

on the part of his readers. The natural consequence of this is that, for the intelligent American reader, who has learned his scientific alphabet long since, the book is liable to appear somewhat prosy and verbose. Having said this, our criticism is concluded, for it is certain that Mr. Romanes is fully conversant with his subject in all its branches, and a careful examination of the book has shown his treatment of the subject to be judicious, accurate, and fair. For all persons who desire a straightforward statement of what is implied by the term Darwinism when strictly construed, the book is to be recommended. Since public speakers, both in favor of and opposed to the doctrines of evolution and natural selection, are only too frequently given to singular misconceptions on this subject, it is fortunate that a work has at last appeared which presents a satisfactory summary of the theory for general reference, and we hope it may be widely circulated and carefully read by the numerous class for whom it is intended. Besides numerous diagrams of fairly good quality, the volume is embellished with Jeens's well-known portrait of Darwin, from the "Nature" series, which will be welcome to all admirers of the great philosopher.

The Indians of Canada; their manners and customs. By JOHN McLEAN. Third Edition. London, Charles H. Kelly. 351 p.

MR. McLEAN speaks from the experience of nine years spent among the Indians of the North-west, and is therefore excellent

authority for what came within the scope of his studies. These embraced the languages, literature, native religions, folk-lore, and later Christian life of the wild tribes. He talks in an interesting manner about their heroes, traditions, mode of living, and customs, and describes the land in which the tribes he visited pass their lives. The impression the book gives, however, is that it has been written down to a popular style, and that the author could have prepared a much more valuable production, had he not felt it necessary to consult what he considered the taste of the average reader.

AMONG THE PUBLISHERS.

THERE is now in press a work specially written for the Jewish Publication Society by Israel Zangwill, of London. It is entitled "Children of the Ghetto, being pen-pictures of a peculiar people." It will be forwarded to members in the forthcoming autumn. Arrangements have also been made for the publication, this year, of the second volume of Graetz's "History of the Jews."

—Close upon the recent invasion of Manhattan Island by thousands of enthusiasts in the cause of the elevation of the human race, comes the dread news, says *The Publishers' Weekly*, of the stealthy entry of two enemies that has struck terror into the heart of every man who owns a book worth having. So wily has been their insinuation into our midst that it would be difficult to

fix the exact date of their immigration. Their history really begins with the fine morning, last week, on which Mr. W. E. Benjamin of 751 Broadway, New York City, took from his shelf a worn leather-bound copy of Seneca, published in London in 1675, and found two healthy specimens of the genus *Aglossa pinquinalis* ensconced in a burrow through the bottom of the precious book.

—Harper & Brothers have in preparation an illustrated edition of Green's "Short History of the English People," a work which has probably been more widely read and enjoyed than any other of its kind. The illustrations have been selected with the purpose of carrying out the favorite wish of the author, to interpret and illustrate English history by pictures which should show how men and things appeared to lookers-on of their own day, and how contemporary observers aimed at representing them. Besides a large number of elegant wood-engravings, the work will contain several colored plates, including reproductions from manuscripts, illuminated missals, etc., executed in the highest style of chromo-

lithography. An exhaustive series of portraits of eminent persons will also be a prominent feature. The first volume may be expected shortly.

—Prof. Bernard Bosanquet of London, whose "History of Aesthetics" has recently been published by Macmillan & Co., has just completed a course of fifteen lectures at the School of Applied Ethics, Plymouth, Mass. His theme was an historical survey of Greek ethics, tracing to the present day the influence of Plato and Aristotle. In clearness, precision, and in power to interest and stir his hearers Mr. Bosanquet proved as effective a teacher as England has ever sent across the sea. His ability as a thinker has been familiar to American students through his work on logic, which takes high rank as an authority. A recently published volume in the Contemporary Science Series presents his "Essays and Reviews," showing him to be one of the most incisive and sympathetic writers of the time in the fields of ethical and philosophical inquiry. Mr. Bosanquet intends to visit Colorado and the Yellowstone region before returning to England next month.

Speech Reading and Articulation Teaching.

By A. MELVILLE BELL.

Price, 25 Cents.

Practical Instructions in the Art of Reading Speech from the Mouth; and in the Art of Teaching Articulation to the Deaf.

[This Work—written at the suggestion of Miss Sarah Fuller, Principal of the Horace Mann School for the Deaf, Boston, Mass.—is, so far as known, the first treatise published on "Speech Reading."]

From Principals of Institutions for the Deaf.

"Admirable in its conciseness, clearness and freedom from technicality."

"The simplicity and perfection of this little book."

"Full of exact and helpful observations."

"A very interesting and valuable work."

"The rules are clearly given and will be of great utility."

"Every articulation teacher should study it."

"A model of clearness and simplicity, without having any of the puzzling symbols that trouble the common mind. . . . The exercises given in speech-reading from the lips are especially interesting, and of great importance for the student of phonetics."—*Modern Language Notes*.
