

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, JANUARY 13, 1905.

CONTENTS:

<i>Academic Ideals</i> : PROFESSOR R. S. WOODWARD	41
<i>The American Association for the Advancement of Science</i> :—	
<i>The Present State of Geodesy</i> : O. H. TITTMANN	46
<i>Future Developments in Physical Chemistry</i> : PROFESSOR WILDER D. BANCROFT	50
<i>Reports of Committees</i>	59
<i>Scientific Books</i> :—	
<i>Granville on the Differential and Integral Calculus</i> : PROFESSOR JAMES PIERPONT.	
<i>Venable on the Study of the Atom</i> : E. T. ALLEN	64
<i>Societies and Academies</i> :—	
<i>Section of Geology and Mineralogy of the New York Academy of Sciences</i> : PROFESSOR JAMES F. KEMP, DR. E. O. HOVEY. <i>The Philosophical Society of Washington</i> : CHARLES K. WEAD. <i>Michigan Ornithological Club</i> : A. W. BLAIN, JR.	66
<i>Discussion and Correspondence</i> :—	
<i>Interesting and Important Facts</i> : G. K. GILBERT. <i>Specialization, Ignorance and Some Supposed Palliatives</i> : DR. FRANCIS B. SUMNER. <i>Ultra-Violet Light in Photomicroscopy</i> : DR. CLIFFORD RICHARDSON. <i>How does Anopheles Bite?</i> PROFESSOR JOHN B. SMITH	68
<i>Special Articles</i> :—	
<i>Discussion in the British Parliament on the Metric Bill</i> : WILLIAM H. SEAMAN	72
<i>Current Notes on Meteorology</i> :—	
<i>Temperatures in the Free Air; Bad Weather, Good Roads and Farmers; Monthly Weather Review; No Secular Change of Climate in Tripoli; Climatic Changes in the Lake Chad Region; Kite Meteorology over Lake Constance</i> : PROFESSOR R. DEC. WARD	75
<i>First Observations with 'Ballons-Sondes' in America</i>	76
<i>Scientific Notes and News</i>	77
<i>University and Educational News</i>	80

ACADEMIC IDEALS.*

THE beginning of an academic year calls up at once the lighter thoughts of pleasing associations and the graver thoughts of inspiring obligations. Here on the table-land of intellectual life youth and age meet to labor for a season in the fields of knowledge and discovery. The confident optimism of youth seeks to be chastened by the gentle admonition of experience. Youth imparts its buoyancy to age, age imparts its wisdom to youth, and both are kindled by the glow of elevating aspirations. It is a time, therefore, for a blending of our lighter and our graver reflections.

Being delegated for the moment to speak to and for this academic body, it has seemed that some considerations on academic ideals might serve to awaken thought and to arouse zeal appropriate to the occasion. In the abstract, however, this would appear to be a delicate and a difficult subject; delicate because of diversity of sentiment, and difficult because of diversity of judgment, amongst those best qualified to speak, as to what academic ideals are, or as to what they should be. Hence it may seem fitting at the outset to suggest application to the views here set forth of the Socratic caution that they can hardly be exactly as represented, if not the more sweeping caution of Marcus Aurelius—'Remember that all is opinion.' But the delicacy and the difficulty of the subject

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

* Address read on the occasion of the opening exercises of Columbia University, September 28, 1904.
