

find the mother more impregnated with the blood of the paternal house? And if so, does this impregnation seriously tend to make the children favor the family that gives them the name? Is the fact of parental influences—the influences here alluded to being those suggested by Mr. Williams, sympathy or antipathy for people frequently seen—thoroughly established? In a love-match is the face of the father more commonly reproduced? If there are reversions to a primitive type, what is the type—one lying on the maternal or the paternal side?

Do family portraits show a uniformity? If they do, is not the question settled? How, then, can the fact that family portraits show a uniformity—that being the point in question—be cited to prove the point in question, that family portraits do, or do not, show a uniformity?

Exhaustion

Horsford's Acid Phosphate.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak and debilitated, will find in the Acid Phosphate a most agreeable, grateful and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good."

Descriptive pamphlet free.

*New Method of Protecting Property
from Lightning.*

The Lightning Dispeller.

Price, \$20 to \$30.—According to size.

The Patent Lightning Dispeller is a conductor specially designed to dissipate the energy of a lightning discharge,—to prevent its doing harm,—placing something in its path upon which its capacity for causing damage may be expended.

No recorded case of lightning stroke has yet been cited against the principle of the Dispeller. So far as known, the dissipation of a conductor has invariably protected under the conditions employed.

Correspondence solicited.

AMONG THE PUBLISHERS.

THOMAS WHITTAKER has just published "The Story of the Discovery of the New World," by Frederick Saunders of the Astor Library, illustrated by C. A. Bobbett.

—A. C. McClurg & Co. announce a volume entitled "Direct Legislation by the People," by Nathan Cree. The author gives a brief review of direct government from the earliest times, and of the rise and development of popular representation. He then considers the advantages of combining direct popular legislation with representative institutions, in which direction, he believes, lies emancipation from political corruption. In this connection he examines two remarkable features of the Swiss Government, viz., the *Referendum* and the *Popular Initiative*. The author's standpoint is said to be conservative.

NEO-DARWINISM AND NEO-LAMARCKISM.

By LESTER F. WARD.

Annual address of the President of the Biological Society of Washington delivered Jan. 24, 1891. A historical and critical review of modern scientific thought relative to heredity, and especially to the problem of the transmission of acquired characters. The following are the several heads involved in the discussion: Status of the Problem, Lamarckism, Darwinism, Acquired Characters, Theories of Heredity, Views of Mr. Galton, Teachings of Professor Weismann, A Critique of Weismann, Neo-Darwinism, Neo-Lamarckism, the American "School," Application to the Human Race. In so far as views are expressed they are in the main in line with the general current of American thought, and opposed to the extreme doctrine of the non-transmissibility of acquired characters.
