

used, most of the little volume is devoted. The volume is mainly a compilation of matter on the subject, well selected and judiciously worked into shape; to which the author has added many ideas and suggestions of his own and of officers who have been associated with him in the naval service.

— The *Magazine of American History* opens its twenty-seventh volume with the New Year. The leading paper, by Hon. Arthur Harvey, the president of the Canadian Institute, is the first part of "A Critical and Common-sense View of the Enterprise of Christopher Columbus," illustrated. "The Secret Societies of Princeton University," by Thomas Hotchkiss, Jun., illustrates the old and new Whig Halls at Princeton. "A Short-lived American State," is a contribution from the Louisiana historian, Henry E. Chambers. The question, "Was America Discovered by the Chinese?" is discussed by Rev. Dr. Glover. Those who look for the editor's contribution will find it in an account of "Prince Henry the Navigator," the first to conceive the bold project of

opening a road through the unexplored ocean, who indeed was the originator of the impulse which sent Columbus subsequently to our shores. "The Scot in America," by Hon. R. S. Robertson, turns the light upon a most interesting race among the founders of America. "A Sketch of John Badollett, 1758-1887," one of Indiana's strong characters in early times, is by President Bryan of Vincennes University. "Letters on Government Making, by Patrick Henry and John Adams, in 1776;" some things about "Collis P. Huntington," by Hubert Howe Bancroft; "Canada from a European Point of View in 1761;" and other short contributions complete the number.

— One of the early issues of D. C. Heath & Co. will be "White's Number Lessons," graded for second and third year pupils. It has been selected from the everyday blackboard work used in the Syracuse schools. It deals with numbers progressively from ten up into the thousands, using easy fractions and Arabic numerals throughout.

A Tonic

Horsford's Acid Phosphate.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. EPHRAIM BATEMAN, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

THE MODERN MALADY; or, Sufferers from 'Nerves.'

An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in our mode of treating Neurasthenia, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady. The allegory forming the Introduction to Part I. gives a brief history of nervous exhaustion and the modes of treatment which have at various times been thought suitable to this most painful and trying disease.

IV. THE CHEROKEES IN PRE-COLUMBIAN TIMES. By CYRUS THOMAS.

12°. \$1.
Dr. Thomas has already presented to the public some reasons for believing the Cherokees were mound-builders, but additional evidence bearing on the subject has been obtained. A more careful study of the Delaware tradition respecting the Tallegi satisfies him that we have in the Bark Record (Walam Oium) itself proof that they were Cherokees. He thinks the mounds enable us to trace back their line of migration even beyond their residence in Ohio to the western bank of the Mississippi. The object is therefore threefold: 1. An illustration of the reverse method of dealing with prehistoric subjects; 2. Incidental proof that some of the Indians were mound-builders; 3. A study of a single tribe in the light of the mound testimony. This work will be an important contribution to the literature of the (Columbian) discovery which will doubtless appear during the coming two years.

"A valuable contribution to the question, 'Who were the mound-builders?'"—*New York Times.*

"Professor Cyrus Thomas undertakes to trace back the evidences of a single Indian tribe into the prehistoric or mound-building age."—*N. Y. Sun.*

"An interesting paper."—*Christian Union.*
