

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; CHARLES D. WALCOTT, Geology; W. M. DAVIS, Physiography; HENRY F. OSBORN, Paleontology; W. K. BROOKS, C. HART MERRIAM, Zoology; S. H. SCUDDER, Entomology; C. E. BESSEY, N. L. BRITTON, Botany; C. S. MINOT, Embryology, Histology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; WILLIAM H. WELCH, Pathology; J. MCKEEN CATTELL, Psychology; J. W. POWELL, Anthropology.

FRIDAY, APRIL 18, 1902.

PLANT PATHOLOGY: A RETROSPECT AND PROSPECT.*

CONTENTS:

<i>Plant Pathology: A Retrospect and Prospect:</i>	
DR. ERWIN F. SMITH.....	601
<i>The Biological Basis of Legislation governing the Lobster Industry:</i> GEORGE W. FIELD..	612
<i>Membership of the American Association....</i>	616
<i>Scientific Books:—</i>	
<i>Morgan's Regeneration:</i> E. G. C. GIESSEN-	
<i>hagen's Die Farngattung Niphobolus:</i> PRO-	
<i>FESSOR LUCIEN M. UNDERWOOD. Gatter-</i>	
<i>mann's Practical Methods of Organic Chem-</i>	
<i>istry; Shaw's Laboratory Exercises in Gen-</i>	
<i>eral Chemistry; Noyes's Elements of Qual-</i>	
<i>itative Analysis:</i> PROFESSOR E. RENOUF..	620
<i>Societies and Academies:—</i>	
<i>The Chicago Section of the American Mathe-</i>	
<i>matical Society:</i> PROFESSOR THOMAS F.	
<i>HOLGATE. New York Academy of Sciences:</i>	
<i>Section of Biology:</i> PROFESSOR HENRY E.	
<i>CRAMPTON. Section of Anthropology and</i>	
<i>Psychology:</i> DR. R. S. WOODWORTH. <i>The</i>	
<i>Torrey Botanical Club:</i> PROFESSOR EDWARD	
<i>S. BURGESS. Northeastern Section of the</i>	
<i>American Chemical Society:</i> PROFESSOR	
<i>HENRY FAY. The Onondaga Academy of</i>	
<i>Science:</i> P. F. SCHNEIDER. <i>The New York</i>	
<i>Association of Biology Teachers:</i> G. W.	
<i>HUNTER, JR.....</i>	625
<i>Discussion and Correspondence:—</i>	
<i>An American Journal of Physics:</i> PRO-	
<i>FESSOR CARL BARUS. The Centenary of</i>	
<i>Hugh Miller:</i> DR. JOHN M. CLARKE. <i>The</i>	
<i>American Association (Section B, Physics):</i>	
<i>PROFESSOR E. F. NICHOLS, PROFESSOR W. S.</i>	
<i>FRANKLIN.....</i>	629
<i>Botanical Notes:—</i>	
<i>Fig Growing in the United States; Summer</i>	
<i>Botany at Wood's Holl; A Journal for Stu-</i>	
<i>dents of Mosses; The Botanists at Pitts-</i>	
<i>burg; A New Distribution of Fungi:</i> PRO-	
<i>FESSOR CHARLES E. BESSEY.....</i>	632
<i>Aeronautics:</i> R. H. T.....	633
<i>U. S. Civil Service Examinations.....</i>	634
<i>Scientific Notes and News.....</i>	635
<i>University and Educational News.....</i>	640

THE study of plant diseases has made remarkable progress within the last two decades. This is commented upon at home and abroad. Perhaps in no field outside of organic chemistry or of animal pathology and bacteriology have the advances been greater. In casting about for a subject, it has seemed to the speaker therefore that perhaps he could not do better in the time allotted to the presidential address than to consider, first, the state of plant pathology prior to the year 1880; second, the progress which has been made from that time to the present; and, third, some of the problems which now confront the investigator. Nothing beyond a popular sketch is contemplated.

The twenty years preceding 1880 were years of stress and uncertainty in the biological world. Pasteur and Cohn had laid the foundations of modern bacteriology and the whole world was agog with interest over the new doctrines of fermentation and of disease. Sachs and de Bary had done equally magnificent work in plant morphology and physiology. But the great masters were not having everything their own way. Hallier and Billroth in Germany were upholding a crazy doctrine of

* Presidential address before the Society for Plant Morphology and Physiology, Fifth Annual Meeting, New York, January 1, 1902.
