EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; J. LE CONTE, Geology; W. M. DAVIS, Physiography; O. C. MARSH, Paleontology; W. K. BROOKS, C. HART MERRIAM, Zoology; S. H. SCUDDER, Entomology; N. L. BRITTON, Botany; HENRY F. OSBORN, General Biology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; J. MCKEEN CATTELL, Psychology; DANIEL G. BRINTON, J. W. POWELL, Anthropology.

FRIDAY, JULY 2, 1897.

LIFE AND LETTERS OF WILLIAM BARTON ROGERS.

CONTENTS:

<i>Life and Letters of William Barton Rogers:</i> T. C. MENDENHALL	1
<i>The Merton Rules:</i> ELLIOTT COUES, J. A. ALLEN..	9
<i>Origin of Green River:</i> S. F. EMMONS.....	19
<i>Zoological Notes:—</i>	
<i>Scientific Name of the Viscacha:</i> T. S. PALMER.	21
<i>Current Notes on Physiography:—</i>	
<i>Bosphorus, Rhine and Hudson: The Geography of Brittany; Insequent Rivers; New Terms in Geology and Geography:</i> W. M. DAVIS.....	22
<i>Current Notes on Anthropology:—</i>	
<i>Central American Caribs; The Anthropozoic Formation:</i> D. G. BRINTON	24
<i>Notes on Inorganic Chemistry:</i> J. L. H.....	25
<i>Scientific Notes and News.....</i>	27
<i>University and Educational News.....</i>	30
<i>Discussion and Correspondence:—</i>	
<i>Paleontological and Embryological Methods—A Rejoinder:</i> A. A. W. HUBRECHT. <i>A Clamp for Fragile Glassware.</i> C. BARUS. <i>Merrill's Treatise on Rocks:</i> W J MCGEE. <i>Trial of the Crossley Reflector of Lick Observatory:</i> EDWARD S. HOLDEN.....	30
<i>Scientific Literature:—</i>	
<i>Nehrling on Our Native Birds of Song and Beauty:</i> C. H. M. Reid <i>on the Present Evolution of Man:</i> T. D. A. COCKERELL.....	32
<i>Societies and Academies:—</i>	
<i>New York Section of the American Chemical Society:</i> DURAND WOODMAN. <i>Torrey Botanical Club:</i> E. S. BURGESS	35
<i>New Books.....</i>	36

THE present generation of men and women have shown in an extraordinary degree their interest in the personality of historical characters.

Current literature teems with examples of this interest in biographical sketches without number, and the public seems to enjoy the most trifling details of the lives of persons of distinction, to secure which both the pen and the camera are driven to the last limit.

That this taste has abnormally developed and is in a large measure harmful few will deny, but there will always exist a wholesome curiosity as to the personal qualities of men whose performances have commanded our admiration. It is not alone in political history that biography is so important. To the student of science a knowledge of the temper, spirit, moods or idiosyncrasies of eminent scientific men has always been highly valued, not only on account of its intrinsic interest, but also because such knowledge often assists in a proper interpretation and appraisal of their work. But when distinguished success is to be attributed to personal qualities even more than to talent; when to scientific accomplishments of a high order is joined a personality so charming and so noble as to silence opposition and command approval, anything that reveals, even a small
