society for Psychical Research. It is about to publish, in an early number, a batch of modern ghost stories as a sort of contribution to a "census of hallucinations."

— D. C. Heath & Co., Boston, will issue shortly a beginner's book in Old English (Anglo-Saxon), by George Hempl, professor of English in the University of Michigan. It will consist of elementary grammar and easy texts suitable as introductory to advanced grammar and reading, though sufficient for the usual course in Old English in colleges that give but one course, and in high schools.

— President F. A. Walker's standard works on "Money" and on "Wages" are attracting much attention in England, whither several editions have been sent and where reference to them in the university extension circulars is frequent. The demand for a popular edition in this country and in England will shortly be met by Messrs. Henry Holt & Co., who will issue the two works at a lower price than heretofore.

— The November number of *Babyhood* closes its seventh volume. It contains an article on "The Family Medicine Chest," by the medical editor, which gives instructions as to what ought to be kept on hand in every household for use in an emergency. At the same time the writer points out the dangers of indiscriminate domestic doctoring. Other medical articles of interest to mothers are "The Care of Delicate Infants" and "Bathing for Sick Children." The "Nursery Table" tells how to prepare palatable nursery dishes, and the "Nursery Helps and Novelties" and "Nursery Problems" furnish useful hints and advice concerning the many perplexing questions which parents of young children have to solve. In the "Parliament" the mothers discuss the habit of eating "between meals," the homesickness of children, the baby's photograph, the influence of Punch and Judy on children, etc.

— In the *Educational Review* for November President Hyde of Bowdoin points out what is to be the policy of the small college, now that great universities have been developed. Dr. William H. Maxwell has a paper on the "Literature of Education." Miss Annie Tolman Smith describes the provisions made in Europe for the pensioning of superannuated teachers, and suggests the inauguration of a similar policy here. Professor William B. Smith of the University of Missouri in an article entitled "Twelve versus Ten," argues for the overthrow of the decimal system of numeration. The discussions on city school supervision and practice teaching

are continued by Superintendent Greenwood of Kansas City and Chancellor W. H. Payne of Nashville, Tenn. There are also articles on "Women as Teachers," "Recent Changes in the Regents Examinations in New York," "The New School Law for St. Paul, Minn.," the "Socratic Method of Teaching," and the "Educated Proletariat of Germany." The book-reviews are by Professor Woodrow Wilson of Princeton, Professor A. B. Hart of Harvard, Professor F. H. Giddings of Bryn Mawr, President C. F. Thwing of Western Reserve University, Professor Henry C. Johnson of Philadelphia, and the editors.

— After years of labor by the editor, John Foster Kirk, and his assistants, the supplement to "Allibone's Dictionary of English Literature and British and American Authors" is announced by J. B. Lippincott Company as now completed, thus extending and bringing down to the latest practicable date one of the great literary enterprises of the century. Begun in 1850, and for the most part written in the few following years, the three original volumes

of Dr. Allibone's work of necessity fail to contain an account of a vast number of books that have of late been published. To supply this deficiency and thus present in a single series of volumes a complete bibliography of English literature from the earliest times to the present (as nearly as possible) has been the aim of the publishers in issuing this supplementary section of the work. Altogether, 37,183 authors, with their works (93,780 in number), are recorded in the supplement, with frequent biographical and bibliographical notices, the latter embracing in many instances criticisms of the works mentioned, from the leading reviews of the day.

— In the *Atlantic Monthly* for November S. E. Winbolt's paper, "The Schools at Oxford," is an account of the work and the examinations that are necessary for a degree from the university. The paper is particularly interesting as showing the difference in the manner of attaining a degree in the English and American universities.

rapidly receding."—*Boston Transcript*.  
"The picture of our desolate North-western terri-  
tory twenty-five years ago, in contrast with its

the writer's style, constitute the claims of his little  
book to present attention."—*The Dial*.

## THE MODERN MALADY; or, Suf- ferers from 'Nerves.'

An introduction to public consideration,  
from a non-medical point of view, of a con-  
dition of ill-health which is increasingly  
prevalent in all ranks of society. In the  
first part of this work the author dwells on  
the errors in our mode of treating Neurast-  
henia, consequent on the wide ignorance of  
the subject which still prevails; in the sec-  
ond part, attention is drawn to the principal  
causes of the malady. The allegory forming  
the Introduction to Part I. gives a brief his-  
tory of nervous exhaustion and the modes of  
treatment which have at various times been  
thought suitable to this most painful and try-  
ing disease.

By CYRIL BENNETT.

### IV. THE CHEROKEES IN PRE-CO- LUMBIAN TIMES. By CYRUS THOMAS. 12°. \$1.

Dr. Thomas has already presented to the public  
some reasons for believing the Cherokees were  
mound-builders, but additional evidence bearing  
on the subject has been obtained. A more careful  
study of the Delaware tradition respecting the Tal-  
legwi satisfies him that we have in the Bark Record  
(Walam Olum) itself proof that they were Chero-  
kees. He thinks the mounds enable us to trace back  
their line of migration even beyond their residence  
in Ohio to the western bank of the Mississippi. The  
object is therefore threefold: 1. An illustration of  
the reverse method of dealing with prehistoric sub-  
jects; 2. Incidental proof that some of the Indians  
were mound builders; 3. A study of a single tribe in  
the light of the mound testimony. This work will be  
an important contribution to the literature of the  
Columbian discovery which will doubtless appear  
during the coming two years.

"A valuable contribution to the question, 'Who  
were the mound-builders?'"—*New York Times*.

"Professor Cyrus Thomas undertakes to trace  
back the evidences of a single Indian tribe into the  
prehistoric or mound-building age."—*N. Y. Sun*.

"An interesting paper."—*Christian Union*.

### V. THE TORNADO. By H. A. HAZEN.

12°. \$1.  
"The little book is extremely interesting."—*Bos-  
ton Transcript*.

"A book which will find many readers. The  
chapter on 'Tornado Insurance' is of interest to  
all property-holders in the tornado States."—*Boston  
Herald*.

"The Tornado is a popular treatise on an im-  
portant province of meteorology, in which science, the  
author, Professor Hazen of the United States Signal  
Service, may be regarded as an expert."—*Philadel-  
phia Ledger*.

### VI. TIME-RELATIONS OF MENTAL PHENOMENA. By JOSEPH JASTROW. 12°. 50c.

"All students of psychology will find the book full  
of interesting facts. Professor Jastrow's good qual-  
ities as a thinker and as a writer are too well and  
too widely known to require comment."—*Public  
Opinion*.

"A useful work for psychologists—as well as the  
general reader—by setting forth in brief and easily  
intelligible form the present state of knowledge in  
regard to the time required for the performance of  
mental acts."—*The Critic*.

### VII. HOUSEHOLD HYGIENE. By MARY TAYLOR BISSELL. 12°. 75 cents.
