

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, NOVEMBER 9, 1906.

CONTENTS.

<i>The Dedication of the Engineering Building of the University of Pennsylvania:—</i>	
<i>A Comparison of University and Industrial Discipline and Methods: DR. FREDERICK W. TAYLOR</i>	577
<i>The Engineer as a Citizen: PRESIDENT ALEX. C. HUMPHREYS</i>	583
<i>Scientific Books:—</i>	
<i>Folsom's Entomology: J. G. N. Norton's Elements of Geology: DR. MARK S. W. JEFFERSON</i>	589
<i>Scientific Journals and Articles</i>	591
<i>Discussion and Correspondence:—</i>	
<i>A Definition of Fluid: OSWIN W. WILLCOX. Why do Herring Gulls kill their Young?: HENRY L. WARD. An Unusual Meteor: C. A. CHANT. A Correction: J. W. BEEDE ...</i>	592
<i>Special Articles:—</i>	
<i>A New Artemia and its Life Conditions: PROFESSOR VERNON L. KELLOGG. Some Unusual New Jersey Fishes: HENRY W. FOWLER</i>	594
<i>Quotations:—</i>	
<i>Botany in England</i>	597
<i>Current Notes on Meteorology:—</i>	
<i>The Monthly Weather Review; Mammato-cumulus Clouds; Bird Migration and Weather in Hungary; Notes: PROFESSOR R. DEC. WARD</i>	600
<i>Botanical Notes:—</i>	
<i>Papers on Fungi; California Trees: PROFESSOR CHARLES E. BESSEY</i>	601
<i>Degrees conferred by the University of Aberdeen</i>	602
<i>The Franco-American Expedition to explore the Atmosphere in the Tropics</i>	603
<i>Society for the Promotion of Industrial Education</i>	603
<i>Scientific Notes and News</i>	604
<i>University and Educational News</i>	608

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

THE DEDICATION OF THE ENGINEERING BUILDING OF THE UNIVERSITY OF PENNSYLVANIA.

A COMPARISON OF UNIVERSITY AND INDUSTRIAL DISCIPLINE AND METHODS.

THE point from which I view college education is that of the employer, not that of the educator. I have had no experience with the difficult and complicated problem that faces the professors and the governing boards of our colleges. On the other hand, I have been engaged for years in organizing the shop, office and commercial management of quite a wide range of engineering and manufacturing establishments. This has brought me into intimate personal contact with a large number of college graduates, and I have become well acquainted with their strong points, which are many, and at the same time with a few of those points in which it would seem that as a class they might be improved. And in what I shall say I have principally in mind the preparation of young men for success in commercial engineering and industrial enterprises; in other words, enterprises outside of the four learned professions.

I despise the pessimist who sees nothing but the defects and blunders of mankind, and the scold, whose pleasure it is to complain of all things as they are.

Let me say at the start, that without question our college graduates as a class represent the finest body of men in the community. And as to the value of an engineering course for men in our profession, our fellow-townsmen, Mr. Jas. M.
