

# SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE  
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION  
FOR THE ADVANCEMENT OF SCIENCE

FRIDAY, OCTOBER 11, 1907

## CONTENTS

<i>Preliminary Medical Education:</i> PROFESSOR J. H. LONG .....	457
<i>Scientific Books:—</i>	
<i>James's Pragmatism:</i> PROFESSOR R. M. WENLEY. <i>The Crosby-Brown Collection of Musical Instruments:</i> CHARLES K. WEAD .....	464
<i>Societies and Academies:—</i>	
<i>The American Mathematical Society:</i> PROFESSOR F. N. COLE. <i>Society for Experimental Biology and Medicine:</i> PROFESSOR WILLIAM J. GIES. <i>American Philosophical Society</i> .....	469
<i>Discussion and Correspondence:—</i>	
<i>Smelter Smoke:</i> J. K. HAYWOOD. <i>The Artificial Production of Mutants:</i> DR. W. J. SPILLMAN. <i>An Alleged Diphtheritic Antitoxin:</i> PROFESSOR A. M. BLEILE .....	476
<i>Special Articles:—</i>	
<i>Heart Rot of Sassafras sassafras caused by Fomes Ribis:</i> PERLEY SPAULDING. <i>Note on the Movement of Moisture in Soils:</i> DR. W. J. HUMPHREYS .....	479
<i>Botanical Notes:—</i>	
<i>A New Edition of Engler's Syllabus; A New Laboratory Manual; More Agricultural Botany; Studies in Plant Chemistry:</i> PROFESSOR CHARLES E. BESSEY .....	481
<i>The Density of the Ether:</i> SIR OLIVER LODGE .....	482
<i>The American Electrochemical Society</i> .....	483
<i>Scientific Notes and News</i> .....	484
<i>University and Educational News</i> .....	487

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

## PRELIMINARY MEDICAL EDUCATION<sup>1</sup>

AMONG medical men interested in the advance of their profession few questions are attracting more attention at the present time than is that of the character of their professional education, and going a step farther, it might be said that opinion is now pretty well settled on this point that the important part of the medical education is the beginning of it, or perhaps better, the preparation for it.

Questions of the relations of medical education to medical practise have been discussed by college faculties, medical societies, state boards of examiners and other bodies, and out of all their discussions some tangible results are beginning to follow, as shown by the rapidly increasing requirements for entrance to or graduation from medical schools, which are now insisted upon by those in authority. Recently, through its Council on Medical Education, the American Medical Association has begun to take a very active part in the discussion, and will undoubtedly exert a great influence in shaping opinion. The association has had for years a committee on education, but as the membership changed from year to year, little of real value was accomplished. In 1904, however, a permanent body known as the Council on Medical Education was created, the functions of which are to determine the actual condition of this branch of profes-
